2.2	EXPOSURE TO TOBACCO SMOKE
2.2.1	Do you have any data on exposure to tobacco smoke in your population? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2.2.2	<p>If you answered “Yes” to question 2.2.1, please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).</p> <p>Data on persons living in smoke-free households and smoke-free cars in NSW are available by age, location, socioeconomic disadvantage and cultural background. Data are produced by the NSW Department of Health.</p> <p>Adult smoke-free homes data - 2008</p> <p>Just under 9 in 10 adults (16 years and over) live in smoke-free homes. Generally, the proportion of adults who live in smoke-free homes increases with age and decreases with socioeconomic disadvantage. There is no significant difference between rural and urban health areas. Since 1997, there has been a significant increase in the proportion of adults who live in smoke-free homes (69.7 per cent to 89.5 per cent). The increase has been significant in all age groups, quintiles of socioeconomic disadvantage, and urban and rural health areas. Since 2007, there has been no significant change in the proportion of adults who live in smoke-free homes; however, there was a significant increase in the first or least disadvantaged quintile.</p> <p>Child smoke-free homes data - 2006</p> <p>90.9 per cent of children (15 years and under) live in smoke-free homes. A significantly lower proportion of children aged 9-15 years (88.2 per cent) live in smoke-free homes, compared with children aged 0-8 years (93.3 per cent). A significantly higher proportion of children in the 3 least disadvantaged quintiles (96.7 per cent and 94.1 per cent and 93.1 per cent), and a significantly lower proportion of children in the 2 most disadvantaged quintiles (88.0 per cent and 81.8 per cent), live in smoke-free homes. There is no significant variation between urban areas and rural areas. The proportion of children aged 0-15 years living in smoke-free homes increased significantly between 2001-2002 (84.8 per cent) and 2005-2006 (90.9 per cent).</p> <p>Child smoke-free cars data - 2006</p> <p>Overall, 91.5 per cent of parents or carers of children 0-15 years have smoke-free cars. A significantly lower proportion of parents or carers of</p>

	<p>children aged 9-15 years (90.3 per cent) have smoke-free cars, compared with parents or carers of children aged 0-8 years (92.7 per cent). A significantly higher proportion of parents or carers in the least disadvantaged quintile (94.2 per cent), and a significantly lower proportion in the second most disadvantaged quintile (88.5 per cent), have smoke-free cars. A significantly higher proportion of mothers from a non English speaking background (93.5 per cent) compared with mothers from an English speaking background (91.0 per cent), have smoke-free cars. There is no significant variation between urban areas and rural areas. The proportion of parents or carers with smoke-free cars has not varied significantly between 2003-2004 and 2005-2006.</p> <p>Smoking during pregnancy data - 2006</p> <p>Overall, 12.1 per cent of mothers of infants 0-11 months smoked during pregnancy. There is no significant variation by socioeconomic status, between rural areas and urban areas, among health areas, or mothers' characteristics. Of those mothers who smoked during pregnancy, 53.1 per cent reduced the amount of tobacco they smoked, 19.4 per cent tried to give up smoking but were unsuccessful, and 27.5 per cent successfully gave up smoking.</p> <p>The proportion of mothers of infants 0-11 months who smoked during pregnancy has not varied significantly between 2001-2002 and 2005-2006; however, it has decreased significantly in rural areas (from 21.1 per cent to 11.7 per cent).</p>

	2.6.2	Do you have any information on the percentage of smuggled tobacco products on the national tobacco market? <input type="checkbox"/> Yes <input type="checkbox"/> No				
	2.6.3	If you answered “Yes” to question 2.6.2, what percentage of the national tobacco market do smuggled tobacco products constitute? %				
	2.6.4	If you answered “Yes” to question 2.6.3 and you have information available, what is the trend over the past three years or since submission of your last report in the percentage of smuggled tobacco products in relation to the national tobacco market?				
2.6.5	Please provide any further information on illicit or smuggled tobacco products.					
2.6.6	Please indicate the source of the data used to answer questions in section 2.6:					

2.7	TOBACCO-GROWING
2.7.1	Is there any tobacco-growing in your jurisdiction? <input type="checkbox"/> Yes <input type="checkbox"/> No
2.7.2	If you answered “Yes” to question 2.7.1, please provide information on the number of workers involved in tobacco-growing. If available, please provide this figure broken down by gender.
2.7.3	Please provide, if available, the share of the value of tobacco leaf production in the national gross domestic product.

