B62. Do you have any information on the percentage of illicit tobacco products on the national tobacco market?
Yes

B63. What percentage of the national tobacco market do illicit tobacco products constitute? (%)
48.0000000000

B64. What is the trend over the past two years or since submission of your last report in the percentage of illicit tobacco products in relation to the national tobacco market?
On national level, Customs Directorate had made estimations about illegal market (consumption) of tobacco products for year 2016. The estimation was focused on illegal trade (consumption) of tobacco products – cigarettes and fine cut tobacco. According to the estimation, the share of illegal consumption of fine cut tobacco is 48,04 % in total consumption of fine cut tobacco on year basis. In year 2016 comparing to year 2015 there is an increased number in quantities of seized tobacco, and the reason is big difference in price that it is offered on illegal market comparing to bigger prices on legal market. When it comes to cigarettes, there is some difference, and according to the estimation there is a negative illegal consumption of cigarettes, where comparing to year 2015 there is an increase in taxable quantities of cigarettes. Since 2007 numbers - of major cigarette seizures and quantity of the seized cigarettes made in Croatia have been decreasing, year by year. One of the reasons is that the smuggling routes changed by accession of Romania and Bulgaria to the European Union. Another reason lies in the fact that smuggling small quantities usually poses lesser threat for smugglers. Recent trends demonstrate a tendency by smuggling organizations to smuggle cigarettes in Eastern and South Europe, including Croatia, in small quantities. This phenomenon of so called “ant smuggling” involves a large number of travelers who individually smuggle small quantities of cigarettes, transporting them clandestinely across the border in vast number of small consignments in private cars, vans and small buses, by individuals traveling by train or by pedestrians. Some amount of smuggled cigarettes remains in the country for personal use or for sale on local markets but we presume that the majority of them are stored in clandestine warehouses for introduction in large scale on markets in Northern and Western Europe. However, the number of seized cigarettes in year 2017 comparing to year 2016 decreased, and the reason are two big seizures, one in Croatian port, in container traffic, and one in BCP (road traffic) that were executed in year 2016. During 2017. there was only one big seizure of cigarettes, in maritime traffic. Also, during several years there has been a dramatic increase in seizures of tobacco leaf (raw tobacco) and fine cut tobacco, which indicates that the illegal market is mainly focused on illicit trade in tobacco.

B65. Please provide any further information on illicit tobacco products.
NA

B66. Please indicate the source of the data used to answer questions in section B6:
Customs Administration and Ministry of the Interior *Data provided in section 2.6.1 contains information about seizures made by Customs Administration (quantity seized: 28.056.852 pieces of cigarettes and 52.616,94 kg of tobacco in 2016; 7.177.251 pieces of cigarettes and 48.418,97 kg of tobacco in 2017) and Ministry of the Interior (quantity seized: 842.495 pieces of cigarettes and 34.674,37 kg of tobacco in 2016; 22.517,84 kg of tobacco and 2.505.967 pieces of cigarettes in 2017).

B7. Tobacco-growing

B71. Is there any tobacco-growing in your jurisdiction?
Yes

B72. Please provide information on the number of workers involved in tobacco-growing. If available, please provide this figure broken down by gender.
Given that this is in Croatia mainly seasonal business, in this way it mainly employ seasonal workers, especially during harvest tobacco leaf, it is hard to estimate exact number of workers involved in tobacco-growing. We estimate that in this way employ about 4.500 workers, but for a short time, about six months.

B73. Please provide, if available, the share of the value of tobacco leaf production in the national gross domestic product.
0,3% of the national gross domestic product.
