individuo que declara que no fuma en el momento actual y no ha fumado nunca de manera habitual
B115. Please provide a brief explanation of the trend in smoking prevalence in the adult population in the past two years or since submission of your last report.
<p>No se disponen de nuevos datos en este punto respecto al anterior informe. La última encuesta disponible es la Encuesta Europea de Salud en España de 2014.</p> <p>En 2014 se observa una reducción global de la prevalencia de fumadores actuales de dos puntos porcentuales (25,4% en 2014 frente al 27% de 2011), disminución algo inferior que en periodos anteriores. En hombres, con consumo de tabaco más elevado tradicionalmente y al contrario que en el periodo anterior, la reducción de la prevalencia ha sido menor proporcionalmente (del 31,4% en 2011 al 30,4% en 2014). En mujeres, esta reducción del consumo actual ha sido mayor (del 22,8% en 2011 al 20,5% de 2014).</p> <p>De forma similar ocurre con la prevalencia de fumadores diarios, donde se ha dado una reducción global del 24% de 2011 al 23% de 2014, también más elevada en mujeres que en hombres.</p> <p>La prevalencia de fumadores ocasionales ha disminuido ligeramente, de forma similar en ambos sexos.</p> <p>El porcentaje de exfumadores ha aumentado en el periodo 2011-2014 en seis puntos porcentuales, en ambos sexos, aunque proporcionalmente más en mujeres. Consecuentemente, se observa una mayor tasa de abandono (exfumadores/fumadores +exfumadores) en 2014 respecto al periodo anterior.</p> <p>La prevalencia de personas que no han fumado nunca es del 49% en 2014, dándose una reducción respecto a 2011(53,5%), disminución similar en ambos sexos.</p> <p>La media de cigarrillos consumidos al día por fumadores diarios se ha reducido ligeramente a nivel global (de 13,8 a 13,2 cigarrillos/día entre 2011 y 2014 respectivamente), el descenso ha sido proporcionalmente mayor en hombres.</p>

B123. Please provide a brief explanation of the trend in current smoking prevalence by age group in the past two years or since submission of your last report, if data are available.

No se disponen de nuevos datos en este punto respecto al anterior informe. La última encuesta disponible es la Encuesta Europea de Salud en España de 2014.

A nivel global se ha dado una reducción de la prevalencia de consumo de tabaco en todos los grupos de edad hasta los 54 años, sobre todo en mujeres.

El grupo que ha presentado una mayor disminución de los fumadores actuales ha sido el de adultos jóvenes de 15 a 24 años (reducción global del 5%), siendo mayor en mujeres (disminución del 7%, pasando de 24,9% al 17,8%) que en hombres (reducción del 3%, de 27,8% a 25,1%).

El consumo ha aumentado ligeramente a partir de los 55 años de edad, afectado por el aumento en la prevalencia en mujeres en esos grupos, especialmente de 55 a 64 años.

En hombres, la reducción ha sido general, siendo especialmente alta en el grupo de 15 a 24 años, se ha dado un ligero aumento en los grupos de 35-44 y de 55-64 años.

En mujeres, destaca la disminución de la prevalencia de consumo en todos los grupos hasta los 54 años, especialmente de 15-24 años. A partir de los 55 años se observa un aumento de la prevalencia, especialmente en el grupo de 55 a 64 años (aumento del 3,9%, pasando del 18% al 21,9%).

Consumo de tabaco para fumar en los últimos 12 meses

B164. Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.

Se presentan y comentan los datos de las dos últimas encuestas ESTUDES publicadas, de los años 2012 a 2016.

La progresión de la prevalencia de consumo en este periodo ha presentado una tendencia estable con repuntes específicos en algunas ediciones (2012 y 2014).

La prevalencia de consumo de tabaco siempre es superior en las mujeres en los 4 indicadores temporales (diario, en los últimos 30 días, en los últimos 12 meses y alguna vez en la vida) y entre los más mayores (17 y 18 años).

El consumo diario entre los jóvenes aumentó en 2012 al 12,5% (12% en hombres y 13,5% en mujeres) y posteriormente volvió a disminuir notablemente en 2014 (al 8,9%), manteniéndose estable en 2016.

B2. Exposure to tobacco smoke

B21. Do you have any data on exposure to tobacco smoke in your population?

Yes

B22. Please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).

EXPOSICIÓN AL HUMO DE TABACO EN LUGARES CERRADOS

Distribución porcentual según sexo y grupo de edad (Población de 15 y más años)

TABLAS COMPLETAS EN DOCUMENTACIÓN ADJUNTA

A diferencia de los datos aportados en periodos anteriores, la EESE2014 sólo recoge una pregunta sobre exposición al humo: ¿Con qué frecuencia está expuesto/a al humo del tabaco en lugares cerrados? referida a la exposición al humo del tabaco en casa, en el trabajo, lugares públicos, restaurantes...

Esto dificulta la comparación directa con los datos de las encuestas anteriores.

Por otro lado, la EESE 2014 sólo incluye población de 15 y más años, por lo que no podemos disponer de información sobre la exposición en menores de esta edad.

