

# Burkina Faso – Bobo Dioulasso (Ages 13-15)

## Global Youth Tobacco Survey (GYTS)

### FACT SHEET . . . . .

The Burkina Faso - Bobo Dioulasso GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Burkina Faso - Bobo Dioulasso could include in a comprehensive tobacco control program.

The Burkina Faso - Bobo Dioulasso GYTS was a school-based survey of students in 4<sup>th</sup> through 6<sup>th</sup> grade conducted in 2001.

A two-stage cluster sample design was used to produce representative data for all of Bobo Dioulasso. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 69.2%, the class response rate was 90.6%, the student response rate was 52.1%, and the overall response rate was 32.7%. A total of 547 students aged 13-15 years participated in the Burkina Faso - Bobo Dioulasso GYTS.

### Prevalence

- 36.7% of students had ever smoked cigarettes (Boys = 55.8%, Girls = 16.2%)
- 20.5% currently use any tobacco product (Boys = 26.9%, Girls = 12.2%)
- 19.6% currently smoke cigarettes (Boys = 28.6%, Girls = 9.6%)
- 6.2% currently use other tobacco products (Boys = 5.9%, Girls = 5.5%)
- 14.5% of never smokers are likely to initiate smoking next year

### Knowledge and Attitudes

- 26.8% think boys and 12.0% think girls who smoke have more friends
- 14.5% think boys and 7.2% think girls who smoke look more attractive
