B135. Please provide a brief explanation of the trend in smokeless tobacco use in the adult population in the past two years or since submission of your last report.
Compared to 2014, the number who had never used smokeless tobacco products has increased by one percentage point. In addition to those who use smokeless tobacco at least once per month (current users), in the Eurobarometer survey 3% said they had at least tried smokeless tobacco.
As a general comment it should be noted that oral tobacco is banned in the EU with the exception of Sweden. Chewing and nasal tobacco is allowed but not commonly used.

B62. Do you have any information on the percentage of illicit tobacco products on the national tobacco market?
No

B63. What percentage of the national tobacco market do illicit tobacco products constitute? (%)

B64. What is the trend over the past two years or since submission of your last report in the percentage of illicit tobacco products in relation to the national tobacco market?

B65. Please provide any further information on illicit tobacco products.
Related to the answer to question B.6.2. The European Anti-Fraud Office does not at this time have specific information on the size of the illicit markets on a national level.
However, under the Hercule III work programme 2017, a tender is due to be launched for a study to identify an approach to measure the illicit market for tobacco products. This study aims to identify a robust, reliable and independent methodology to measure the illicit market for tobacco products that can be applied at national and EU level.
The Hercule III multiannual anti-fraud action Programme entered into force in March 2014 and makes EUR 104.9 million available for the period 2014-2020 to finance concrete projects to support Member States in stamping out tobacco smuggling and other criminal activities.

B66. Please indicate the source of the data used to answer questions in section B6:
The answer to question B.6.1. is based on quarterly reports of the EU Member States to The European Anti-Fraud Office (OLAF). OLAF gathers information from the Member States on overall seizure figures (quarterly reporting) and data on individual seizures via its reporting database CIGINFO.

B7. Tobacco-growing

B71. Is there any tobacco-growing in your jurisdiction?
Yes

B72. Please provide information on the number of workers involved in tobacco-growing. If available, please provide this figure broken down by gender.
In 2016, 45 000 growers and around 350 000 workers (full time or seasonal, including family labor).
The number of workers is an estimation done by associations of tobacco farmers

B73. Please provide, if available, the share of the value of tobacco leaf production in the national gross domestic product.

B8. Taxation of tobacco products (with reference to Articles 6.2(a) and 6.3)

B81. What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))?

B82[SQ001]. How are the excise taxes levied (what types of taxes are levied)? [Specific tax only]

No

B82[SQ002]. How are the excise taxes levied (what types of taxes are levied)? [Ad valorem tax only]

No

B82[SQ003]. How are the excise taxes levied (what types of taxes are levied)? [Combination of specific and ad valorem taxes]

Yes

B82[SQ004]. How are the excise taxes levied (what types of taxes are levied)? [More complex structure (please explain below)]

Yes

B82a. If a more complex structure of taxes (please explain):

This is different for each EU Member State. On 1 January 2018, the share of applicable taxes (excise duties and VAT) on cigarettes ranges from 69.39% up to 89.4 % of the WAP (weighted average retail selling price). For detailed data – also on fine-cut tobacco, other smoking tobacco and cigars/cigarillos, see https://ec.europa.eu/taxation_customs/taxes-europe-database-tedb_en.

• More complex structure (explanation): For cigarettes: obligatory combination of specific and ad valorem with an EU wide applicable minimum rate of 60% of the weighted average retail selling price (WAP) and 90 Euro per 1000 cigarettes or at least 115 Euro per 1000 cigarettes. The WAP is calculated by reference to the total value of all cigarettes released for consumption, based on the retail selling price including all taxes, divided by the total quantity of cigarettes released for consumption. Since 2011, the WAP has been determined by 1 March at the latest of each year on the basis of data relating to all such releases for consumption made in the preceding calendar year.

• Minimum levels of excise duty for fine-cut tobacco: As from 1 January 2018: 48% of the WAP or at least EUR 60 / kg. As from 1 January 2020: 50% of the WAP or at least EUR 60 / kg.