Comparando con los datos previos (Encuesta Nacional de Salud en España 2011), en 2014 se observa cierta disminución de la exposición. Así, la exposición al humo en sitios cerrados habría pasado del 10,8% en 2011 al 8,1% en 2014. Esta reducción se observa en ambos sexos. Se debe tener en cuenta que la recogida de esta variable ha cambiado y podrían no ser completamente equivalentes.

La reducción más destacada en la exposición al humo de tabaco se dio tras el cambio legislativo introducido en 2011, especialmente en los espacios y transportes públicos cerrados y el lugar de trabajo, áreas reguladas por la ley.

B3. Tobacco-related mortality

B31. Do you have information on tobacco-related mortality in your population?
Yes

B32. What is the estimated total number of deaths attributable to tobacco use in your population?
21270.0000000000

B33. If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction.

A efectos de comparación con el periodo anterior, se han considerado MUERTES ATRIBUIBLES AL CONSUMO DE TABACO las defunciones por CÁNCER PULMÓN (ya que el 90% se deben al tabaquismo), obtenidas del informe de Patrones de mortalidad en España, 2014. Por otro lado, se ha publicado el estudio “Impacto del consumo de tabaco sobre la mortalidad en España en el año 2012”, que incluye muertes por otras enfermedades atribuibles al tabaquismo y se comenta más adelante. Muertes atribuibles al tabaco (cáncer de pulmón): 21.270 muertes por cáncer de pulmón (17.212 en hombres y 4.058 en mujeres). La tasa de mortalidad ajustada por edad por cáncer de pulmón en 2014 fue de 31,8 muertes por 100.000 habitantes (55,8 en hombres y 11,8 en mujeres). En 2014 se produjeron 419 muertes por cáncer de pulmón menos que en 2013 y 241 menos que en 2012.

La evolución de las tasas de mortalidad ajustadas por edad muestra una diferente tendencia en hombres y mujeres. Entre 2001 y 2014, la tasa de mortalidad ajustada por edad por esta causa de muerte atribuible al tabaquismo ha descendido 19,9% en hombres, mientras que ha aumentado 71,0% en mujeres. Como consecuencia de esta diferente tendencia, la tasa de mortalidad ajustada por edad pasó de ser 10 veces más alta en hombres que en mujeres en 2001 a 4,7 veces más alta en 2014.

Por otro lado, considerar sólo las muertes por cáncer de pulmón podría infravalorar la mortalidad atribuible al consumo de tabaco. El estudio “Impacto del consumo de tabaco sobre la mortalidad en España en el año 2012” calcula la MORTALIDAD ATRIBUIBLE AL CONSUMO DE TABACO a partir de una metodología análoga a la de otros estudios: utilizando la estimación de la prevalencia de tabaquismo, la mortalidad en la población de 35 y más años, y los riesgos relativos de muerte para cada enfermedad relacionada (neoplasias, enfermedades cardiovasculares y enfermedades respiratorias), según sexo, obtenidos por Thun et al. (JAMA. 2000;284: 706-12), basados en el estudio Cancer Prevention Study II. Según esta investigación, el tabaquismo provocó 60.456 muertes en 2012 (45.669 muertes en hombres y 14.787 en mujeres) . El 15,23% de las muertes ocurridas en España en 2012 son atribuibles al consumo de tabaco. El cáncer de tráquea-bronquios-pulmón en varones y otras cardiopatías en mujeres fueron las que más contribuyeron a dicha mortalidad. Los años potenciales de vida perdidos fueron 184.426, y la media de años potenciales de vida perdidos fue de 3,25 años en varones y de 2,42 en mujeres.

Si consideramos todas las MUERTES RELACIONADAS CON EL TABACO: el informe Patrones de mortalidad en España incluye los siguiente códigos de la 10ª revisión de la CIE: C00-C14, cáncer de labio, cavidad bucal y faringe; C32, cáncer de laringe; C33-C34, cáncer de tráquea, bronquios y pulmón; C15, cáncer de esófago; I20-I25, enfermedad isquémica del corazón; I60-I69, enfermedades cerebrovasculares y J40-J47, enfermedades crónicas de las vías respiratorias inferiores.. Muertes relacionadas con el consumo de tabaco en 2014: 102.443 defunciones (63.859 en hombres y 38.584 en mujeres). La tasa de mortalidad ajustada por edad por muertes relacionadas con el consumo de tabaco en 2014 fue de 119,5 muertes por 100.000 habitantes (186,4 en hombres y 65,9 en mujeres). La tasa de mortalidad ajustada por edad por estas causas de muerte experimentó una reducción del 36,0% hombres y del 38,7% en mujeres entre 2001 y 2014. Sin embargo, este indicador sobrestima la importancia de este factor de riesgo en la mortalidad y dificulta la identificación de la tendencia de aquellas causas de muerte más fuertemente relacionadas con el consumo de tabaco.

