3. Tobacco use

National Health Survey Serbia, 2006, Key findings, Ministry of Health of the Republic of Serbia, 2007

a) Smoking tobacco

Definitions:

Daily smoker is someone who smokes any tobacco product at least once a day.

Occasional smoker (non-daily smoker) is someone who smokes any tobacco product, but not every day.

Occasional smokers are divided into:

- Reducers: people who used to smoke daily but now do not smoke every day
- Continued occasional: people who have never smoked daily but who have smoked 100 or more cigarettes (or the equivalent amount of tobacco) and now smoke occasionally
- Experimenters: people who have smoked less than 100 cigarettes and now smoke occasionally.

Non-smoker is someone who at the time of the survey does not smoke at all. Non-smokers can be divided in four categories:

- Ex-daily smokers are people who were formerly daily smokers but currently do not smoke at all
- Ex-occasional smokers are those who were formerly occasional smokers but currently do not smoke at all
- Non-smokers are people who have never been daily smokers and have smoked less than 100 cigarettes in their lifetime
- Never smokers are people who have never smoked.
