2.1.6.3	<p>Please provide the definition of “current smoking/tobacco use” used to answer question 2.1.6 in the space below.</p> <p>Current smoking: cigarette smoked /tobacco used in the last 30 days</p>
2.1.6.4	<p>Please provide a brief explanation of the trend in tobacco use by young persons in the past three years or since submission of your last report.</p> <p>According to the analysis of the results of the GYTS 2003 and 2008, it is visible that in all of the variables (except the use of tobacco products other than cigarettes) we can observe a clear decrease. Variables in the research: ever smoked cigarettes; ever smokers, first smoked cigarettes before age 10; current cigarette smoker; current user of other tobacco products; smoked tobacco in the past 30 days; smoked tobacco in pipe or waterpipe in the last 30 days, never smokers likely to initiate smoking in the next year. The prevalence in case of those who have ever smoked cigarettes (even one or two puffs only) has significantly decreased among boys (from 67.1% to 56.5%), just as there is a significant decrease overall of never smokers' likeliness to initiate smoking in the next year (from 23.9% to 18.6%). The use of other tobacco products (apart from cigarettes) shows a steep increase (from 5.5% to 13.8% in total, 8.2% to 16.8% among boys and from 3% to 10.4% among girls). In 2003 there was no question in the research regarding pipe/water-pipe but when in 2008 this question was included, the prevalence was 11.5%.</p>

2.2	EXPOSURE TO TOBACCO SMOKE
2.2.1	Do you have any data on exposure to tobacco smoke in your population? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2.2.2	<p>If you answered “Yes” to question 2.2.1, please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).</p> <p>Youth population:</p> <ul style="list-style-type: none"> - exposure at home: 39.6% of kindergarteners are passive smokers at home; - exposure in public areas: 87,9 % of the non-smoker youth (age 13-15) suffer from smoke in public places. <p>Adult population:</p> <ul style="list-style-type: none"> - exposure at home to tobacco smoke is 20%; - 24% suffered from tobacco smoke exposure at the workplace.

2.7		TOBACCO-GROWING
2.7.1	Is there any tobacco-growing in your jurisdiction? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
2.7.2	If you answered “Yes” to question 2.7.1, please provide information on the number of workers involved in tobacco-growing. If available, please provide this figure broken down by gender.	
	According to a study conducted by the Research Institute of Agricultural	

	<p>Economics, the number of the workforce in tobacco growing and primer processing is around 25 000. Among them 19 309 seasonal employees, 5163 permanent workers and 509 services-providers.</p> <p>The most active period of the tobacco growing is 6 weeks and the fermentation takes only 6 months. Owing to this the data of the workforce usage has been transformed into yearly workforce-points. Regarding the calculations the full-time equivalence of the number of the work-force in tobacco growing and fermentation is a bit more than 3 750 including the manpower need of the plant-growing, and machine service.</p>
2.7.3	<p>Please provide, if available, the share of the value of tobacco leaf production in the national gross domestic product.</p> <p>0.01 %</p>

2.8	TAXATION OF TOBACCO PRODUCTS <i>(with reference to Articles 6.2(a) and 6.3)</i>				
2.8.1	What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))? 78,9%				
2.8.2	How are the excise taxes levied (what types of taxes are levied)?				
	• Specific tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Ad valorem tax only	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
	• Combination of specific and ad valorem taxes	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
	• More complex structure (<i>please explain:</i> Minimum excise tax is applied in case of cigarette, fine-cut smoking tobacco and other smoking tobacco.)				
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)				
		Product	Type of tax	Rate or amount	Base of tax ⁵
	Smoking tobacco products	attached			
	Add product	attached			
		attached			

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

3.2.6.8	<p>Please provide a brief description of the progress made in implementing Article 12 (<i>Education, communication, training and public awareness</i>) in the past three years or since submission of your last report.</p> <p>In 2008 a syllabus and package of instruments containing an interactive tool were developed for pupils (class 3-5 and 6-8), which was adopted for the Hungarian situation based on similar programs from abroad. The aim of the program is the protection of the health of the school-aged children. During the implementation of the program there is a chance for the popularization of the healthy, non smoking lifestyle by attitude modification towards smoking.</p> <p>The program focuses on three main areas:</p> <ol style="list-style-type: none"> 1. Avoidance of passive smoking, 2. Prevention of getting used to smoking, 3. Helping to quit <p>The package contains a lifelike size detachable and knockdown puppet to demonstrate illnesses caused by smoking, an interactive projectable flash style presentation, a manual book for teacher's and an oral study aid in connection with the pictures of the presentation. All of them can help in the information provision regarding all the fields of smoking. The teacher's manual book, oral study aid and the flash presentation with short films, pictures and animations, are freely downloadable from the website of the National Institute for Health Development with a user name and a password sent by e-mail to schools. Our website aiming smoking prevention and cessation support had been developed, www.cikiacigi.hu, which target groups are the 5-8, 9-14 and 15-20 age groups. This homepage modifies the attitudes of youth by oral contents, games, pictures and animations.</p>
3.2.6.9	<p>If you have any relevant information pertaining to but not covered in this section, please provide details in the space below.</p> <p>In Hungary, most of the smoking prevention programs for the youth have been operating successfully for years. On the other hand, their effectiveness isn't proved by scientific impact assessment.</p> <p>Owing to this deficiency the impact assessment researches of two promising smoking prevention educational programs were realised recently with the support of the WHO European Regional Office (as part of the WHO Biennial Collaborative Agreement).</p> <p>The first one is the Smoking Prevention Program in Kindergartens of the National Institute for Health Development. The activity is a curiosity in our country and all around the world, because it is available throughout the country free of charge, it is systematic and also because the kindergarteners are the target group of the program. According to the results of the Global Youth Tobacco Survey 2008, the smoking prevention programs should be started under school age. This smoking prevention</p>