B4. Tobacco-related costs

B41. Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society?
Yes

B42. Please provide details (e.g. direct (health care-related) and indirect costs and, if possible, the method used to estimate these costs).

Se analizaron 500 pacientes, el 50% fueron fumadores; 74% (372) hombres, 26% (128) mujeres. Los pacientes fumadores utilizaron más recursos sanitarios, consumieron más fármacos y tuvieron más días de baja laboral que los no fumadores. Los costes directos e indirectos en fumadores fueron respectivamente 848,64 euros (IQ 25-75: 332,65-1517,10) y 2.253,90 (IQ 25-75: 1.024,50-13.113,60); y en no fumadores 474,71 euros (IQ 25-75: 172,88-979,59) y 1.434,30 euros (IQ 25-75: 614,70-4.712,70); ser fumador incrementó más del doble la probabilidad de tener coste sanitario elevado (OR=2,14; IC 95%: 1,44-3,19).

El trabajo presenta algunas limitaciones que es necesario comentar. En primer lugar el hecho de realizarse en atención primaria podría ser una limitación, sin embargo, este ámbito permite extrapolar mejor los datos a población general lo que permite evaluar mejor los costes globales por tabaquismo. Otra posible limitación es la no inclusión de pacientes exfumadores.

B7. Tobacco-growing

B71. Is there any tobacco-growing in your jurisdiction?
Yes

B72. Please provide information on the number of workers involved in tobacco-growing. If available, please provide this figure broken down by gender.
Según los últimos datos de entregas, de 2016, en ese año cultivaron tabaco 1.542 productores.

Por otra parte, en 2015, el cultivo de tabaco generó, en 2015, 3.380 puestos de trabajo: 2.146 por efecto directo, 712 por efecto indirecto y 521 por efecto inducido.

No se cuenta con datos desglosados por sexo.

B73. Please provide, if available, the share of the value of tobacco leaf production in the national gross domestic product.
El aporte del valor de la producción de tabaco en rama al Producto Interior Bruto (PIB), es irrelevante.

Según datos de Eurostat y del Instituto Nacional Estadístico (INE), podemos estimar que, en 2016, el cultivo de tabaco en España aportó alrededor del 0,0056% al PIB.

Yes

C115. Please provide details (e.g. the nature of the national coordinating mechanism, the institution to which the focal point for tobacco control or the tobacco control unit belongs).

El Ministerio de Sanidad, Servicios Sociales e Igualdad es el departamento responsable de la regulación de los aspectos sanitarios del control del tabaquismo.

Existe en su estructura una Unidad de Prevención del Tabaquismo dependiente de la Dirección General de Salud Pública. Asimismo existe dependiendo de la misma Dirección General, una Comisión de Salud Pública para la coordinación con las Autoridades Sanitarias Regionales.

También existe dependiendo de la misma Dirección General, un Observatorio de la Salud como órgano colegiado de consulta y asesoramiento con una sección específica sobre tabaquismo. Asimismo también existe coordinación con otros departamentos ministeriales: Ministerio de Economía, Industria y Competitividad, Ministerio de Hacienda y Función Pública, Ministerio de Agricultura y Pesca, Alimentación y Medio Ambiente, Ministerio de Asuntos Exteriores y de Cooperación, Ministerio de Energía, Turismo y Agenda Digital y Ministerio de Empleo y Seguridad Social.

C116. Please provide a brief description of the progress made in implementing Article 5.1 and 5.2 (General obligations) in the past two years or since submission of your last report.

Aunque no hay una estrategia nacional específica, la prevención del tabaquismo se incluye en las Estrategias del Sistema Nacional de Salud (EPOC, Cáncer, Ictus, enfermedades cardiovasculares, enfermedades crónicas y diabetes). Además, existe una Estrategia de Promoción de la Salud y Prevención de la enfermedad en el Sistema Nacional de Salud. La estrategia incluye la prevención del tabaquismo como determinante de salud en las políticas de estilos de vida saludables, en colaboración con la administración regional y local para su implementación.

La legislación española dirige las actividades políticas y administrativas de forma que los intereses de los sectores no interfieran en las decisiones tomadas. En casos en los que el concurso de los sectores económicos sea necesario, se establece mediante acuerdos firmados o convenios que son documentos públicos, en virtud de la transparencia. En consecuencia, las actividades se ajustan a la directriz, y a su vez se tiene en cuenta la directriz a la hora de marcar las pautas de actuación. También se han utilizado en la elaboración de informes internos.

C227. Please provide a brief summary of complete and partial measures, with specific details of the partial measures that have been implemented:

C227a. Banning tobacco smoking in indoor workplaces

La Ley 28/2005 prohíbe fumar en centros de trabajo públicos y privados, salvo en los espacios al aire libre.