• Minimum levels of excise duty for other smoking tobacco, the current minimum rate is 20% of the TIRSP (tax included retail selling price) or 22.00 Euro per kg.

• Minimum levels of excise duty for cigars and cigarillos, the current minimum rate is 5% of the TIRSP or 12.00 Euro per 1000 items or per kg

B84. Please briefly describe the trends in taxation for tobacco products in the past two years or since submission of your last report in your jurisdiction.

Council Directive 2011/64/EU on the structure and rates of excise duty applied to manufactured tobacco (codification) was adopted on 21 June 2011.

According to this Directive, EU Member States have to apply to cigarettes a specific excise duty per unit of the product and a proportional excise duty calculated on the basis of the weighted average retail selling price. Furthermore, Member States may choose between either an ad valorem duty, or a specific duty or a mixture of both on manufactured tobacco products other than cigarettes.

This Directive

- defines the various categories of manufactured tobacco (cigarettes, fine cut tobacco intended for the rolling of cigarettes, cigars and cigarillos, other smoking tobacco);

- lays down the general principles governing taxation of manufactured tobacco;

- provides for an overall minimum excise duty of 60% of the weighted average retail selling price of cigarettes;

- provides for a minimum amount of excise duty of 90 Euro per 1000 cigarettes irrespective of the weighted average retail selling price;

- determines the minimum rates for fine-cut smoking tobacco intended for the rolling of cigarettes (see 2.8.2);

- determines the minimum rates for cigars and cigarillos (see 2.8.2);

- determines the minimum rates for other smoking tobacco (see 2.8.2).

B92B. Please indicate the source of the data used to answer question B91:

B93. Please briefly describe the trend in the prices of tobacco products in the past two years or since submission of your last report in your jurisdiction.

The EU covers 28 countries. Therefore, it is not possible to indicate the country-specific domestic and imported most sold brands. The overall average of the WAP (weighted average retail selling price) in all 28 Member States amounts to 235.03 Euro per 1000 cigarettes on 1 January 2018, with the lowest WAP in one Member State of 127.57 Euro and the highest WAP in one Member State of 503.5 Euro. (If translated into a price range, this would correspond to a price range per pack of 20 cigarettes from 2.55 to 10.07 EUR).

In 26 Member States the average price of cigarettes released for consumption during 2015 and 2017 increased. It should be noted that the WAP for 2018 for instance, is based on the average prices of all cigarettes released for consumption during the previous year.

C1. GENERAL OBLIGATIONS

C1. With reference to Article 5

C111. Have you developed and implemented comprehensive multisectoral national tobacco control strategies, plans and programmes in accordance with the Convention?

Yes

C112. Have you partially developed and implemented tobacco control strategies by including tobacco control in national health, public health or health promotion strategies, plans and programmes?

N/A

C113. Is any aspect of tobacco control that is referred to in the Convention included in any national strategy, plan or programme?

N/A

C114[C114a]. Have you established or reinforced and financed: [a focal point for tobacco control?]

Yes

C114[C114b]. Have you established or reinforced and financed: [a tobacco control unit?]

Yes

C114[C114c]. Have you established or reinforced and financed: [a national coordinating mechanism for tobacco control?]

Yes

C115. Please provide details (e.g. the nature of the national coordinating mechanism, the institution to which the focal point for tobacco control or the tobacco control unit belongs).

The EU has a solid and comprehensive pack of measures to control tobacco. However, depending on the specific area, the EU has more or less competencies compared with the EU Member States; For example, the EU legislates in certain areas (notably on tobacco products and on tobacco advertising) and carries out actions to support, co-ordinate or supplement the actions of the EU Member States (notably on smoke free environments).

The European Commission, within its Directorate General for Health and Food Safety, has a unit in charge of tobacco control matters for the EU.

Since 2012, the European Anti-Fraud Office (OLAF) has attributed the investigative and policy-making functions to separate Directorates in order to avoid any perception of a potential conflict of interest. In 2014 a team fully devoted to the fight against illicit tobacco trade through policy analysis and development was set up in OLAF's Policy Directorate; there is also an investigation unit responsible for fraud investigations related to tobacco products.

