

WHO FRAMEWORK CONVENTION
ON TOBACCO CONTROL

REPORTING INSTRUMENT OF THE WHO FRAMEWORK CONVENTION ON TOBACCO CONTROL

In order to use the interactive features of the reporting instrument, please follow the instructions below. **It is essential to complete the reporting instrument by providing information/data in the required format to ensure consistency and for ease of data processing and analysis.**

If you use a version of Microsoft Word of before 2010:

1. Save the Microsoft Word-based document (WHO FCTC reporting instrument) to a folder on the computer that will be used to complete the questionnaire.
2. Ensure your Microsoft Word security settings allow you to run macros in this document:
 - (i) Under the "Tools" menu, select "Macro".
 - (ii) In the "Macro" menu, select "Security".
 - (iii) In the "Security" pop up menu, please ensure that you have selected "Medium".
3. Close and re-open the WHO FCTC reporting instrument (Microsoft Word-based document which you saved to your computer under step 1).
4. As the document is opening, a box will appear asking if you want to enable macros. The answer is yes. Click "Enable macros".
5. Once you have clicked "Enable macros", the buttons indicating that you can add new rows or new categories to the tables provided will be functional.

If you use a newer version of Microsoft Word:

1. When receiving the security warning "Some active content has been disabled", click "Enable content".
2. When receiving another security warning "Macros have been disabled", click "Enable content".

I confirm that I read the note and followed the instructions therein

2.1.1.1	Please indicate the smoking tobacco products included in calculating prevalence for question 2.1.1:
	Manufactured cigarettes, hand-rolled, Bali, Bidis, Pipes, Cigars, Narghilé, other forms of smoked tobacco
2.1.1.2	Please indicate the age range to which the data used to answer question 2.1.1 refer:
	15 years and older
2.1.1.3	Please indicate the year and source of the data used to answer question 2.1.1:
	GATS-Brazil/2008. Brazilian National Cancer Institute, 2010. Global Adult Tobacco Survey: Brazil Report. Brazilian National Cancer Institute, Ministry of Health, Rio de Janeiro. Available at: http://www.who.int/tobacco/surveillance/en_tfi_gats_2010_brazil.pdf
2.1.1.4	Please provide the definitions of “current smoker”, “daily smoker”, “occasional smoker”, “former smoker” and “never smoker” used in this report.
	<p>current smoker – Person who regularly uses at least one of the smoked tobacco products, regardless of the time he/she has been smoking for. It comprehends daily and occasional smokers</p> <p>daily smoker – Person who uses at least one of the smoked tobacco products daily, regardless of the time he/she has been smoking. Short periods of time in which a person did not smoke tobacco due to special situations, such as illness, travels etc., but not due to the decision to definitely quit smoking, are not considered.</p> <p>occasional smoker – Person who uses at least one of the smoked tobacco products, but not daily, regardless of the time he/she has been smoking for</p> <p>former smoker – Person who, in the past, made use of at least one smoked tobacco products occasionally for a period of three months or more, or daily for a period of one month or more</p> <p>never smoker – Person who never smoked tobacco, but may have tried it; or a person who smoked daily for less than a month; or occasionally for less than three months.</p>
2.1.1.5	Please provide a brief explanation of the trend in smoking prevalence in the adult population in the past two years or since submission of your last report.
	National surveys conducted in 1989, 2003, and 2008 (adjusted for sampling differences), show a decrease in smoked tobacco use of nearly one half -- from 34.8% in 1989, to 22.4 % in 2003, and to 18.2% in 2008 in adults 18 years and older). The rate of decline between 1989 and 2008 was relatively larger for younger age groups, and for those with over 9 years of education, but relatively similar across genders. More recent, Ministry of Health surveys conducted in Brazilian capital cities and the federal district (a total of 27 cities) report a continuing decline in smoking prevalence in adults over 18 years from 15.6% in 2006 to 12.1% in 2012. These surveys were also in alignment with the national surveys by reporting higher prevalence rates in males, smokers with 8 or less years of education, and smokers in the southern tobacco growing region of Brazil