C227b. Banning tobacco smoking in public transport

La Ley 28/2005 prohíbe fumar en:

- los vehículos o medios de transporte colectivo urbano e interurbano, vehículos de transporte de empresa, taxis, ambulancias, funiculares y teleféricos,
- todos los espacios del transporte suburbano,
- los medios de transporte ferroviario y marítimo, salvo en los espacios al aire libre,
- las aeronaves con origen y destino en territorio nacional y en todos los vuelos de compañías aéreas españolas, incluidos aquellos compartidos con vuelos de compañías extranjeras.
- Puesto que los vehículos comerciales de uso laboral son un lugar de trabajo, dada la prohibición de fumar tabaco en lugares de trabajo interiores señalada en el punto anterior, está implícita la prohibición de fumar en los mismos (camiones, furgonetas de reparto, coches de empresa y demás similares).

C227c. Banning tobacco smoking in indoor public places

Está prohibido fumar en todos los espacios públicos cerrados:

- Centros y dependencias de las Administraciones públicas y entidades de Derecho público
- Centros, servicios o establecimientos sanitarios, así como en los espacios cubiertos comprendidos en sus recintos
- Centros docentes y formativos, incluyendo los accesos inmediatos a los edificios o aceras circundantes
- Instalaciones deportivas y lugares donde se desarrollen espectáculos públicos
- Zonas destinadas a la atención directa al público
- Centros comerciales, incluyendo grandes superficies y galerías
- Centros de atención social
- Centros de ocio o esparcimiento
- Centros culturales, salas de lectura, exposición, biblioteca, conferencias y museos
- Salas de fiesta, establecimientos de juego o de uso público en general
- Áreas o establecimientos donde se elaboren, transformen, preparen, degusten o vendan alimentos.
- Ascensores y elevadores
- Cabinas telefónicas, recintos de los cajeros automáticos y otros espacios cerrados de uso público de reducido tamaño. Se entiende por espacio de uso público de reducido tamaño aquel que no ocupe una extensión superior a cinco metros cuadrados.
- Estaciones de autobuses, vehículos o medios de transporte colectivo urbano e interurbano, vehículos de transporte de empresa, taxis, ambulancias, funiculares y teleféricos.
- Todos los espacios del transporte suburbano (vagones, andenes, pasillos, escaleras, estaciones, etc.)
- Estaciones, puertos y medios de transporte ferroviario y marítimo
- Aeropuertos, aeronaves con origen y destino en territorio nacional y en todos los vuelos de compañías aéreas españolas, incluidos aquellos compartidos con vuelos de compañías extranjeras
- Estaciones de servicio y similares
- Cualquier otro lugar en el que, por mandato de esta Ley o de otra norma o por decisión de su titular, se prohíba fumar.
- Hoteles, hostales y establecimientos análogos, salvo en los espacios al aire libre. No obstante, podrán habilitarse habitaciones fijas para fumadores, siempre que cumplan con los requisitos establecidos en el artículo 8.
- Bares, restaurantes y demás establecimientos de restauración cerrados.
- Salas de teatro, cine y otros espectáculos públicos que se realizan en espacios cerrados
- Recintos de los parques infantiles y áreas o zonas de juego para la infancia
- En todos los demás espacios cerrados de uso público o colectivo

C268. Please provide a brief description of the progress made in implementing Article 12 (Education, communication, training and public awareness) in the past two years or since submission of your last report.

LA ESTRATEGIA DE PROMOCIÓN DE LA SALUD Y PREVENCIÓN EN EL SISTEMA NACIONAL DE SALUD (SNS), en el marco del abordaje de la cronicidad en el SNS, recoge una serie de intervenciones para actuar sobre los principales determinantes y factores de riesgo de las enfermedades crónicas, como son el consumo de tabaco y de alcohol, el tipo de alimentación y la actividad física; introduciendo también el bienestar emocional.

1. Capacitación de la población: Web de Estilos de Vida Saludable, disponible desde noviembre de 2015. La sección de Prevención del Tabaquismo (<http://www.estilosdevidasaludable.msssi.gob.es/tabaco/home.htm>) recoge información sobre los riesgos para la salud del consumo y la exposición al humo de tabaco, así como los beneficios de abandonar el consumo, incluyendo el ahorro de gastos, ayuda para dejar de fumar y un apartado sobre las consecuencias de la producción y el consumo de tabaco en el medio ambiente y los derechos humanos (<http://www.estilosdevidasaludable.msssi.gob.es/tabaco/tabacoY/medioambiente/home.htm>). Está orientada a toda la población e incluye apartados específicos para distintos grupos de edad, embarazo, madres y padres, y salud mental, intentando reflejar las diferencias fundamentales entre los grupos de población destinatarios.

2. Capacitación de los profesionales sanitarios: Uno de los pilares fundamentales de la implementación de la Estrategia es el Consejo Integral sobre estilo de vida saludable en Atención Primaria vinculado a recursos comunitarios, donde se incluye la prevención del tabaquismo y la ayuda para dejar de fumar. Se ha desarrollado un proceso formativo on-line dirigido a todos los profesionales de Atención Primaria en metodología del cambio y Educación para la salud relacionada con un estilo de vida saludable, está acreditado y pretende ser un complemento de los programas formativos, que ya desarrollan las comunidades autónomas.

