<p>If you responded “Partial” to the measures outlined in Article 8.2, please provide specific details of the partial ban here: Even though it is common sense that prohibiting indoor smoking is the most appropriate form of health protection towards the population, especially workers in their workplaces, the Brazilian Legislation – Federal Law n. 9.294/96, that sets forth restrictions on the use and advertising of smoking products, alcoholic beverages, medicines, therapeutic remedies and pesticides, in accordance with the terms of Paragraph 4 of Article 220 of the Federal Constitution, brings a gap that allows smoking inside designated smoking areas but it lacks of any kind of technical norm as for the minimal parameters mandated for the use of such areas. For this reason, the legislation is not fulfilled in some places such as nightclubs, bars and restaurants and the like. Recently the Ministry of Health has proposed a Bill (Project of Law) altering the previous legislation into a 100% prevision ban on smoking indoors.</p> <p>Legislation:</p> <p>Law 9.294 of July 2, 1996 - Prohibits the use of cigarettes, cigars, cheroots, pipes of any other smoking</p>				

product, derived or not from tobacco, in a public or private place except in an area designated specifically for that purpose, the latter being duly isolated and with appropriate ventilation.

Decree n. 2.018 (October 1, 1996) -Regulates the Law 9.294, of July 15, 1996, defining the concepts of collective and enclosed area properly isolated and intended for smoking.

Edit of the Ministry of Health n. 2.818 (May 28, 1998) - It prohibits smoking within the areas of the Ministry of Health, being located either in the Federal District or in the states and the municipalities.

Law 10.167, of December 27, 2000 - Alters the provisions contained in Law 9.294, of July 15, 1996, and prohibits the use of smoking products in aircrafts and other means of public transportation.