2.1.2	Smoking prevalence in the adult population (by age groups)

2.1.6.3	Please provide the definition of “current smoking/tobacco use” used to answer question 2.1.6 in the space below.
	<p>Smoked manufactured cigarettes OR used other forms of smoked and/or smokeless tobacco products for at least 1 day within the last 30 days</p>
2.1.6.4	Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.
	<p>There were no statistical differences in the prevalence of manufactured cigarettes between years 2009 and 2012: 2009 (6.3%, 95% CI 6.0-6.7); 2012 (5.1%, 95% CI 3.9-6.2)</p>

2.2	EXPOSURE TO TOBACCO SMOKE
2.2.1	<p>Do you have any data on exposure to tobacco smoke in your population?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p>
2.2.2	<p>If you answered “Yes” to question 2.2.1, please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).</p>
	<p>Exposure to secondhand smoke at home at least once a month was reported by 27.9% of respondents in 2008 (40 million individuals in Brazil, 24 million being non-smokers). A higher proportion reported being exposed to secondhand smoke at home in rural than in urban area, irrespective of gender (p values < 0.001). In 2008, exposure to secondhand smoke in the workplace in Brazil was reported by 24.4% of respondents who worked in enclosed places, representing around 12 million individuals in Brazil; of these, nine million were not smokers. Women had a lower rate of secondhand smoke exposure at work than men (p value < 0.001). No differences were found between rural and urban areas pertaining to secondhand smoke at work.</p> <p>Not including the workplace, about one in every five individuals surveyed reported in 2008 exposure to tobacco smoke in public places, corresponding to 26 million individuals in Brazil, with 22 million being non-smokers. If exposure to tobacco smoke at work is also included, a total of 28 million of non-smokers were exposed to secondhand smoke. Men and women reported similar proportions of exposure to tobacco smoke in public places, such as health care facilities, restaurants, public transportation, and government buildings. Individuals living in rural areas were less often exposed to tobacco smoke (p value < 0.001).</p>
2.2.3	Please indicate the year and source of the data used to answer question 2.2.1:
	<p>GATS-Brazil/2008 Brazilian National Cancer Institute, 2010. Global Adult Tobacco Survey: Brazil Report. Brazilian National Cancer Institute, Ministry of Health, Rio de Janeiro. Available at: http://www.who.int/tobacco/surveillance/en_tfi_gats_2010_brazil.pdf</p>

2.3	TOBACCO-RELATED MORTALITY
2.3.1	Do you have information on tobacco-related mortality in your population? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2.3.2	If you answered “Yes” to question 2.3.1, what is the estimated total number of deaths attributable to tobacco use in your population? 130000
2.3.3	If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction.
	<p>Around 130,000 deaths attributable to tobacco use in 2008.</p> <p>Lung Cancer = 21,900; Other cancer sites = 23,300; Cardiovascular disease = 51,800; Respiratory diseases = 33,000</p>
2.3.4	Please indicate the year and source of the data used to answer questions 2.3.2 and 2.3.3, and please submit a copy of the study you refer to:

2.4	TOBACCO-RELATED COSTS
2.4.1	Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2.4.2	If you answered “Yes” to question 2.4.1, please provide details (e.g. direct (health care-related) and indirect costs and, if possible, the method used to estimate these costs).
	<p>The total cost attributable to smoking for the public health system in Brazil for both genders was 21 billion dollars in 2011. The largest amount of cost was observed for the heart diseases (7 billion dollars), followed by chronic obstructive lung disease and lung cancer. These diseases were responsible for 83% of total costs attributable to smoking in Brazil.</p>
2.4.3	Please indicate the year and source of the data used to answer question 2.4.2, and please submit a copy of the study you refer to:

2.6.6	Please indicate the source of the data used to answer questions in section 2.6:				
	Federal Revenue Secretariat and Annual Reports of the Tobacco Industry				

2.7		TOBACCO-GROWING	
2.7.1	Is there any tobacco-growing in your jurisdiction? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		
2.7.2	If you answered "Yes" to question 2.7.1, please provide information on the number of workers involved in tobacco-growing. If available, please provide this figure broken down by gender.		
	Jobs in farming – 716.420		