3. Implementación Local de la Estrategia: Se ha firmado un acuerdo de colaboración con la Federación Española de Municipios y Provincias, elaborado una guía y llevado a cabo distintas reuniones para priorizar las actividades dirigidas a mejorar las condiciones y oportunidades que fomentan estilos de vida saludables en las ciudades, entre las temáticas a abordar se incluye la prevención y control del consumo de tabaco. Dentro de dicha implementación local se ha elaborado un mapa de recursos para la salud de los municipios adheridos, donde se pueden consultar, entre otros, los recursos en prevención del tabaquismo a nivel local (<http://localizasalud.msssi.es/maparecursos/main/Menu.action>).

Por otro lado, dadas sus competencias en materia de prevención y control de tabaquismo, las distintas Comunidades Autónomas disponen de programas de educación, formación y concienciación

(<http://www.msssi.gob.es/ciudadanos/proteccionSalud/tabaco/ayudaCCAA.htm>).

En general, los planes regionales de prevención y control del tabaquismo se dirigen a los distintos grupos de edad y colectivos, abordando las diferencias de género y nivel socioeconómico, y otros grupos vulnerables, como la salud mental o población gitana, también disponen de formación dirigida a los profesionales sanitarios.

En relación con las preguntas C271 y C272:

- Las prohibiciones de publicidad tanto directa como indirecta y del patrocinio son totales y no contemplan excepciones. No obstante, en cuanto a la promoción, el artículo 9 de la Ley 28/2005, permite exclusivamente:

a) Las publicaciones destinadas exclusivamente a los profesionales que intervienen en el comercio del tabaco.
b) Las presentaciones de productos del tabaco a profesionales del sector en el marco de la Ley 13/1998, de 4 de mayo, de ordenación del mercado de tabacos y normativa tributaria, así como la promoción de dichos productos en las expendedorías de tabaco y timbre del Estado, siempre que no tenga como destinatarios a los menores de edad ni suponga la distribución gratuita de tabaco o de bienes y servicios relacionados exclusivamente con productos del tabaco o con el hábito de fumar o que lleven aparejados nombres, marcas, símbolos o cualesquiera otros signos distintivos que sean utilizados para los productos del tabaco. En todo caso, el valor o precio de los bienes o servicios citados no podrá ser superior al cinco por ciento del precio de los productos del tabaco que se pretenda promocionar.

En ningún caso, dichas actividades podrán realizarse en los escaparates ni extenderse fuera de dichos establecimientos, ni dirigirse al exterior.

c) Las publicaciones que contengan publicidad de productos del tabaco, editadas o impresas en países que no forman parte de la Unión Europea, siempre que dichas publicaciones no estén destinadas principalmente al mercado comunitario, salvo que estén dirigidas principalmente a los menores de edad.

- También se prohíbe, fuera de la red de expendedorías de tabaco y timbre del Estado, la distribución gratuita o promocional de productos, bienes o servicios o cualquier otra actuación, cuyo objetivo o efecto directo o indirecto, principal o secundario, sea la promoción de un producto del tabaco.

- La venta de productos de tabaco en España sólo se permite en expendedorías de tabaco y timbre (estancos) y a través de máquinas expendedoras cuya ubicación está regulada y controlada.

- En el interior de los estancos se permite la exposición de los productos de tabaco, pero no deben ser visibles desde el exterior.

- A pesar de que no están prohibidas las contribuciones de las empresas tabacaleras a cualquier otra entidad para "causas de interés social" y/o cualesquiera otras actividades realizadas por la industria del tabaco al amparo de la "responsabilidad social de la empresa", dichas contribuciones y/o actividades no pueden ser usadas como promoción, dado que está prohibida la publicidad indirecta.

C2814. Please provide a brief description of the progress made in implementing Article 14 (Demand reduction measures concerning tobacco dependence and cessation) in the past two years or since submission of your last report.

La ESTRATEGIA DE PROMOCIÓN DE LA SALUD Y PREVENCIÓN EN EL SISTEMA NACIONAL DE SALUD (SNS), en el marco del abordaje de la cronicidad en el SNS, recoge una serie de intervenciones para actuar sobre los principales determinantes y factores de riesgo de las enfermedades crónicas, como son el consumo de tabaco y de alcohol, el tipo de alimentación y la actividad física; introduciendo también el bienestar emocional.

1. Capacitación de la población: Web de Estilos de Vida Saludable, disponible desde noviembre de 2015. La sección de Prevención del Tabaquismo recoge también información y enlaces de interés sobre ayuda para dejar de fumar (<http://www.estilosdevidasaludable.msssi.gob.es/tabaco/ayuda/home.htm>).

También se han elaborado materiales dirigidos a población sobre consejos de salud en estilos de vida, incluido uno sobre consumo de tabaco que se facilitará en Atención Primaria.

2. Capacitación de los profesionales sanitarios: Uno de los pilares fundamentales de la implementación de la Estrategia es el Consejo Integral sobre estilo de vida saludable en Atención Primaria vinculado a recursos comunitarios, se ha elaborado un documento donde se incluye una intervención sobre consumo de tabaco para población adulta en Atención Primaria (página 55). http://www.msssi.gob.es/profesionales/saludPublica/prevPromocion/Estrategia/Consejo_integral_EstilosVida.htm.

