Yes

B22. Please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).

La exposición a humo de tabaco de segunda mano, entre los que trabajan en lugares interiores o en áreas cerradas, la prevalencia es de 15.2% (, entre los adultos que visitaron varios lugares públicos en los últimos 30 días, la exposición al humo de tabaco fue de 52.8% en bares y discotecas, 31.9% en los restaurantes, 26.0% en el transporte público, 25.4% en las escuelas.

B3. Tobacco-related mortality

B31. Do you have information on tobacco-related mortality in your population?

Yes

B32. What is the estimated total number of deaths attributable to tobacco use in your population?

43246.0000000000

B33. If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction.

El impacto de la adicción al tabaco en la mortalidad varía según la patología que se considere. El 13% de las muertes cardiovasculares y el 9% de las producidas por Accidentes Cerebrovasculares (ACV) son atribuibles al tabaquismo (fracción atribuible). Estos porcentajes son mucho más elevados en patologías respiratorias como es el caso del EPOC donde el tabaquismo es responsable del 69% de las muertes y en cáncer de pulmón donde su asociación fue del 72%. El tabaco es responsable también del 13% de las neumonías y del 20% de las muertes por otros cánceres.

B4. Tobacco-related costs

B41. Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society?

Yes

B42. Please provide details (e.g. direct (health care-related) and indirect costs and, if possible, the method used to estimate these costs).

Las enfermedades relacionadas con el tabaco en México representan un costo anual de MXN 179,149,858,550 del cual el 34% (MXN 61,252,296,177) es atribuible en forma directa al tabaquismo. Este costo es mucho más elevado en hombres donde alcanza los MXN 49,968,583,087 mientras que en las mujeres es de MXN 11,445,440,232. Los principales determinantes de este alto costo fueron: las enfermedades cardíacas por su alta prevalencia, y los cánceres, principalmente el de pulmón y el EPOC por su alta fracción atribuible y alto costo de tratamiento

B84. Please briefly describe the trends in taxation for tobacco products in the past two years or since submission of your last report in your jurisdiction.

La carga del IEPS de tabacos labrados se ha incrementado significativamente a los largo de los últimos 14 años, desde 2004, siendo el último ajuste en 2011.

• En 2007 la tasa ad valorem aumentó de 110 a 140%; y 10 puntos porcentuales en cada uno de los años siguientes, para ubicarse en 160% a partir de 2009.

• En 2010 se incorporó una cuota específica de 80 centavos por cajetilla de 20 unidades; la cual se incrementó a \$7 por cajetilla de 20 unidades a partir de 2011.

El 27 de febrero de 2014 el Gobierno Federal en México suscribió un Acuerdo de Certidumbre Tributaria, con el cual se establecieron tres directrices principales: 1) No proponer nuevos impuestos; 2) No aumentar las tasas de los impuestos existentes y 3) No reducir o eliminar los beneficios fiscales ni las exenciones existentes. Por lo tanto, la carga fiscal sobre los productos del tabaco no se ha incrementado.

B85. Do you earmark any percentage of your taxation income for funding any national plan or strategy on tobacco control in your jurisdiction?

Yes

C112. Have you partially developed and implemented tobacco control strategies by including tobacco control in national health, public health or health promotion strategies, plans and programmes?

N/A

C113. Is any aspect of tobacco control that is referred to in the Convention included in any national strategy, plan or programme?

C115. Please provide details (e.g. the nature of the national coordinating mechanism, the institution to which the focal point for tobacco control or the tobacco control unit belongs).

La Secretaría de Salud mediante la Comisión Nacional contra las Adicciones dispuso en 2008 la apertura de la Oficina Nacional para el Control del Tabaco, instancia responsable a nivel federal, entre otras, del seguimiento a la implementación de la LGCT y del Convenio Marco para el control de Tabaco.

Esta oficina es además el punto focal para el CMCT.

También es responsable de coordinar las acciones para la elaboración e integración del Programa Nacional contra el Tabaquismo.

Elabora también la normatividad correspondientes a las acciones de prevención y atención del consumo de tabaco.

Impulsa desde el ámbito de sus atribuciones el fortalecimiento de la normatividad nacional y regional para el control del tabaco.

Coordina las acciones para la elaboración técnica del acuerdo por el que se implementan las advertencias y mensajes sanitarios en los empaques de los productos de tabaco.

C116. Please provide a brief description of the progress made in implementing Article 5.1 and 5.2 (General obligations) in the past two years or since submission of your last report.