2.7.4	Please indicate the year and source of the data used to answer questions in section 2.7:

2.8	TAXATION OF TOBACCO PRODUCTS <i>(with reference to Articles 6.2(a) and 6.3)</i>				
2.8.1	What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))?				
2.8.2	How are the excise taxes levied (what types of taxes are levied)?				
	• Specific tax only	<input type="checkbox"/> Yes	<input type="checkbox"/> No		
	• Ad valorem tax only	<input type="checkbox"/> Yes	<input type="checkbox"/> No		
	• Combination of specific and ad valorem taxes	<input type="checkbox"/> Yes	<input type="checkbox"/> No		
	• More complex structure (<i>please explain:</i>)				
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)				
		Product	Type of tax	Rate or amount	Base of tax ⁵
	Smoking tobacco products				
	Add product				
	Smokless tobacco products				
	Add product				
	Other tobacco products				
	Add product				
2.8.4	Please briefly describe the trends in taxation for tobacco products in the past three years or since submission of your last report in your jurisdiction.				

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

2.8.5	Do you earmark any percentage of your taxation income for funding any national plan or strategy on tobacco control in your jurisdiction? <input type="checkbox"/> Yes <input type="checkbox"/> No <i>(In reference to Article 26)</i>
2.8.6	If you answered “Yes” to question 2.8.5, please provide details in the space below.
2.8.7	Please indicate the year and source of the data used to answer questions 2.8.1 to 2.8.6:

2.9	PRICE OF TOBACCO PRODUCTS <i>(with reference to Article 6.2(a))</i>					
2.9.1	Please provide the retail prices of the three most widely sold brands of domestic and imported tobacco products at the most widely used point of sale in your capital city.					
	Most widely sold brand			Number of units or amount per package	Retail price	
	Domestic	Smoking tobacco products	Smokeless tobacco products	Other tobacco products		

2.9.2	<p data-bbox="483 233 1333 264">Please indicate the year and source of the data used to answer question 2.9.1.</p>
2.9.3	<p data-bbox="483 365 1386 489">Please provide the currency used to complete the “Rate or amount” section of question 2.8.3 and the “Retail price” section of question 2.9.1. If known, please provide the exchange rate of this currency to US dollars as well as the date of this exchange rate.</p>
2.9.4	<p data-bbox="483 592 1386 653">Please briefly describe the trend in the prices of tobacco products in the past three years or since submission of your last report in your jurisdiction.</p>

		<p>Under the Smoke-free Environment Act 2000, smoking is now prohibited in all enclosed public places in NSW (note an 'enclosed public place' may be partly outdoor and partly indoor). Pubs, clubs, nightclubs and the casino (with the exception of the private gaming area) have been smoke-free since 2 July 2007. The Smoke-free Environment Act 2000 defines a public place as a place or vehicle that is open to or being used by the public or a section of the public, whether on payment of money, by virtue of membership of a club or other body, or otherwise.</p> <p>Clause 6 of the Smoke-free Environment Regulation 2007 provides guidelines for determining what places are enclosed and where smoking is permitted, such as genuine outdoor areas. Section 10 of the Smoke-free Environment Act 2000 also requires proprietors to take reasonable steps to prevent smoke drifting from unenclosed places, for example balconies and beer gardens, into non-smoking areas.</p>			

