B62. Do you have any information on the percentage of illicit tobacco products on the national tobacco market?
No

B63. What percentage of the national tobacco market do illicit tobacco products constitute? (%)

B64. What is the trend over the past two years or since submission of your last report in the percentage of illicit tobacco products in relation to the national tobacco market?

B65. Please provide any further information on illicit tobacco products.

Indirect Taxation Authority for Bosnia and Herzegovina has no official data regarding the percentage of illicit tobacco and processed tobacco substitutes on the national tobacco market. This type of research requires data from all institutions responsible for law enforcement that are dealing with the control of these types of goods.

According to estimates and due to an increase in specific and the minimum excise duty on cigarettes and amount of excise tax on smoking tobacco, as well as uneven price of this goods in the neighbouring countries, there will be an increase in the smuggling and sale of these products in the market of Bosnia and Herzegovina in the coming period.

In the period from 2013 to 2017 and in order to support interventions for prevention and control of chronic diseases in BiH, the project "Strengthening and upgrading modern and sustainable public health strategies, capacities and services to improve the health of the population in Bosnia and Herzegovina" was implemented in partnership between the Swiss Agency for Development and Cooperation (SDC) and the WHO Regional Office for Europe. The implementation of activities under this project in the Federation of Bosnia and Herzegovina was entrusted to the Institute of Public Health of the Federation of Bosnia and Herzegovina in cooperation with the Federal Ministry of Health. Under the Project's Component 2 entitled "Adaptation/development of instruments, materials and sets of indicators for the monitoring and evaluation of interventions in the field of risk assessment and management of cardiovascular diseases (CVRAM)", activities were taken related to assessment of total cardiovascular risk in practice of Family Medicine, development of guidelines and protocols such algorithms of procedures in primary health care for cardiovascular diseases and risk factors, as well as to development of appropriate educational materials for patients.

As part of this intervention, the Institute of Public Health of the Federation of Bosnia and Herzegovina in cooperation with the Federal Ministry of Health and the participation of representatives of the Association of Cardiologists of Bosnia and Herzegovina finalized and published guides for: the prevention of cardiovascular disease and determining cardiovascular risk (SCORE), hypertension, diabetes and dyslipidaemia as well as guidelines for individual factors such as obesity in children and adults, physical activity, diabetes and smoking.

In developing the guides it was used European Guide for Cardiovascular Disease Prevention in Clinical Practice (version 2012.) which has been drawn up by the European Association for Cardiovascular Prevention and Rehabilitation (EACPR). In order to support the efficient use of these guides and guidelines for the prevention and control of cardiovascular diseases, during 2017 training of about 1,200 medical doctors and nurses/technicians in teams of family medicine in the Federation of Bosnia and Herzegovina was held. Education was organized by the Institute of Public Health of the Federation of Bosnia and Herzegovina in cooperation with educational centers of Family Medicine of the Community Health Centers Sarajevo, Tuzla, Zenica, Mostar and Bihać.

The same educational materials were developed for the Ministry of Health and Social Welfare in the Government of Republic of Srpska.

Ministry of Health and Social Welfare in the Government of Republic of Srpska provided main support of occasional different promotion campaigns performed mainly by Institute of Public Health, in collaboration with primary health care/family medicine teams and NGO's. Also, the project "Strengthening and upgrading modern and sustainable public health strategies, capacities and services to improve the health of the population in Bosnia and Herzegovina" was implemented in Republic of Srpska in partnership between the Swiss Agency for Development and Cooperation (SDC) and the WHO Regional Office for Europe. There is no national system for epidemiological surveillance, but population surveys in Federation of Bosnia and Herzegovina and Republic of Srpska are conducted. Primary Health Care facilities keep records of smoking status based on recommendation from Guidelines for quitting smoking in PHC which are developed by Public Health Institute of the Federation BiH and Ministry of Health and Social Welfare in the Government of Republic of Srpska. Questions C436 and C437 are mainly covered through regular reports sent by WHO and participation on regional and global tobacco control meetings.