C116. Please provide a brief description of the progress made in implementing Article 5.1 and 5.2 (General obligations) in the past two years or since submission of your last report.

The European Commission discusses matters of tobacco control regularly, within the different departments of the Commission as well as with the EU Member States. This is partly done in formal settings such as the Tobacco Products Committee and the Expert Group on Tobacco Policy, and partly in an informal ad-hoc manner.

On the basis of the existing co-ordination, and as regards smoke-free environments, a network of national focal points has been put in place in order to exchange best practice and work on common indicators across the EU.

Additionally, the European Union produced a progress report in May 2017 on its comprehensive strategy on "Stepping up the fight against cigarette smuggling and other forms of illicit trade in tobacco products" of 2013. https://ec.europa.eu/anti-fraud/sites/antifraud/files/tobacco_implementation_report_12052017_en.pdf

In the Framework of this progress report on the strategy, the Commission intends to prepare an Action Plan to counter tobacco smuggling in 2018.

C117. If you have any other relevant information pertaining to but not covered in this section, please provide details in the space below.

The EU Health Programme 2014 -2020 provides for various possibilities of financing initiatives in the area of public health, including on tobacco control. See: http://ec.europa.eu/health/programme/policy/index_en.htm.

C12. Protection of public health policies with respect to tobacco control from commercial and other vested interests of the tobacco industry Have you adopted and implemented, where appropriate, legislative, executive, administrative or other measures or have you implemented, where appropriate, programmes on any of the following:

C121. protecting public health policies with respect to tobacco control from commercial and other vested interests of the tobacco industry?

Yes

C122. ensuring that the public has access, in accordance with Article 12(c), to a wide range of information on tobacco industry activities relevant to the objectives of the Convention, such as in a public repository?

Yes

C123. Please provide details in the space below.

In addition to the safeguards provided by the collegiate character of the decision-making process in the Commission (see in this regard the Commission's internal Rules of Procedure and the Rules giving effect to them), the ethical and integrity rules (notably Staff Regulations, Code of Conduct for the Members of the European Commission and Code of Good Administrative Behaviour), as well as the rules on access to documents and on transparency regarding relations with interest representatives, constitute a framework which is consistent with the WHO Framework Convention on Tobacco Control (FCTC), and ensures that the FCTC is respected including its provision on protecting public health policies from commercial and other vested interests of the tobacco industry.

The Staff Regulations for officials of the European Union contain legally binding ethical standards and ensure that the principles of independence, impartiality, objectivity and loyalty are applied in the European Public Service. Notably the principle of independence guarantees that conduct and decision-making are determined by the need to serve the common good and the public interest, and never by any other interests.

As regards transparency, Regulation 1049/2001 on public access to documents is an important element, flanked by the other aspects of the Commission's transparency policy, such as the Transparency Register, and the proactive publication of information on meetings held by Commissioners, members of their cabinets and Directors-General with stakeholders. As of 1 December 2014, Commissioners, their Cabinet members and Directors General publish information on the meetings they hold with lobbyists. Moreover, they meet only with interest representatives whose organisations feature on the Transparency Register. As concerns other staff members, the Commission recommends to all staff to check the credentials of a given interest representative to make sure they are registered in the Transparency Register and, if they are not, encourage them to register. The Commission constantly promotes this "good practice" as part of its training and awareness-raising actions on relations with interest groups. Furthermore, the European Commission has endorsed the "Practical recommendations for public officials' interaction with interest representatives" issued by the European Ombudsman in May 2017 and has disseminated them internally.

C124. Please provide a brief description of the progress made in implementing Article 5.3 in the past two years or since submission of your last report.

C2. MEASURES RELATING TO THE REDUCTION OF DEMAND FOR TOBACCO

C2. With reference to Articles 6–14

C21. Price and tax measures to reduce the demand for tobacco Have you adopted and implemented, where appropriate, legislative, executive, administrative or other measures or have you implemented, where appropriate, programmes on any of the following:

C211. tax policies and, where appropriate, price policies on tobacco products so as to contribute to the health objectives aimed at reducing tobacco consumption?

