B164. Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.
Обращает на себя внимание достоверное снижение уровней распространённости в динамике последних 10 лет. Количество подростков курильщиков сигарет уменьшилось за изучаемый период в 3,5 раза (с 26,5% в 2004 до 7,5% в 2015). Установлено, что треть современных подростков когда-либо пробовали курить: 35,7% -- любые табачные изделия, 31,2% -- сигареты, 15,3% -- другие виды. 10 лет назад когда-либо пробовали курить в два раза больше школьников (62,5%). Число подростков, употребляющих бездымный табак снизилось в 5 раз по сравнению с 2004 годом. До принятия соответствующих законодательных мер на национальном уровне число подростков, подвергающихся пассивному курению, было в 3 раза больше. Аналогичное исследование после 2015 года не проводилось.