program is used in more than 1600 kindergartens, which is more than 40% of the Hungarian kindergartens. In the last year the program reached 12000 children and at least twice as many adults. The results of the impact assessment showed that the program changed the behaviour and attitudes of the children towards smoking, and raised their knowledge regarding the harmful health effects of smoking.

The second one is the impact assessment of the Peer Education Program against Smoking in Schools of the Semmelweis University. The research showed that the prevalence of smoking among the youth decreased four months after finishing the program.

English and Hungarian review studies were realised with the main results of the impact assessment researches, thus the methodology of these effective smoking prevention educational programs became available for the public.

3.2.7.14	Please provide a brief description of the progress made in implementing Article 13 (<i>Tobacco advertising, promotion and sponsorship</i>) in the past three years or since submission of your last report.			
	<p>According to paragraph 13 subparagraph 4 of Act LVIII of 1997 on Business Advertising Activity, the display of tobacco products and their prices was permitted at the point of sale. Exact meaning of "display" was subject to constant debates, as the Hungarian word used in the act can also be translated as "introduction" or "presentation".</p> <p>Paragraph 19 subparagraph 4 point c) of Act XLVIII. of 2008 on General Conditions and Certain Restrictions of Business Advertising Activity repealing the above-mentioned Act came into force on the 1st of March 2009. It makes clear that point of sale advertisements may contain nothing but the name and the price of the tobacco product. According to the new rules, there are restrictions also for the size of the advertising surface.</p>			

	<p>On the 1st March 2009 a new regulation came into force regarding the advertising of tobacco products. Since then the sponsorship of tobacco products is prohibited a) in connection with events or activities involving or taking place in several Member States of the European Economic Area or otherwise having cross-border effects; b) in connection with sporting and cultural events, or events or activities relating to health care; c) in connection with events and activities organized by political parties.</p>
3.2.7.15	<p>If you have any relevant information pertaining to but not covered in this section, please provide details in the space below.</p> <p>The Hungarian Authority for Consumer Protection is monitoring the advertising of tobacco products yearly by checking the advertising throughout the country. The number of irregularities has been decreasing since 2008. (The number of irregularities found: 62 (spring 2007), 72 (spring 2008), 50 (autumn 2008), 23 (spring 2009), 13 (autumn 2009). 4.11	If you answered “Yes” to question 4.10, please provide details in the space below.

5. PRIORITIES AND COMMENTS

5.1	What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction? Smoking prevention and implementation of the FCTC guidelines.
5.2	Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
5.3	If you answered “Yes” to question 5.2, please provide details in the space below. Lack of human resource, especially full time legal expert and economist, whose work would be essential in the field of tobacco control. There is a deficit in the financial resources for the researches and the programs implementation. Financial resources are needed for the realization of the Global Adult Tobacco Survey (GATS) and Global Health Professions Student Survey (GHPSS) besides Global Youth Tobacco Survey (GYTS) which had been implemented two times in Hungary. Besides this, it would be essential to implement a national representative survey based on age and gender in every 5th year which would analyze the rate of current smokers, never smokers and those who smoked but quit.
5.4	What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention? <i>(Please refer to Article 21.1(b).)</i> No officially recognised research conducted related to the economic and social consequences of smoking.

5.5	Please provide any relevant information not covered elsewhere that you consider important.
	The present economic crisis influences in a negative way not only human and financial resource problems also results in the increase of tobacco consumption.
5.6	<p>Your suggestions for further development and revision of the reporting instrument:</p> <ul style="list-style-type: none"> - It would be very useful to present the national reports in one database, not just separately, and so doing, it would be possible to search data with the built-in searching and filtering functions on the WHO website. - In the Report we suggest the division of the 3.2.5.12. question into two different questions: <ul style="list-style-type: none">packaging and labelling of such products contain information on relevant constituents of tobacco product? Yes, Nopackaging and labelling of such products contain information on relevant emissions of tobacco product? Yes, No <p>Justification: In Hungary for example, there is data only for emission not for constituents on the packages. It would be relevant to have the answer for each of them separately.</p> <p>When preparing the previous report we were not provided by the "step by step" instructions. This is the reason for some modifications in the answers for 3.2.2. These are not the result of the weakening of the registration. The determination of the categories permitted that we can present our specified national regulation in this year's report. (3.2.2)</p> <p>It would be very useful to have the searching and spell checking function active.</p>