In areas where smoking is not prohibited under the Smoke-free Environment Act 2000, employers are not discharged from their other legal obligations to employees, including obligations under the Occupational Health and Safety Act 2000. This Act is

3.2.6.8	<p>Please provide a brief description of the progress made in implementing Article 12 (<i>Education, communication, training and public awareness</i>) in the past three years or since submission of your last report.</p>
	<p>The NSW Department of Health develops and implements public information, awareness and education campaigns to improve the health of the community and to respond to emerging community information needs and developing issues in tobacco control.</p> <p>Health risks - tobacco consumption</p> <p>The Cancer Institute NSW is responsible for ongoing mass media campaigns as outlined in the 'NSW Tobacco Action Plan 2005-2009' to educate people about the health consequences of smoking and motivate people to quit smoking.</p> <p>The Cancer Institute NSW also provides funding for the Quitline, which is a confidential telephone information and advice service, available throughout Australia. For the cost of a local call, professional telephone advisors provide encouragement and support to help smokers quit. The Quitline offers a free call-back service, expert help in planning a quit attempt and advice on the use of nicotine replacement products. The Quitline is available in languages other than English.</p> <p>NSW Health has published a range of resources which provide information on the health consequences of smoking, and assistance in quitting smoking. These resources are available on the NSW Health website at www.health.nsw.gov.au and through a Resource Distribution Centre. Resources are also developed to address specific at-risk populations, for example, the health risks associated with consumption of water pipe tobacco, common in Middle Eastern communities, have been communicated through translated factsheets.</p> <p>Health risks - tobacco smoke exposure</p> <p>The Public Health (Tobacco) Act 2008 introduced a new offence of smoking in a car with a child under the age of 16 years, effective from 1 July 2009. The Smoke-free Cars campaign has been broadcast on radio, billboard and digital media, and through major newspapers. To help ensure a high level of parent and wider community awareness of the new smoking in cars offence, correspondence with government agencies such as the NSW Department of Education and with non-government organisations such as the Cancer Council NSW enabled information to be distributed through a variety of channels.</p> <p>Under the Smoke-free Environment Act 2000 all enclosed areas of pubs, clubs, nightclubs and the casino (with the exception of the private gaming area) have been smoke-free since 2 July 2007. Section 10 of the Act also requires occupiers to take reasonable steps to prevent smoke drifting from unenclosed places into non-smoking areas. Resources, such as Frequently Asked Questions and factsheets, containing information for different types of premises, such as licensed premises, cafes and strata schemes, to help to</p>

ensure compliance with the Smoke-free Environment Act across a range of settings are available on the NSW Health website at www.health.nsw.gov.au.

The Car and Home Smoke Free Zone campaign encouraged parents and carers of young children to make cars and homes smoke-free and to minimise childrens' exposure to environmental tobacco smoke in the homes and cars of NSW. This campaign involved collaboration between the NSW Government and a range of non-government organisations.

Resources, including factsheets, on the effects of passive smoking are available on the NSW Health website (www.health.nsw.gov.au) and through a Resource Distribution Centre. Passive smoking factsheets have been translated into five languages, including Arabic, Chinese, Korean, Turkish and Vietnamese.

Adverse economic and environmental consequences of tobacco use

The NSW Department of Health is undertaking a project to update estimates from a 2005 study of the tangible and intangible social costs resulting from tobacco use in NSW. A replication study is required to provide the most up to date information on the social costs resulting from tobacco use to feed into the evidence base supporting the development of tobacco control policies.

Research and evaluation

Information and statistics on tobacco are available through the 'Report of the Chief Health Officer', the 'NSW Population Health Survey' and the 'NSW School Students Health Behaviours Survey', produced by the NSW Department of Health. Information about tobacco that can be obtained from these sources includes adult smoking rates; school student smoking rates; death and illness attributable to smoking; intention to quit smoking; smoke-free households and cars; and attitudes to smoking in hotels, bars and pubs. Links to these publications can be found on the NSW Health website: <http://www.health.nsw.gov.au/reports/index.asp>.