Además, se ha desarrollado un proceso formativo on-line dirigido a todos los profesionales de Atención Primaria en metodología del cambio y Educación para la salud relacionada con un estilo de vida saludable, está acreditado y pretende ser un complemento de los programas formativos, que ya desarrollan las comunidades autónomas.

3. Implementación Local de la Estrategia: adhesión de los municipios mediante aprobación por el pleno del ayuntamiento, mesas de coordinación intersectorial y mapeo de recursos comunitarios, incluidos aquellos relacionados con tabaquismo (<http://localizasalud.msssi.es/maparecursos/main/Menu.action>).

Por otro lado, las distintas Comunidades Autónomas disponen de programas para promover el abandono del consumo de tabaco (<http://www.msssi.gob.es/ciudadanos/proteccionSalud/tabaco/ayudaCCAA.htm>).

En general, los planes regionales se dirigen a los distintos grupos de edad y colectivos, se realizan desde diversos entornos y abordan las diferencias de género y nivel socioeconómico. Con cierta variabilidad regional en los programas, incluyen atención a grupos especialmente vulnerables como embarazadas, grupos en situación de desigualdad, enfermedad mental, también a personal modélico (sanitarios, docentes). Se utilizan también los recursos web y redes sociales dirigidos a la población e iniciativas como "Hospitales sin Humo". Asimismo, disponen de formación dirigida a los profesionales sanitarios.

Salvo algunas experiencias concretas, los tratamientos de deshabituación no se financian.

También algunas organizaciones no gubernamentales realizan actividades para promover el abandono del consumo de tabaco.

C2815. Have you utilized the "Guidelines for implementation of Article 14 of the WHO FCTC" when developing and implementing policies in this area?

Yes

C2816. Please provide details in the space below or refer to section G of the additional questionnaire. Response to this question or to the additional questionnaire is voluntary. <https://extranet.who.int/dataform/655321?token={TOKEN}&en>

Las directrices del artículo 14 han contribuido a definir y mejorar las líneas de actuación en deshabituación de tabaco en España, que ya se habían iniciado de forma generalizada en todo el Estado en el año 2005 mediante la implantación de la Ley 28/2005.

C2817. If you have any other relevant information pertaining to but not covered in this section, please provide details in the space below.

-Algunas de las respuestas facilitadas en el apartado C283 han sido con información recogida en el borrador del Plan Vasco de Salud 2013-2020. En el canal de comunicación por internet de la administración vasca con la ciudadanía (Irekia), se presenta el plan por el consejero de Salud del Gobierno Vasco, aprobado en el último consejo de gobierno en diciembre de 2013:

-Salvo algunas experiencias concretas con determinadas poblaciones de riesgo, los tratamientos para dejar de fumar no se financian. Cabe mencionar que recientemente, la Comunidad Foral de Navarra ha aprobado el "DECRETO FORAL 111/2017, de 13 de diciembre, por el que se establecen las condiciones de acceso a la prestación farmacológica de ayuda a dejar de fumar" para la población general.

-Respecto a la pregunta C287, aclarar que la respuesta dada de cobertura parcial se refiere al Sistema Nacional de Salud y no comprende al sistema de asistencia sanitaria privado.

C3213. If you have any other relevant information pertaining to but not covered in this section, please provide details in the space below.
Respecto a la pregunta C324, si bien no existe dentro de la normativa española un texto que obligue a impedir a los clientes el acceso directo a los productos de tabaco en venta, a efectos prácticos, dada la disposición de las expendedorías de tabaco como únicos puntos de venta directa al público, no existe acceso directo a los productos de tabaco por parte del cliente.
En relación con la pregunta C325, si bien no está prohibida la fabricación y venta de dulces, refrigerios, juguetes y otros objetos que tengan forma de productos de tabaco y puedan resultar atractivos para los menores, el artículo 3.2. de la Ley 28/2005 establece la prohibición de la venta o la entrega de dichos productos a los menores.
En relación con la pregunta C327, la regulación de la no accesibilidad de los menores a las máquinas expendedoras está desarrollada en la Resolución de 20 de septiembre de 2006, del Comisionado para el Mercado de Tabacos, referida a los mecanismos técnicos adecuados para garantizar que las máquinas expendedoras de tabaco en el mercado impidan el acceso a menores, tal como establece el artículo 4 de la Ley 28/2005, de 26 de diciembre, de medidas sanitarias frente al tabaquismo y reguladora de la venta, el suministro, el consumo y la publicidad de los productos del tabaco. La ubicación de las máquinas expendedoras de productos del tabaco está regulada también mediante el artículo 4 de la Ley 28/2005.