En el terreno del legislativo, no se ha concretado ninguna reforma a la Ley general para el control del Tabaco, en busca de alcanzar los objetivos del CMCT. Las principales medidas del MPOWER que se sostienen en esta ley general, son parciales, es decir que no cumplen la totalidad de lo dispuesto en el CMCT y en sus directrices.

Asimismo, durante el periodo a nivel de leyes subnacionales, no hubo modificaciones en correspondencia con el CMCT.

C2814. Please provide a brief description of the progress made in implementing Article 14 (Demand reduction measures concerning tobacco dependence and cessation) in the past two years or since submission of your last report.

Como parte de las acciones para la cesación del consumo de tabaco y del cumplimiento del Art. 14 del CMCT, en 2016, se presentaron los resultados del cuestionario diagnóstico de los Servicios de Cesación en México. El levantamiento de la información se llevó a cabo mediante un trabajo interinstitucional, con la participación de representantes de las principales instancias del Sistema Nacional de Salud Pública y organizaciones especializadas en tabaco de la sociedad civil (IMSS, ISSSTE, INCan, INER, HGM, CIJ, PEMEX, IPN, UNAM, SEDENA, FIC MÉXICO, ALIENTO, la clínica GRACIAS, NO FUMO, Aída Isibasi de Hodggers y CONADIC).

El cuestionario fue validado por la OMS, y fue enviado a cada una de las instituciones para ser contestado. Los principales resultados señalaron que nuestro país cuenta con amplia infraestructura de servicios de salud para apoyar el abandono al consumo de tabaco, sin embargo, se vio necesario fortalecer el primer nivel de atención en salud a fin de coadyuvar en la referencia de los usuarios que consumen tabaco y requieren de un tratamiento o intervención.

Derivado de los resultados obtenidos en dicho diagnóstico, se identificó la necesidad de fortalecer el primer nivel de atención en salud. Para cubrir dicho objetivo, se desarrolló el estándar de competencias en proporcionar consejo breve para la cesación del consumo de alcohol y tabaco, el cual fue publicado el pasado 14 de julio de 2017 en el Diario Oficial de la Federación (DOF) (puede consultarse en: [http://www.conocer.gov.mx/contenido/publicaciones\\_dof/2017/EC0897.pdf](http://www.conocer.gov.mx/contenido/publicaciones_dof/2017/EC0897.pdf))

El estándar de competencias se trabajó de manera colegiada con expertos en consejo breve de diversas instituciones (ISSSTE, INER, FP-UNAM, INPRF, HGM, FM-UNAM, CONOCER e IMSS), el cual tiene como objetivo capacitar y evaluar al personal del primer nivel de atención en salud.

A través de este estándar, se pretende que los médicos, psicólogos, enfermeras, odontólogos, educadores para la salud, entre otros, puedan otorgar un consejo breve a través de identificar en el consumo de alcohol y tabaco con un breve instrumento, posteriormente aconsejar a las personas que consuman alcohol y/o tabaco sobre las consecuencias del consumo, de las alternativas y ventajas de la cesación y de considerarlo conveniente proporcionar orientación y alternativas de atención al usuario de los servicios de salud que consume alcohol y/o tabaco.

Con el objetivo de promover la homologación de los servicios de cesación del consumo de tabaco del Sistema Nacional de Salud y dar cumplimiento a lo dispuesto en la Norma Oficial Mexicana NOM-028-SSA2-2009, para la prevención, tratamiento y control de las adicciones se desarrollaron los Lineamientos para el Funcionamiento de los Servicios para la Cesación del Consumo de Tabaco, mismos que pretenden garantizar servicios de calidad para los usuarios que consumen tabaco.

Los lineamientos fueron desarrollados por CONADIC, en coordinación con expertos en tratamiento para la cesación del consumo de tabaco, de los Centros de Integración Juvenil, A.C. (CIJ), del Instituto Mexicano del Seguro Social (IMSS), del Instituto de Seguridad y Servicios Sociales de los Trabajadores del Estado (ISSSTE), de la Universidad Nacional Autónoma de México, Facultad de Medicina (UNAM-FM), del Hospital General de México "Dr. Eduardo Liceaga" (HGM), del Instituto Nacional de Enfermedades Respiratorias (INER), del Instituto Nacional de Cancerología (INCan), así como con representantes de la Sociedad Civil, de la Fundación Interamericana del Corazón, A. C., México (FIC-M) y de Alianza Nacional para el Control del Tabaco, A. C.

Los lineamientos muestran las modalidades de atención que están validadas así como los requerimientos para brindar consejo breve, los requerimientos para brindar tratamiento profesional y de los requisitos para las clínicas de cesación del consumo de tabaco, así como de los criterios para la confidencialidad, seguimiento y egreso y especificaciones de los métodos alternativos.