The Cancer Institute NSW conducts the 'Smoking and Health Survey' annually, in order to gain understanding of patterns of tobacco use, quit attempts and barriers to quitting among NSW smokers. The Institute also conducts formative research and evaluation surveys related to their mass-media campaign activity.

The NSW Quitline is currently being independently evaluated for caller satisfaction, relevance and efficacy in terms of quitting outcomes.

The NSW Department of Health regularly reviews the effectiveness of its communication and education campaigns through the use of qualitative and quantitative research methods.

Training on tobacco control

The NSW Department of Health provides tobacco cessation training to a range of healthcare workers targeting a range of population groups, especially those with high smoking prevalence and at risk population

groups, such as pregnant women, Aboriginal people, and young people. NSW SmokeCheck was implemented in 2007-2008, focusing on providing an evidence-based best practice brief smoking cessation intervention training workshops for Aboriginal Health Workers and other health professionals working with Aboriginal communities. An initial evaluation indicated significant increases in AHWs' level of confidence in talking to clients about smoking and its harmful health effects, advising and offering advice to support clients to quit and assessing clients' stage of change for smoking cessation. In 2009-2010, implementation of Stage 2 SmokeCheck has involved integration of smoking cessation support into routine service delivery to Aboriginal clients through the use of educational outreach visits to health practitioners; provision of the SmokeCheck training program including training and support for staff who work with pregnant Aboriginal women; smoking cessation support for AHWs who have participated in the SmokeCheck training; and developing a communication network to support AHWs.

Under the National Partnership Agreement 'Closing the Gap', the NSW Government has provided support for a smoking cessation project targeting pregnant Aboriginal mothers and providing training for Aboriginal Health Workers. The project will be undertaken in partnership with the Aboriginal Maternal and Infant Health Strategy (AMIHS) to provide support for pregnant Aboriginal women who are smokers to quit.

The NSW Department of Health funds the Secondary School-based Smoking Prevention Program, which is designed to support secondary schools in implementing quality multi-component tobacco programs as part of the Personal, Development, Health, Physical Education (PDHPE) curriculum. The Program focuses on increasing the capacity of teachers in NSW Government schools in understanding and implementing whole-school strategies to address tobacco use in young people. This partnership program between NSW Health and NSW Department of Education and Training will offer professional learning development to PDHPE teachers of years 7 - 10 in promoting innovative strategies for planning, programming and teaching about tobacco use.

The NSW Department of Health's Smoking Cessation Training for Community Staff Project focuses on the development and implementation of training for staff from health and community service organisations who routinely work with disadvantaged populations with high smoking rates, especially those in low socio economic status areas. The project emphasis is on developing the capacity of organisations to deliver quit smoking support as part of routine delivery service. Strategies implemented in the project include: seminars to raise awareness about the impacts of tobacco smoking on disadvantaged populations; provision of smoking cessation training for staff from health and community organisations; and development of tailored training modules and resources for specific target groups.

In order to help ensure staff are skilled in delivering smoking cessation programs, a state-wide smoking cessation trainer provides training to

	<p>health professionals around NSW.</p> <p>The NSW Department of Health also conducts regular education sessions for Environmental Health Officers on monitoring and compliance with NSW tobacco control legislation.</p> <p>Awareness and participation of government and non-government organisations in tobacco control measures</p> <p>Tobacco control activities in NSW require strong partnerships and ongoing commitment among stakeholders. The NSW Department of Health works collaboratively with local Area Health Services, other government agencies such as the Cancer Institute NSW, non-government organisations such as the Cancer Council NSW, professional health associations, local community based agencies, university academics and consumers on tobacco control measures.</p>
3.2.6.9	<p>If you have any relevant information pertaining to but not covered in this section, please provide details in the space below.</p> <p>The Public Health (Tobacco) Act 2008 commenced on 1 July 2009, introducing a range of new requirements affecting the sale, display and advertising of tobacco and smoking products in NSW in a staged way to 1 July 2013. A significant state-wide communications campaign using print, radio, outdoor and digital media is being conducted to inform the community and tobacco retailers about the new requirements to enhance compliance with the legislation. The key new requirements include: a ban on smoking in a car with a child less than 16 years present; notifying the Department of Health of tobacco retailing via the online Government Licensing Service; a ban on the display of tobacco and smoking products in retail outlets; and limiting the sale of tobacco and smoking products to a single point of sale in retail outlets.</p> <p>Resources for retailers and the community are available on the NSW Health website at www.health.nsw.gov.au and a 24 hour toll-free Tobacco Information Line provides information about tobacco laws and tobacco related matters.</p>