C33. Provision of support for economically viable alternative activities Have you adopted and implemented, where appropriate, measures or programmes on any of the following:

C331[1]. promoting economically viable and sustainable alternatives for: [tobacco growers?]
Yes

C331[2]. promoting economically viable and sustainable alternatives for: [tobacco workers?]
Yes

C331[3]. promoting economically viable and sustainable alternatives for: [tobacco individual sellers?]
Not applicable

C332. Please provide a brief description of the progress made in implementing Article 17 (Provision of support for economically viable alternative activities) in the past two years or since submission of your last report.

En España, se pueden distinguir dos tipos de apoyo a la diversificación del cultivo del tabaco: ayudas nacionales y ayudas cofinanciadas por Fondo Europeo Agrícola de Desarrollo Rural (FEADER).

1. Ayudas nacionales: El 10 de octubre de 2011, se suscribió un convenio de colaboración entre el Ministerio de Medio Ambiente y Medio Rural y Marino y la Consejería de Agricultura, Desarrollo Rural, Medio Ambiente y Energía de la Junta de Extremadura, para la realización de un programa de desarrollo rural sostenible en las comarcas tabaqueras extremeñas. El convenio se suscribió como consecuencia de la inclusión en la Ley 39/2010, de 22 de diciembre, de Presupuestos Generales del Estado para el año 2011 como una subvención nominativa, con una dotación de 9.000.000 de euros. A fin de desarrollar las actuaciones descritas en el convenio, la Consejería de Agricultura estableció mediante el Decreto 42/2013, de 26 de marzo, las bases reguladoras para la concesión de ayudas en competencia competitiva, para la diversificación y dinamización económica de municipios con clara vocación tabaquera, así como en su área de influencia.

El convenio, con un acuerdo de modificación y prórroga incluido, terminó el 31 de diciembre de 2014, en estos momentos la Comisión de Seguimiento del convenio está gestionando su cierre y liquidación.

Al amparo del convenio se han certificado 167 expedientes suponiendo un gasto con cargo al convenio de 5.705.893,07 de euros, incluyendo una asistencia técnica para la realización, entre otros, de trabajos de apoyo a la gestión de la línea de ayudas a la diversificación y dinamización económica de los municipios tabaqueros con un coste de 259.557,57 euros, la diferencia entre la dotación inicial del convenio (9.000.000 de euros) y la cantidad justificada se devolverá por parte de la Junta de Extremadura al Tesoro Público.

2. Ayudas cofinanciadas por el FEADER: En el periodo de programación actual 2014-2020, ningún programa de desarrollo rural (PDR) FEADER contienen ayudas para la diversificación del tabaco.

C333. Have you utilized the "Policy options and recommendations on economically sustainable alternatives to tobacco growing (in relation to Articles 17 and 18 of the WHO FCTC)" when developing and implementing policies in this area?

No

A pesar de la respuesta negativa en el apartado anterior, en los últimos dos años se ha seguido produciendo una reducción del cultivo del tabaco en España, así como del número de productores (como se refleja en archivos adjuntos) debido, además de a la disminución generalizada del consumo de labores de tabaco, a la eliminación, desde 2015, de ayudas acopladas al sector en el marco de la Política Agrícola Común, política con una marcada trayectoria de disminución del apoyo a este cultivo.

C412[2]. implementing measures in respect of tobacco manufacturing within your territory, which take into consideration: [the health of persons in relation to the environment?]

Yes

C413. Please provide a brief description of the progress made in implementing Article 18 (Protection of the environment and the health of persons) in the past two years or since submission of your last report.

• Dentro del segundo pilar de la Política Agrícola Común:

En Extremadura (principal región productora de tabaco en España, con el 97,47% de la producción total), en el marco de su Programa de Desarrollo Rural 2014-2020 (aprobado el 18 de noviembre de 2015), existe una nueva medida agroambiental que favorece la producción integrada de tabaco, haciendo este cultivo más sostenible desde el punto de vista medioambiental (incluye rotación con otros cultivos en un 16%, uso eficiente de fitosanitarios, etc.). En 2016, el 87% de la producción nacional (89% de la extremeña) se obtuvo bajo el sistema de Producción Integrada.

Por otro lado, se hace control de la implantación de las regulaciones sobre salud laboral y sobre protección al medio ambiente en el entorno laboral.

C414. Have you utilized the "Policy options and recommendations on economically sustainable alternatives to tobacco growing (in relation to Articles 17 and 18 of the WHO FCTC)" when developing and implementing policies in this area?

Las encuestas anteriormente citadas se utilizan para la vigilancia e intercambio de información. En este periodo se han realizado diversos informes al respecto:

• Informe final del estudio de Evaluación del impacto de la Ley 42/2010 en la exposición al humo ambiental del tabaco (HAT) en locales de hostelería, realizado por el Grupo de Trabajo en tabaquismo de la Sociedad Española de Epidemiología (SEE) y que fue financiado parcialmente por la Subdirección General de Promoción de la Salud y Epidemiología (SGPSE) del Ministerio de Sanidad, Servicios Sociales e Igualdad del Gobierno de España, el Departament de Salut de la Generalitat de Catalunya y el Centro Nacional de Epidemiología del Instituto de Salud Carlos III.

