## B2-B9. HEALTH, SOCIAL AND ECONOMIC INDICATORS

B2. Exposure to tobacco smoke

B21. Do you have any data on exposure to tobacco smoke in your population?

Yes

B22. Please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).

EXPOSICIÓN AMBIENTAL A HUMO DE TABACO EN TEGUCIGALPA.

Autores: Ana Navas Acien. Claudia Deyanira Gómez Mass. Victoria Durón H. Enio Alvarenga Chinchilla. / Con el apoyo de la OPS y del IHADFA llevaron a cabo dicho estudio en el año 2005 siendo los principales hallazgos los siguientes:

Los niveles encontrados para el conjunto de la ciudad pueden clasificarse como bajos-moderados. Sin embargo, se detectó exposición a humo de tabaco en lugares en los que está prohibido fumar como el aeropuerto o la oficina gubernamental y el nivel de exposición llega a alto o muy alto en los restaurantes y bares. La detección de nicotina en el ambiente indica que existe exposición a los productos tóxicos y carcinógenos que se encuentran en el humo del tabaco. A pesar de haber utilizado un muestreo de conveniencia, se intentó abarcar lugares muy diversos de toda la ciudad, así como niveles socioeconómicos muy diferentes, por lo que podemos pensar que estos resultados reflejan la situación de exposición a humo de tabaco en Tegucigalpa y evaluar la situación de humo ambiental de tabaco para el conjunto de la ciudad. A continuación se presenta la discusión para cada tipo de institución:

En promedio en el hospital, los niveles, son en general prácticamente nulos, e inferiores a los encontrados en hospitales similares de otros países, como por ejemplo en el caso de Uruguay (12) donde se evidenció exposición a humo de tabaco en todos los lugares monitorizados en el hospital objeto de estudio<sup>9</sup>. Sin embargo, se detectó nicotina en algunas salas, fundamentalmente de personal médico. Es por lo tanto prioritario fortalecer programas de ambientes libres de humo que involucren a los profesionales sanitarios. Es importante que los profesionales de la salud tomen la iniciativa con el fin de poder conseguir un hospital 100% libre de humo en un futuro muy próximo. En este sentido es muy positivo el hecho de que el 80% de las personas encuestadas en el hospital estarían de acuerdo en convertir el hospital en un lugar libre de humo. En los colegios, los niveles encontrados son prácticamente nulos, y en general, pueden considerarse libres de humo. Los niveles de exposición a humo de tabaco en la oficina de gobierno son moderados. En la misma está prohibido fumar, sin embargo, es prioritario hacer un esfuerzo con el fin de reducir la presencia de humo en lugares como los baños, los pasillos y escaleras y poder conseguir, para el caso, en un futuro próximo la municipalidad sea un lugar completamente libre de humo.

Los edificios de gobierno, deben servir de ejemplo para otros centros de trabajo. 4. En el aeropuerto se encontraron niveles moderados-altos de nicotina, incluidas las salas en las que está prohibido fumar. Esto puede indicar que no se respetan las normas o que la separación entre salas de fumadores y de no fumadores no es adecuada y no protege a los no fumadores de los riesgos derivados del tabaquismo pasivo. 5. La exposición a humo de tabaco en restaurantes y bares es alta o muy alta. Los niveles encontrados son muy similares a los referidos en estudios realizados en otros países de América Latina. Los niveles de exposición en restaurantes y bares suponen especialmente un riesgo para las personas que ahí trabajan y que están expuestas de forma crónica al humo de tabaco. Los niveles recogidos en las zonas de no fumadores adyacentes a zonas de fumadores demuestran la ineficacia de esta medida si no existe separación total de las zonas. Sin embargo, los niveles encontrados en un restaurante en el que está prohibido fumar en todo el espacio indican que es posible reducir el nivel de exposición a humo de tabaco en los restaurantes hasta niveles prácticamente nulos y proteger a los clientes y trabajadores de los riesgos del tabaquismo pasivo.