	Jobs in industry – 29.000 Other jobs (indirect) – 1.440.000 Total: 2.185.420
2.7.3	Please provide, if available, the share of the value of tobacco leaf production in the national gross domestic product. 0,10% in 2012
2.7.4	Please indicate the year and source of the data used to answer questions in section 2.7: 2.7.2 – Brazilian Tobacco Growers Association 2.7.3 - Brazilian Institute of Geography and Statistics (IBGE)

2.8	TAXATION OF TOBACCO PRODUCTS <i>(with reference to Articles 6.2(a) and 6.3)</i>				
2.8.1	What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))? 66%				
2.8.2	How are the excise taxes levied (what types of taxes are levied)?				
	• Specific tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Ad valorem tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Combination of specific and ad valorem taxes	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
	• More complex structure (<i>please explain:</i>)				
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)				
		Product	Type of tax	Rate or amount	Base of tax ⁵
	Smoking tobacco products <input type="button" value="Add product"/>	Cigarette	pecific Federal Level	0,52	etail price
		Cigarette	Ad Valorem federal Level	19%	etail price
		Cigarette	Valorem State Level	26%	etail price
	Smokeless tobacco products <input type="button" value="Add product"/>				

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

	Other tobacco products				
	Add product				
2.8.4	Please briefly describe the trends in taxation for tobacco products in the past two years or since submission of your last report in your jurisdiction.				
	Year 2013 - specific US\$ 0,46 / ad valorem federal level 18% / ad valorem state level 26%				
	Year 2012 - specific US\$ 0,39 / ad valorem federal level 17% / ad valorem state level 26%				
2.8.5	Do you earmark any percentage of your taxation income for funding any national plan or strategy on tobacco control in your jurisdiction? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <i>(In reference to Article 26)</i>				
2.8.6	If you answered “Yes” to question 2.8.5, please provide details in the space below.				
2.8.7	Please indicate the year and source of the data used to answer questions 2.8.1 to 2.8.6:				
	2014 Federal Revenue Secretariat of Brazil				

2.9	PRICE OF TOBACCO PRODUCTS <i>(with reference to Article 6.2(a))</i>					
2.9.1	Please provide the retail prices of the three most widely sold brands of domestic and imported tobacco products at the most widely used point of sale in your capital city.					
		Most widely sold brand			Number of units or amount per package	Retail price

3.4.2.8		Please provide a brief description of any progress made, as appropriate, in implementing Article 19 (<i>Liability</i>) in the past two years or since submission of your last report.			
		The Law n. 12.546 provides fiscal, administrative (or civil) and criminal sanctions to violation of tax regimes and illicit trade of cigarettes in certain circumstances. Article 19 applies fiscal sanctions (fines and interests) to the violation of the special regime of the Industrialized Products Tax (IPI) applied to			

		<p>cigarettes in certain circumstances. Article 20, §1º, moreover, allows the Federal Revenue Secretariat to apply administrative forfeiture of cigarettes commercialized under the minimum retail price established by the government, without prejudice to the relevant criminal sanctions in case of illicit importation. The company that sells cigarette under the minimum retail price shall be also prohibited to commercialize it for five years (article 20, §2º).</p> <p>There is no specific legislation in Brazil regarding liability measures in relation to any injury or adverse health effect caused by tobacco use.</p> <p>There are, however, general civil liability provisions that could apply to tobacco control. The Brazilian Civil Code (Law n. 10.406) establishes that who causes damage through an illicit conduct shall repair it. There is such obligation even in the absence of fault, when the activity normally performed by the wrongdoer implies, by its own nature, risks to the rights of another person (article 927).</p> <p>The Brazilian Consumers Code (Law n. 8.078) affirms that consumers have the right to clear and suitable information on products and services, including the correct description of composition and characteristics, as well as the right to protection against the risks caused by abusive and misleading advertisement of products and services (article 6).</p> <p>There are civil liability actions launched by persons before Brazilian courts, but the Judiciary, in general, has not granted liability orders.</p> <p>The Superior Labour Court, however, granted a compensation order of R\$ 500.000,00 (aprox. USD 220.000,00) to a person who worked as a cigarette taster for 10 years to Souza Cruz S.A (a Brazilian tobacco company) and got pulmonary diseases as a consequence of his functions (Docket RR 129100-11.2006.5.01.0045).</p>