• De acuerdo a lo establecido en la disposición adicional undécima de la Ley 28/20015 de 26 de diciembre, se ha realizado y remitido a las Cortes los correspondientes informes de evaluación del impacto sobre la salud pública de la entrada en vigor de la reforma de la ley mediante la Ley 42/2010, de 30 de diciembre. En los dos informes presentados se recoge información sobre las ventas, el consumo de los diferentes tipos de productos del tabaco y se sacan conclusiones sobre su evolución tras la aplicación de las medidas de prohibición contempladas en la modificación de la ley.

• Debido al rápido e importante auge de la comercialización de los cigarrillos electrónicos tanto en España como a nivel internacional y a la creciente necesidad de ofrecer información de base para la adopción de medidas se elaboró un "Informe sobre los cigarrillos electrónicos: situación actual, evidencia disponible y regulación" publicado en la página web del Ministerio .

La cooperación y asistencia internacional española se realiza fundamentalmente en el contexto de la Unión Europea, pero también se pueden atender solicitudes de otros países.

D10. Have you encouraged relevant regional and international intergovernmental organizations and financial and development institutions in which you are represented to provide financial assistance for developing country Parties and for Parties with economies in transition to assist them in meeting their obligations under the Convention?

No

D11. Please provide details in the space below.

E. PRIORITIES AND COMMENTS

E1. What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction?

Se contempla llevar a cabo la efectiva implementación de la novedades incluidas en la Directiva de Productos del Tabaco. En este sentido, cabe destacar que se trabajará en el análisis de la mayor información disponible acerca de los productos, tanto del tabaco como las de los SEAN, y en función de las nuevas obligaciones de notificación junto con la evaluación de la toxicidad de ingredientes. Por otro lado, se llevarán a cabo acciones de investigación y de colaboración conjunta con entidades de otros Estados miembros de la Unión Europea.

E2. Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control?
Yes

E3. Please provide details in the space below.
Actualmente se están concentrando los esfuerzos en las tareas de vigilancia y aplicación de las medidas legislativas, en campañas de concienciación y sensibilización sobre los productos del tabaco y otros productos relacionados y en programas de capacitación de profesionales sanitarios sobre intervenciones en tabaquismo.

E4. What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?
Dificultad a la hora de trasladar las motivaciones de salud pública a otras entidades ministeriales y hacerlas primar frente a las consideraciones de estos Departamentos que cuentan con un mayor peso en las decisiones gubernamentales. Esta dificultad conlleva la necesidad de aumentar los esfuerzos para coordinar y consensuar medidas o actuaciones de política frente al tabaquismo.

E5[1]. Do you have any of the following products available on your national tobacco market? [smokeless tobacco products]
Yes

E5[2]. Do you have any of the following products available on your national tobacco market? [water pipe tobacco]
Yes

E5[3]. Do you have any of the following products available on your national tobacco market? [ENDS/ENNDS]
Yes

E5[other]. Do you have any of the following products available on your national tobacco market? [Other]

E6[1]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [smokeless tobacco products]
Yes

E6[2]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [water pipe tobacco]
No

E6[3]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [ENDS/ENNDS]
Yes

E6[other]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [Other]

E7. If you have any relevant information related to questions E5 and E6, please provide details in the space below.
Dentro de la categoría de productos de tabaco sin humo se prohíbe la comercialización de tabaco de uso oral aunque existe algún producto de tabaco sin humo (tabaco de mascar) comercializado. Tanto su comercialización como su consumo son marginales. Se ha incluido en la regulación como productos relacionados con el tabaco, a los productos a base de hierbas que se fuman en pipas de agua.
Durante el año 2014 se experimentó un auge de la oferta de dispositivos SEAN en tiendas especializadas que posteriormente se ha reducido mucho en 2015 al no ser respaldado por el consumo de la población.
Se han establecido limitaciones específicas para estos dispositivos en relación a su consumo en determinados espacios como son los centros y dependencias de las Administraciones públicas, los centros, servicios y establecimientos sanitarios, en los centros docentes y formativos, en los medios de transporte público urbano e interurbano y en los recintos de los parques infantiles. También se han establecido una serie de limitaciones a la publicidad en línea con lo establecido en la Directiva 2014/40/UE mediante la modificación a la Ley 28/2005 realizada en 2017.
También se ha actuado en relación al "tabaco calentado", que ha aparecido recientemente en el mercado, y en general a los productos relacionados con el tabaco, mediante el acuerdo alcanzado en el Consejo Interterritorial de febrero de 2018 http://www.msssi.gob.es/ciudadanos/proteccionSalud/tabaco/docs/Acuerdo_Productos_Tabaco.pdf

E8. Please provide any other relevant information not covered elsewhere that you consider important.
Hay que tener en cuenta que el sistema político de España es descentralizado y la mayoría del control del tabaco y en particular los planes y programas, se desarrollan a nivel de las comunidades autónomas.

E9. Your suggestions for further development and revision of the reporting instrument:
