Usage quotidien (au moins une cigarette par jour)

B164. Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.

À 17 ans, l'usage quotidien de tabac a continué de progresser très légèrement entre 2011 et 2014. Cette augmentation résulte principalement d'une hausse du niveau d'usage quotidien chez les filles.

B4. Tobacco-related costs
B41. Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society?
Yes
B42. Please provide details (e.g. direct (health care-related) and indirect costs and, if possible, the method used to estimate these costs).
Le coût social des drogues en France mesure le coût monétaire des conséquences de la consommation des drogues légales (alcool et tabac) et illégales et du trafic de ces dernières. Le coût social est composé du coût externe (valeur des vies humaines perdues, perte de la qualité de vie, pertes de production) et du coût pour les finances publiques (dépenses de prévention, répression et soins, économie de retraites non versées, et recettes des taxes prélevées sur l'alcool et le tabac). Les paramètres de calculs suivent les recommandations du Rapport Quinet (2013) et les données sanitaires ont été collectées dans la littérature scientifique. Le « coût social » du tabac est de 122 milliards d'euros. Le « coût externe » représente l'essentiel du « coût social (86 %). L'importance de cette composante s'explique par le nombre très important de vies perdues (78 000) et par la valeur de l'année de vie perdue (115 000 euros) qu'il est recommandé d'utiliser en France dans les calculs socio-économiques. Chaque année, l'État doit payer 13,8 milliards d'euros. Les recettes de taxation sont inférieures au « coût des soins » (25,9 milliards d'euros). La taxation sur le tabac est insuffisante à couvrir le coût des soins engendrés par ce dernier et représentent 40 % des recettes de taxation. http://www.ofdt.fr/publications/collections/notes/le-cout-social-des-drogues-en-france/

Une circulaire publiée le 5 septembre 2014 abaisse de dix à quatre cartouches le seuil au-delà duquel toute personne contrôlée par les services douaniers sera sommée de justifier de leur détention pour sa consommation personnelle.

La circulaire abaisse également les seuils applicables pour les autres produits du tabac, qui sont désormais fixés à : 200 cigares ; 400 cigarillos ; 1 kg de tabac à fumer.

Si le caractère commercial de la détention est établi, la personne contrôlée s'expose au paiement des taxes françaises (par exemple 840 € pour 20 cartouches), en plus de celles déjà payées dans le pays d'achat, mais aussi à des sanctions comprenant notamment une amende pouvant aller jusqu'à 750 €, une pénalité qui peut représenter cinq fois le montant des droits fraudés, la confiscation des produits, voire une peine d'emprisonnement pour les cas les plus graves.

Les importations depuis l'extérieur de l'Union européenne restent soumises à la même limite qu'auparavant, c'est-à-dire l'interdiction d'importer plus d'une cartouche de cigarettes.
