⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

	<p>Guidelines for general practitioners were developed in 2004. http://www.helsedirektoratet.no/vp/multimedia/archive/00001/R_ykeavvenning_i_prim_1860a.pdf</p> <p>There is an ongoing process to revise them and republish them in 2010.</p> <p>Obviously there is also done some diagnosis and treatment of tobacco dependence in the health care system - but it is rather ad hoc based and not a systematic programme.</p> <p>There is however one fee for general practitioners that is refunded when the doctors “initiate individual structured smoking cessation as part of treating an illness, following an approved program”. The fee is now 150 NOK, and can be used twice yearly for each patient. There are several limitations of this fee: the expression “approved program” is not defined,</p>				

	<p>and the request of an established illness hamper the prevention of smoking related diseases. The fee is used approximately 50 000 times each year, which is little compared to the number of daily smokers in Norway (over 800 000).</p>

5.6	Your suggestions for further development and revision of the reporting instrument:
	We strongly urge the Convention Secretariat to ask COP to rethink the necessity of all this information. It will be difficult to make good use of the information overload, and comparison will also be difficult.

	<p>We also advise the Convention Secretariat to look at WHO/TFI's MPOWER reporting system and cooperate with them on it. It is excel based, more intuitive, providing easier "jumping" to explanations and showing the progress of the completion of the form.</p>
