## B2-B9. HEALTH, SOCIAL AND ECONOMIC INDICATORS

B2. Exposure to tobacco smoke
B21. Do you have any data on exposure to tobacco smoke in your population?
Yes
B22. Please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).
<p>(1) GSHS 2009, among children aged 13-15 years showed:</p> <ul style="list-style-type: none"> <li>- 47 % lived in homes where others smoked,</li> <li>- 53% were exposed to others smoking outside of the home and</li> <li>- 49% had at least one parent who smoked</li> </ul> <p>(2) Air Quality Monitoring Study conducted in 2011 in Suriname revealed</p> <ul style="list-style-type: none"> <li>• Smoking was observed in 16 (55%) locations: 9 (90%) bars, 2 (29%) restaurants, 2 (22%) fast-food and 3 (100%) clubs (primarily casinos); which recorded an average fine particle air pollution PM2.5 level of 257µg/m3.</li> <li>• <input checked="" type="checkbox"/> Air pollution was 29 times higher in locations where smoking was observed than in locations where no smoking was observed</li> <li>• <input checked="" type="checkbox"/> According to the EPA Air Quality Index, a PM2.5 reading of 257mg/m3 , as recorded in places where indoor smoking was observed, is 'hazardous' and as such extremely harmful to health.</li> <li>• <input checked="" type="checkbox"/> The calculated annual average occupational exposure of employees due to their occupational exposure to tobacco smoke pollution is 59 mg/m3, which is 4 times higher than annual levels established by the US Environmental protection Agency.</li> </ul>

B3. Tobacco-related mortality

B31. Do you have information on tobacco-related mortality in your population?

Yes

B32. What is the estimated total number of deaths attributable to tobacco use in your population?

B33. If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction.

The death rate due to tobacco in men was (159 per 100,000 men aged 30 years and over) compared with women (51 per 100,000 women aged 30 years and over). The proportion of deaths attributable to tobacco was almost 9% for men and 4% for women.

Within the non-communicable disease group, ischaemic heart disease accounted for 200 deaths per 100,000 population aged 30 years and over, with 11% of these deaths attributed to tobacco. In contrast, cancer of the trachea, bronchus and lung accounted for 22 deaths per 100,000 population but with 68% of these deaths attributed to tobacco.

Among those who died prematurely, almost one in every 12 deaths among those aged 30-44 and one in 10 among those aged 45-59 years were attributable to tobacco use. Of those who died in the 45-59 year age bracket, tobacco use accounted for 9.4% of those whose death was due to a lower respiratory infection, 20.8% of deaths due to the category of 'all cardiovascular diseases combined', and 60.1% of those who had died from cancer of the trachea, bronchus and lung.

Within the communicable disease group, deaths attributed to tobacco accounted for 9% of all lower respiratory infection deaths and 7% of all tuberculosis deaths

Yes

C3114. Please provide a brief description of the progress made in implementing Article 15 (Illicit trade in tobacco products) in the past two years or since submission of your last report.

The elimination of all forms of illicit trade in tobacco products, including smuggling, illicit manufacturing and counterfeiting are essential components of tobacco control. Therefore, all unit packets and packages of tobacco products and any outside packaging of such products are marked (special excise stamps) to assist in determining the origin of tobacco products. However, Suriname's biggest tobacco import company has noticed a sharp increase in the sale of illegal cigarettes. More stringent measures are needed to enact and enforce the provision of the law and Regulation E35 (Smuggling Regulation) which regulate all goods confiscated from smuggling and the Law "Tegen gaan Smokkelen" State Gazette 1986 no 03.
