The Netherlands also regulate the content of electronic cigarettes / e-liquids with nicotine. And will regulate this for electronic cigarettes / e-liquids without nicotine

The Netherlands asked the European Commission to take action to improve the European Tobacco Products Directive with respect to the measurements of TNCO contents of cigarettes. The ISO method that is currently used underestimates the quantity of harmful substances to which smokers are exposed. There is a better method; the Canadian Intense (CI) method for example provides a more suitable alternative, closer to human smoking behavior and not susceptible to changes in filter ventilation, as the ventilation holes in the filter are taped and inhalation is deeper and more frequent.
