C22. Protection from exposure to tobacco smoke Have you adopted and implemented, where appropriate, legislative, executive, administrative or other measures or have you implemented, where appropriate, programmes on any of the following:

C221. banning tobacco smoking in indoor workplaces, public transport, indoor public places and, as appropriate, other public places ?  
Yes

C222[1]. What is the type/nature of the measure providing for the ban? [national law]  
Yes

C222[2]. What is the type/nature of the measure providing for the ban? [subnational law(s)]

C222[3]. What is the type/nature of the measure providing for the ban? [administrative and executive orders]

C222[4]. What is the type/nature of the measure providing for the ban? [voluntary agreements]

C222[5]. What is the type/nature of the measure providing for the ban? [other measures (please specify in C223 below)]

C223. Please provide a brief explanation of the type/nature and content of the measures providing for the ban.  
Implementing Article 8 of the FCTC, in order to protect public health against adverse health effect of tobacco, especially protection against exposure to tobacco products imposed, necessary regulation considered in Article 7 of the executive bylaw of the national tobacco control law. Based on this article, consumption of tobacco in public places is banned. Article 13 of the national tobacco control law also prohibited smoking tobacco products in the places stipulated in Article 18 of the Probing Administrative Offences Act [all government employees' offences are addressed by this Act].

C224. Do any of these measures provide for a mechanism/ infrastructure for enforcement?  
Yes

C225. Please provide details of this system.

Due to lack of administrative infrastructure needed on how to deal with individual offenses in public places (except government buildings), in accordance with Article 8 of the executive bylaw of the national tobacco control law, the responsibility to implement the smoking ban in public places and other places mentioned in the law, is settled on managers or employers of these places. Accordingly, officers, employers and public authorities are required to install the warning signs banning the consumption of tobacco products in public places in the proper sight of these places and doing necessary actions to implement restricting regulations and protect their clients against exposure to second hand tobacco smoke.

Definition of public places covered by the regulations is given in item 8 of Article 1 of the executive bylaw of the national tobacco control law. It is worth noting the criteria of the provisions of this Convention, had stipulated in amended Article 13 of the eatable, drinkable, cosmetics and healthy substances' Act in 2000, years before entering into force the treaty. Under these regulations, all operators must abide by the requirements of banning smoking in public places by employees, workers and their clients. Fortunately, there is environmental health inspection system in the countrys health network which synergies effective implementation of these regulations as well as other provisions which are related to control tobacco products' distribution and supply system.

Supervising the accurate enforcement of national regulations, environmental health inspectors in the Ministry of health by close collaboration with the police and the judicial system followed any violations in this regard. Since part of the foodstuff centers like supermarkets and grocery stores have been determined as tobacco sales agents based on the HQ'S decision (Appendix II) , environmental health inspectors in addition to their duties on monitoring and observance of regulations relating to the sale and distribution of foodstuffs also do the necessary monitoring on supply of tobacco products in these places. Smoking ban by operators and workers during the work covered by these regulations, banning the sale and supply of cigarettes in workshops, factories, premises, facilities and locations subject to this bylaw, except premises, facilities and sites that are licensed, prohibition against selling cigarettes to people younger than 18 years, banning smoking in any public areas of workshops and factories, requirement to install warning signs in appropriate locations and at sight by the operators, managers or employers subject to this bylaw, including locations mentioned in these regulations are relevant regulations which environmental health inspectors always supervise and monitor them during their work time.

Article 18 of the Act requires the Iran Tobacco Company to comply with the national standards in production and supply of tobacco products. The Iran Standard and Research Institute (ISRI) developed 57 standards for tobacco products in accordance with the relevant ISO standards and required testing for tar, nicotine, carbon monoxide, alkaloids and nitrate. These tests have been agreed with Iran Tobacco Company. Due to lack of laboratory facilities for the testing of tobacco products in ISRI and the Ministry of Health and Medical Education, the testing of tobacco products is carried out either in the laboratory of the Iran Tobacco Company or in a foreign laboratory chosen by the industry. 17

The Bylaw in its Article 22 mandates the Ministry of Health and Medical Education to provide the necessary facilities and laboratory equipment for the assessment of the materials and compounds contained in and emitted by tobacco products. Due to the current sanctions against I.R. Iran, access to sophisticated laboratory equipment causes problems in equipping reference laboratories for the Ministry of Health and Medical Education.

The Conference of the Parties at its fourth and fifth sessions adopted partial guidelines for the implementation of Articles 9 and 10 of the Convention, which Parties can use to develop their own regulations and standards.
