Yes

C223. Please provide a brief explanation of the type/nature and content of the measures providing for the ban.  
The "Control of smoking and consumption of tobacco product law" was enacted in 2006 and came into effect in 2007. The law defines the totally smoke-free area and the limited area with designated smoking place. The totally smoke-free area includes the health facilities, the educational institutions, the play grounds, sports stadiums, the public transport and indoor public places. But, the designated smoking room should be kept at public transport like trains, public transport ports and terminals, government offices and industries according to the law.  
In 2011, the President's office made the direction that all government offices' buildings and compounds must be tobacco-free. According to the law, the Ministry of Health is authorized to adopt the necessary orders and notifications. The notifications regarding the sign and warning to be kept at no-smoking area and designated smoking area were developed and adopted by Ministry of Health in March, 2014. According to that notification, the designated smoking area must be defined at outside area, at least 10 meters away from the main entrance and the windows of the building, ensuring that all the indoor places are smoke-free.

C224. Do any of these measures provide for a mechanism/ infrastructure for enforcement?  
Yes

C225. Please provide details of this system.  
The "Control of smoking and consumption of tobacco product law" defines the penalties for offences, and Myanmar police force as the law enforcer.  
According to that law, the government had established a multi-sectoral central tobacco control committee for providing guidance and making policy for effective tobacco control in Myanmar. The law defines the roles and responsibilities of the central tobacco control committee, including the establishment of the supervisory committees at State/Regional, District and Township level and defining their respective roles and responsibilities.  
Regarding the smoke-free area, the respective administrator or owner of the area or building or office is the responsible person for monitoring and taking action for violations.  
The Law also defines the roles and responsibilities of Ministry of Health and give the authority for adopting the notifications and regulations as necessary for effective tobacco control.