3.2.8.13	Please provide a brief description of the progress made in implementing Article 14 (<i>Demand reduction measures concerning tobacco dependence and cessation</i>) in the past three years or since submission of your last report.				
	<p>The '1999 NSW Health Smoke Free Workplace Policy' aims to reduce the number of patients, staff and visitors exposed to environmental tobacco smoke when in contact with NSW Health's facilities by mandating that all hospital campuses under the control of NSW Health be totally smoke-free. All NSW Health campuses are in the process of implementing the NSW Health Smoke Free Workplace Policy. Area Health Services who are moving to Phase 4, completely smoke-free healthcare facilities, provide employees who wish to quit smoking with four weeks' supply of nicotine replacement therapy free, with the cost borne by the Area Health Service.</p> <p>NSW has also recently issued the Guideline ‘2009 Guidance for Implementing Smoke-free Mental Health Facilities in NSW’. The purpose of the Guideline is to provide practical guidance to Chief Executives and designated personnel in NSW Area Health Services who are planning to facilitate the implementation of the 'NSW Health Smoke Free Workplace Policy in NSW' in public hospital and residential mental health care facilities and drug and alcohol facilities (including step-down units) utilised by mental healthcare consumers.</p>				

Guidelines have been developed to assist health professionals in NSW to provide evidence-based brief advice to clients who smoke, as part of routine clinical practice. The guidelines include the 'Guide for the Management of Nicotine Dependent Inpatients' and 'Let's take a moment - Quit smoking brief intervention - a guide for all health professionals' and are available on the NSW Health website www.health.nsw.gov.au.

Since its introduction, the Smoke-free Environment Act has progressively banned smoking in enclosed public places. Under the Smoke-free Environment Act 2000 enclosed areas of pubs, clubs, nightclubs and the casino (with the exception of the private gaming area) have been smoke-free since 2 July 2007. Section 10 of the Act also requires occupiers to take reasonable steps to prevent smoke drifting from unenclosed places into non-smoking areas.

The NSW Department of Health provides funding for smoking cessation programs which aim to reduce the number of people in NSW who smoke. Smoking cessation programs target a range of population groups, especially those with high smoking prevalence and at risk population groups, such as pregnant women, Aboriginal people, and young people.

NSW SmokeCheck was implemented in 2007-2008, focusing on providing an evidence-based best practice brief smoking cessation intervention training workshops for Aboriginal Health Workers and other health professionals working with Aboriginal communities. An initial evaluation indicated significant increases in AHWs' level of confidence in talking to clients about smoking and its harmful health effects, advising and offering advice to support clients to quit and assessing clients' stage of change for smoking cessation. In 2009-2010, implementation of Stage 2 SmokeCheck has involved integration of smoking cessation support into routine service delivery to Aboriginal clients through the use of educational outreach visits to health practitioners; provision of the SmokeCheck training program including training and support for staff who work with pregnant Aboriginal women; smoking cessation support for AHWs who have participated in the SmokeCheck training; and developing a communication network to support AHWs.