Yes

C212. prohibiting or restricting, as appropriate, sales to international travellers of tax- and duty-free tobacco products?

No

C213. prohibiting or restricting, as appropriate, imports by international travellers of tax- and duty-free tobacco products?

Yes

C214. Please provide a brief description of the progress made in implementing Article 6 (Price and tax measures to reduce the demand for tobacco) in the past two years or since submission of your last report.

Please note that this reply only concerns action at EU level and that Member States are responsible for reflecting FCTC commitments in their national rates and legislation.

According to Directive 2011/64/EU, the overall minimum excise duty for cigarettes has been increased on 1 January 2014. The 9 Member States granted a transitional period have to comply with these minima from 1 January 2018. For fine cut tobacco, the overall minimum excise duty increased on 1 January 2018. An additional gradual increase of the rates for fine cut tobacco is foreseen for 1 January 2020.

The Commission decided to not propose a revision for Directive 2011/64/EU in 2017. The reasons for this are outlined in the Report 'COM(2018) 17'.

Moreover, the Commission decided to start the evaluation for the minimum rates. The evaluation roadmap for excise duties on tobacco provides more information on the ongoing evaluation and was published on 6 February 2018. The purpose of this evaluation is to analyse the effect of the minimum rates and structures of excise duty applied on manufactured tobacco. The evaluation will assess to which extent the current rates and structures helped and supported in (1) ensuring the proper functioning of the internal market (including competition), (2) providing a high level of health protection, (3) fighting against tax fraud, tax evasion and illegal cross border shopping. By also looking at heated tobacco products and e-cigarettes, the evaluation has the purpose to fill the information gaps in order to determine the correct harmonized approach for taxation of those products.

C215. Have you utilized the “Guidelines for implementation of Article 6 of the WHO FCTC” when developing or implementing policies in this area?

C227. Please provide a brief summary of complete and partial measures, with specific details of the partial measures that have been implemented:

C227a. Banning tobacco smoking in indoor workplaces
At EU level, a number of occupational health and safety Directives set out requirements covering most risks to workers health and safety, general risk prevention and some specific restrictions on smoking at the workplace. In addition, the Council Recommendation on smoke-free environments 2009/C 296/02 of 30 November 2009 calls on Member States to provide effective protection from exposure to tobacco smoke in indoor workplaces at the latest by 2012.

C227b. Banning tobacco smoking in public transport
The Council Recommendation on smoke-free environments 2009/C 296/02 of 30 November 2009 calls on Member States to provide effective protection from exposure to tobacco smoke in public transport as stipulated by Article 8 of the FCTC and based on guidelines on protection from exposure to tobacco smoke adopted by the COP2, at the latest by 2012.

C227c. Banning tobacco smoking in indoor public places
The Council Recommendation on smoke-free environments 2009/C 296/02 of 30 November 2009 calls on Member States to provide effective protection from exposure to tobacco smoke in indoor public places and, as appropriate, other public places as stipulated by Article 8 of the FCTC and based on guidelines on protection from exposure to tobacco smoke adopted by the COP2, at the latest by 2012.

C228. Please provide a brief description of the progress made in implementing Article 8 (Protection from exposure to tobacco smoke) in the past two years or since submission of your last report.

C229. Have you utilized the "Guidelines for implementation of Article 8 of the WHO FCTC" when developing or implementing policies in this area?

C23. Regulation of the contents of tobacco products Have you adopted and implemented, where appropriate, legislative, executive, administrative or other measures or have you implemented, where appropriate, programmes on any of the following:

C231. testing and measuring the contents of tobacco products?
Yes

C232. testing and measuring the emissions of tobacco products?
Yes

C233. regulating the contents of tobacco products?
Yes

C234. regulating the emissions of tobacco products?
Yes

C235. Please provide a brief description of the progress made in implementing Article 9 (Regulation of the contents of tobacco products) in the past two years or since submission of your last report.

Member States had to transpose the EU Tobacco Products Directive 2014/40/EU by May 2016. The Directive:

- prohibits cigarettes and roll-your-own tobacco with characterising flavours,
- sets maximum level for TNCO and how to measure it,
- requires the tobacco industry to submit detailed reports to the Member States on the ingredients used in tobacco products, and
- requires industry to carry out comprehensive studies of additives on a priority list.

The European Commission adopted implementing legislation that lays down more detailed technical rules in the area of ingredients regulation. These include:

- the reporting format for tobacco ingredients and emissions,
- the priority list of additives which warrant further examination, and
- the rules and mechanism for determining products with characterising flavours.

C236. Have you utilized the “Guidelines for implementation of Articles 9 and 10 of the WHO FCTC” when developing or implementing policies in this area?

Yes

C243. Please provide a brief description of the progress made in implementing Article 10 (Regulation of tobacco product disclosures) in the past two years or since submission of your last report.

In the area of ingredients reporting (i.e. disclosure), Directive 2014/40/EU foresees a common electronic format for the reporting of tobacco ingredients, including both tobacco leaf and ingredients, including additives.

For certain additives on a priority list, more in-depth studies and their disclosure is required by June 2018. The list of these additives (contained in cigarettes and roll-your-own tobacco) for which enhanced reporting obligations shall be set up by the Commission taking into account additives,

a) for which initial indications, research, or regulation in other jurisdictions exist suggest that they contribute to the toxicity or addictiveness of the products concerned, impart a characterising flavour; facilitate inhalation or nicotine uptake; or lead to the formation of substances that have CMR properties, and

b) which are amongst the most commonly used additives by weight or number.

The Directive also requires manufacturers and importers to submit internal and external studies available to them on market research and preferences of various consumer groups, including young people and current smokers, as well as executive summaries of any market surveys they carry out when launching new products. Manufacturers and importers are also required to report the sales volume data per product.

Member States shall ensure the submitted information is made publicly available on a website, taking into account the need to protect trade secrets.

C244. Have you utilized the "Guidelines for implementation of Articles 9 and 10 of the WHO FCTC" when developing or implementing policies in this area?

No

C2513[2]. requiring that each unit packet and package of tobacco products and any outside packaging and labelling of such products contain information on relevant: [emissions of tobacco products?]
Yes

C2514. requiring that the warnings and other textual information appear on each unit packet and package and on any outside packaging and labelling in the principal language or languages of the country?
Yes

C2515. Please provide a brief description of the progress made in implementing Article 11 (Packaging and labelling of tobacco products) in the past two years or since submission of your last report.
Directive 2014/40/EU governing the manufacture, presentation and sale of tobacco and related products entered into force on 20 May 2014. Member States have to transpose it by May 20, 2016.

The Directive requires that combined (picture and text) health warnings appear on packages of cigarette and roll-your-own tobacco packages covering 65% of the front and back. These shall be positioned at the top of the pack. The Directive replaces the information on TNCO with an information message that tobacco contains over 70 substances known to cause cancer.

The Directive also sets minimum dimensions for warnings and thus eliminates small packages for certain tobacco products. It also bans promotional and misleading elements on tobacco products.

The European Commission has also adopted two Implementing Decisions on the layout, design and shape of the combined health warnings for tobacco products for smoking and the precise position of the general warning and the information message on roll-your-own tobacco marketed in pouches.

C2516. Have you utilized the "Guidelines for implementation of Article 11 of the WHO FCTC" when developing or implementing policies in this area?
Yes

C2517. Please provide details in the space below or refer to section D of the additional questionnaire. Response to this question or to the additional questionnaire is voluntary. <https://extranet.who.int/dataform/655321?token={TOKEN}&lang=en>

C2518. If you have any other relevant information pertaining to or not covered in this section, please provide details in the space below.
Regarding point C2510, combined health warnings on packages of cigarettes and roll-your-own tobacco have become mandatory in all Member States from May 2016. A new library of health warnings has also been adopted under Directive 2014/40/EU and is available at https://ec.europa.eu/health/tobacco/law/pictorial_en.

C268. Please provide a brief description of the progress made in implementing Article 12 (Education, communication, training and public awareness) in the past two years or since submission of your last report.

The European Commission has promoted and financed EU-wide tobacco control and awareness-raising campaigns since 2002.

Since 2011 the Commission has taken a novel approach to help people stop smoking, with its campaign 'Ex-Smokers are Unstoppable'. The campaign does not just focus on the negative effects of smoking. Rather, it emphasises the benefits of quitting the habit and highlight the inspirational achievements of ex-smokers to motivate smokers to stop. The campaign use a coordinated mix of advertising, social media, events and an internet based interactive health tool ("iCoach"), to reach smokers. <http://www.exsmokers.eu/>. The campaign finished in July 2016 and it was recommended to be replaced by national initiatives.

Since 2015 the Commission has funded a project aiming to develop and implement an innovative and cost effective approach to prevent chronic diseases related to tobacco dependence. The specialized guidelines for high risks groups will be developed according to ENSP's evidence based and good practices in tobacco cessation and with ERS TCC scientific material on smoking health hazards. High risk populations are considered those who suffer from cardiovascular diseases, COPD, type 2 diabetes, adolescents & pregnant women.

The developed guidelines will contain strategies and recommendations designed to assist health professionals in delivering and supporting effective treatment of dependence on tobacco. Recommendations will be made as a result of scientific reviews and evidence of good practices from scientific groups that will consist of health professionals of different expertise.

Cross border advertising (radio, print, internet, sponsorship of events, TV and film) in the EU is banned by the Tobacco Advertising Directive 2003/33/EC and the Audiovisual Media Services Directive 2010/13/EU. In addition, Council Recommendation on the prevention of smoking and initiatives to improve tobacco control of 2002 recommends Member States to prohibit advertising at local/national level.
In line with its objective to monitor and assess the situation in the EU, the European Commission has published in 2016 a study assessing citizens' exposure to tobacco marketing in the EU (see summary of findings in chapter 5.8.: https://ec.europa.eu/health/sites/health/files/tobacco/docs/citizensexposure_tobaccomarketing_en.pdf)

C2813b. Please provide other details in the space below.

C2814. Please provide a brief description of the progress made in implementing Article 14 (Demand reduction measures concerning tobacco dependence and cessation) in the past two years or since submission of your last report.
Measures concerning tobacco dependence and cessation are a primary responsibility of the EU Member States.

While the EU provides the regulatory framework for the authorisation of medicinal products, the Member States decide about their accessibility e.g. the need for prescription, reimbursement status.

However, the EU supports Member States in their implementation of Article 14 of the FCTC. The Council Recommendation on smoke-free environments 2009/C 296/02 of 30 November 2009 calls on Member States to take effective measures to promote cessation of tobacco use and adequate treatment for tobacco dependence as outlined in Article 14 of the FCTC.

The EU Health Programme provided funding to projects related to cessation of tobacco use. Cessation was also one of the three themes of the EU media campaign "HELP - for a life without tobacco" targeted at young people. Cessation is also the theme of the latest media campaign - "Ex-smokers are unstoppable", see <http://www.exsmokers.eu/> . The Commission also funded the TOB-G project that aims to develop guidelines that will contain strategies and recommendations designed to assist health professionals in delivering and supporting effective treatment of dependence on tobacco.

In addition, information on cessation services are to be included in the graphic health warnings required on tobacco packages under Directive 2014/40/EU.

C3. MEASURES RELATING TO THE REDUCTION OF THE SUPPLY OF TOBACCO

C3. With reference to Articles 15-17

C31. Illicit trade in tobacco products Have you adopted and implemented, where appropriate, legislative, executive, administrative or other measures or have you implemented, where appropriate, programmes on any of the following:

C311. requiring marking of all unit packets and packages of tobacco products and any outside packaging of such products to assist in determining the origin of the product?
Yes

C312. requiring marking of all unit packets and packages of tobacco products and any outside packaging of such products to assist in determining whether the product is legally sold on the domestic market?
Yes

C313. requiring that unit packets and packages of tobacco products for retail and wholesale use that are sold on the domestic market carry the statement: "Sales only allowed in ..." or carry any other effective marking indicating the final destination of the product?
No

C314. developing a practical tracking and tracing regime that would further secure the distribution system and assist in the investigation of illicit trade?
Yes

C315. requiring that marking is presented in legible form and/or appears in the principal language or languages of the country?
Yes

C316. requiring the monitoring and collection of data on cross-border trade in tobacco products, including illicit trade?
Yes

C317. facilitating the exchange of this information among customs, tax and other authorities, as appropriate, and in accordance with national law and applicable bilateral and multilateral agreements?
Yes

C318. enacting or strengthening legislation, with appropriate penalties and remedies, against illicit trade in tobacco products, including counterfeit and contraband cigarettes?
Yes

C319. requiring that confiscated manufacturing equipment, counterfeit and contraband cigarettes and other tobacco products derived from illicit trade are destroyed, using environment-friendly methods where possible, or disposed of in accordance with national law?
N/A

C3110. adopting and implementing measures to monitor, document and control the storage and distribution of tobacco products held or moving under suspension of taxes or duties?
Yes

C3111. enabling the confiscation of proceeds derived from illicit trade in tobacco products?
N/A

C3112. promoting cooperation between national agencies and relevant regional and international intergovernmental organizations in investigations, prosecutions and proceedings, with a view to eliminating illicit trade in tobacco products, with special emphasis on cooperation at regional and subregional levels?
Yes

C3113. licensing or other actions to control or regulate production and distribution in order to prevent illicit trade?
Yes

C3114. Please provide a brief description of the progress made in implementing Article 15 (Illicit trade in tobacco products) in the past two years or since submission of your last report.
The European Union produced a progress report in May 2017 on its comprehensive strategy on "Stepping up the fight against cigarette smuggling and other forms of illicit trade in tobacco products"
https://ec.europa.eu/anti-fraud/sites/antifraud/files/tobacco_implementation_report_12052017_en.pdf
The EU Tobacco Products Directive 2014/40/EU introduced comprehensive rules on traceability and security features for tobacco products, to be applied to cigarettes and RYO from 20 May 2019 and to all other tobacco products from 20 May 2024. The provisions on traceability require all unit packets of tobacco products produced in, destined for or placed on the EU market to be marked with a unique identifier and their movements tracked and traced throughout the supply chain (from the manufacturer to the last level before the retail outlet). The provisions relating to security features require all unit packets of tobacco products placed on the EU market to carry a security feature to facilitate their authentication by consumers and authorities. The secondary legislation necessary to technically implement the systems of traceability and security features was adopted by the EU on 15 December 2017.
(See: https://ec.europa.eu/health/tobacco/tracking_tracing_system_en)
The implementation of the traceability system will enable the EU to meet many of the requirements under Article 15 of the FCTC (and aims in particular to meet the requirements of Article 8 of the FCTC Protocol to Eliminate Illicit Trade in Tobacco Products). The European Anti-Fraud Office (OLAF) and the Member States of the European Union hold open communication channels to discuss policy and investigative issues relating to illicit tobacco trade.
OLAF also organises an Expert Group on Fighting the Illicit Tobacco Trade. The Group aims to share operational expertise in view of policy reflections. Membership of this Expert Group is limited to representatives of EU Member States.