B3. Tobacco-related mortality

B31. Do you have information on tobacco-related mortality in your population?

No

B32. What is the estimated total number of deaths attributable to tobacco use in your population?

B33. If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction.

Honduras no dispone de datos de mortalidad atribuibles a enfermedades generadas por el tabaquismo, por lo que se imposibilita hacer un análisis de tendencias. Sin embargo presentamos algunos datos de interés.

D7. Please identify the Party or Parties from which assistance was received or to which assistance was provided.

El IHADFA ha recibido de parte de la OPS-OMS materiales bibliográficos de apoyo para la elaboración de la Ley Especial para el Control del Tabaco y su Reglamentación. Adicionalmente le han sido muy útiles las leyes y reglamentos sobre dicha temática de los países de Uruguay, Guatemala y México. Hemos compartido nuestra Ley Especial para el Control del Tabaco y su Reglamentación con la República de Costa Rica mediante la Embajada de Honduras acreditada en dicho país.

D8. Please provide information about any assistance provided or received in the space below.

Asistencia técnica de la OPS-OMS.

D9. If you have not received or provided assistance in any of the aforementioned areas, please identify any financial or technical assistance that may be under consideration, if appropriate.

Honduras requiere de asistencia técnica y financiera permanente para la aplicación del CMCT de la OMS en materia de incidencia y cabildeo para el aumento de precios e impuestos a productos derivados de tabaco. Se requiere asistencia técnica y financiera para la aplicación de la encuesta nacional sobre la prevalencia del consumo de tabaco en la población en general incluyendo grupos étnicos. Se requiere asistencia técnica y financiera para el seguimiento del tabaco ilícito a nivel nacional y su comunicación y procedimientos administrativos y penales entre los países fronterizos de Honduras como ser Nicaragua, El Salvador, Guatemala y Belice.

D10. Have you encouraged relevant regional and international intergovernmental organizations and financial and development institutions in which you are represented to provide financial assistance for developing country Parties and for Parties with economies in transition to assist them in meeting their obligations under the Convention?

Yes

D11. Please provide details in the space below.

Se ha solicitado asistencia financiera a la Conferencia de las Partes del CMCT de la OMS y queremos decirles que Honduras les espera con los brazos abiertos para que juntos alcancemos el mas alto cumplimiento del CMCT en nuestra nación y que no digamos que lo hicimos solos sino que juntos porque juntos somos capaces de alcanzar nobles ideales para una vida mejor.

## E. PRIORITIES AND COMMENTS

E1. What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction?

Las prioridades en la aplicación del Convenio Marco de la OMS en Honduras es en: 1) en materia de incidencia y cabildeo para el aumento de precios e impuestos a productos derivados de tabaco. 2) la aplicación de la encuesta nacional sobre la prevalencia del consumo de tabaco en la población en general incluyendo grupos étnicos. 3) El seguimiento del tabaco ilícito a nivel nacional y su comunicación y procedimientos administrativos y penales entre los países fronterizos de Honduras como ser Nicaragua, El Salvador, Guatemala y Belice.

E2. Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control?

Yes

E3. Please provide details in the space below.

El presupuesto asignado por el Congreso Nacional al IHADFA es insuficiente para la vigilancia del cumplimiento de la Ley Especial para el Control del Tabaco, por lo que urge que el mismo Congreso Nacional apruebe los 10 millones de Lempiras anuales que establece dicha Ley para eficientar dicha normativa a nivel nacional.

El presupuesto del IHADFA no es incrementado anualmente por el Congreso Nacional tal como lo indica la Ley Especial para el Control del Tabaco y su Reglamentación lo cual repercute en la aplicación del CMCT de la OMS.

E4. What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?

La falta de un trabajo interinstitucional coordinado en base a la aplicación de la Ley por parte de otras instituciones tanto del Estado como del apoyo y acompañamiento de las ONGs

La falta de personal capacitado para llevar a cabo las funciones de inspección en coordinación con las Alcaldías Municipales del país.