Under the National Partnership Agreement 'Closing the Gap', the NSW Government has provided support for a smoking cessation project targeting pregnant Aboriginal mothers and providing training for Aboriginal Health Workers. The project will be undertaken in partnership with the Aboriginal Maternal and Infant Health Strategy (AMIHS) to provide support for pregnant Aboriginal women who are smokers to quit.

The NSW Department of Health funds the Secondary School-based Smoking Prevention Program, which is designed to support secondary schools in implementing quality multi-component tobacco programs as part of the Personal, Development, Health, Physical Education (PDHPE) curriculum. The Program focuses on increasing the capacity of teachers in NSW Government schools in understanding and implementing whole-school strategies to address tobacco use in young people. This partnership program between NSW Health and NSW Department of Education and

	<p>Training will offer professional learning development to PDHPE teachers of years 7 - 10 in promoting innovative strategies for planning, programming and teaching about tobacco use.</p> <p>The NSW Department of Health's Smoking Cessation Training for Community Staff Project focuses on the development and implementation of training for staff from health and community service organisations who routinely work with disadvantaged populations with high smoking rates, especially those in low socio economic status areas. The project emphasis is on developing the capacity of organisations to deliver quit smoking support as part of routine delivery service. Strategies implemented in the project include: seminars to raise awareness about the impacts of tobacco smoking on disadvantaged populations; provision of smoking cessation training for staff from health and community organisations; and development of tailored training modules and resources for specific target groups.</p> <p>The NSW Department of Health has developed two units of competency standards in tobacco use and treatment of nicotine dependence for the National Vocational Education and Training (VET) Population Health Training Package which have been included in the National Population Health Certificate IV qualification. The Department has conducted competency based smoking cessation training via teleconference across a number of locations in NSW. Training and assessment materials of the units of competency (tobacco use and the treatment of nicotine dependence) are currently being submitted onto the NSW Registered Training Organisation Scope of Delivery to meet the standards required under the Vocational Education and Training Accreditation Board (VETAB). Participants who have completed and submitted assessment materials and tasks will achieve VET Statements of Attainment for the national competency standards.</p> <p>In order to help ensure staff are skilled in delivering smoking cessation programs, a state-wide smoking cessation trainer provides training to health professionals around NSW.</p> <p>The NSW Department of Health provides support annually for the World No Tobacco Day (WNTD) on 31st May. Support includes funding and a media kit to assist Area Health Services in attracting media publicity and implementing WNTD activities. Area Health Services implement a variety of WNTD activities and develop culturally appropriate resources to extend the information and reach target populations.</p>

3.3.2.11	16.7	– prohibiting the sales of tobacco products by minors?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
3.3.2.12	<p>Please provide a brief description of the progress made in implementing Article 16 (<i>Sales to and by minors</i>) in the past three years or since submission of your last report.</p> <p>The Public Health (Tobacco) Act 2008 brought into effect from 1 July 2009 new requirements for the sale, display and advertising of tobacco and smoking products. The Act also introduced tough new penalties across a range of offences, including for selling tobacco products and non-tobacco smoking products to minors. The penalty for selling tobacco products and non-tobacco smoking products to minors represents a ten-fold increase from the Public Health Act 1991.</p> <p>The Act also restricts the placement of tobacco vending machines to prevent them from being accessed by minors. Tobacco vending machines are now only allowed in licensed premises restricted to over 18s - in bar areas and gaming machine areas of hotels, clubs and the casino - and only one vending machine is allowed per licensed premises. To further protect minors, from 1 July 2010, tobacco vending machines can only be operated by staff intervention.</p> <p>Amendments in 2007 to the Public Health Act 1991 further strengthened measures to protect young people from taking up smoking, including banning the sale of sweet, fruit or confectionary flavoured tobacco products that may encourage children to smoke, and banning the sale of tobacco products from mobile or temporary premises including at events targeted at young people, such as music festivals. These reforms are reflected in the Public Health (Tobacco) Act 2008.</p> <p>NSW continues to operate a comprehensive compliance program for tobacco control, which includes sales to minors.</p>