The European Commission has commissioned several studies to assist the implementation of the Tobacco Product Directive 2011/14/EU. These include:

- A study on the development of a EU common reporting format for submission of data on ingredients contained in tobacco and related products, and disclosure of the collected data to the public. See:

http://ec.europa.eu/health/tobacco/docs/reportingformat_dataingredients_en.pdf

-Proposals and technical specifications for the use of warning messages on tobacco packages. See:

The European Commission also regularly exchanges information on the ratification process of the FCTC Protocol with 3rd countries, whilst encouraging our key partners to join. Furthermore, The European Anti-Fraud Office (OLAF) and the Member States of the European Union hold open communication channels to discuss policy and investigative issues relating to illicit tobacco trade

C439. If you have any other relevant information pertaining to but not covered in this section, please provide details in the space below.

The European Commission's multiannual anti-fraud action Programme Hercule III entered into force in March 2014 and will make EUR 104.9 million available for the period 2014-2020 to finance concrete projects to support Member States in stamping out tobacco smuggling and other criminal activities.

Under the Hercule III work programme 2017, a tender is due to be launched for a study to identify an approach to measure the illicit market for tobacco products. This study aims to identify a robust, reliable and independent methodology to measure the illicit market for tobacco products that can be applied at national and EU level.

Also within the framework of Hercule III, on 30 June 2015 The European Anti-Fraud Office (OLAF) concluded an Administrative Arrangement (AA) with the Joint Research Centre – Institute for Reference Materials and Measurements (JRC-IRMM) on “Setting up a laboratory facility and associated data management for the independent analysis of tobacco products” (TOBLAB). This agreement has been renewed twice. The Laboratory offers EU Member States and OLAF opportunities to independently test cigarettes and other tobacco products in order to:

- track their geographical origin
- establish if they are counterfeit
- build a relevant database for sharing the results of analysis.

D8. Please provide information about any assistance provided or received in the space below.

D9. If you have not received or provided assistance in any of the aforementioned areas, please identify any financial or technical assistance that may be under consideration, if appropriate.

D10. Have you encouraged relevant regional and international intergovernmental organizations and financial and development institutions in which you are represented to provide financial assistance for developing country Parties and for Parties with economies in transition to assist them in meeting their obligations under the Convention?

Yes

D11. Please provide details in the space below.

The European Anti-Fraud Office (OLAF) funded a multisectoral, subregional workshop organised by the FCTC Secretariat for certain Parties to the FCTC which was held in Naypyitaw, Myanmar, from 9-11 December 2014. The objectives of the meeting were to raise awareness of the Protocol among different government sectors (including health, customs, justice, trade, law enforcement and finance), and to discuss specific technical requirements by each Party to ultimately promote the entry into force of the Protocol.

E. PRIORITIES AND COMMENTS

E1. What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction?

The Tobacco Products Directive, signed in April 2014, is an important step to implement the FCTC at EU level.

E2. Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control?

No

E3. Please provide details in the space below.

E4. What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?

E5[1]. Do you have any of the following products available on your national tobacco market? [smokeless tobacco products]

Yes

E5[2]. Do you have any of the following products available on your national tobacco market? [water pipe tobacco]

Yes

E5[3]. Do you have any of the following products available on your national tobacco market? [ENDS/ENNDS]

Yes

E5[other]. Do you have any of the following products available on your national tobacco market? [Other]

E6[1]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [smokeless tobacco products]

Yes

E6[2]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [water pipe tobacco]

Yes

E6[3]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [ENDS/ENNDS]

Yes

E6[other]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [Other]

E7. If you have any relevant information related to questions E5 and E6, please provide details in the space below.

Directive 2014/40/EU regulates smokeless tobacco products, water-pipe tobacco and electronic cigarettes.

E8. Please provide any other relevant information not covered elsewhere that you consider important.

The European Union (EU), is a Party to the FCTC since 30 June 2005. Due to its nature as a regional economic integration organisation, the EU only reports on matters which are regulated at EU level, on non-binding EU recommendations, on activities carried out at EU level or on data which have been collected at EU level. EU legislation exists for example on tobacco product regulation, tobacco advertising and tobacco excise duties. Other areas, for example smoke free environments, cessation aids, education, fall mainly into the responsibility of the individual EU Member States, which are Parties to the FCTC, and are reported by them.

E9. Your suggestions for further development and revision of the reporting instrument:
