Significant progress has been made in implementing the system. Throughout the country, inspections within the Tobacco Products and Alcoholic Beverage Tracking System are carried out by using mobile inspection devices for specially trained bandroll control teams. Intensification of audits, especially in risky areas, and training to audit staff have led to an increase in the total amount of special irregularity penalties and in the number of audited products.

In order to enable consumers to more actively participate in the auditing process, inquiry has been made via smart phone application, SMS and website (www.buis.com.tr) is available so that they can control the label on the product they buy. It's possible to download the smartphone app (GIB BUIS) from the Apple Store and Google Play. The application was updated in February 2017.
