C227. Please provide a brief summary of complete and partial measures, with specific details of the partial measures that have been implemented:

C227a. Banning tobacco smoking in indoor workplaces

According to the national tobacco control law there is a provision of partial ban of smoking in governmental facilities but due to the complicated and not flexible administrative mechanisms which do not envisage precisely the accountability to the authorities who have to be responsible for the implementation the law is not enforced except some voluntary initiatives. Private workplaces are not bound by law to be smokefree or partially smokefree.

C227b. Banning tobacco smoking in public transport

According to the national tobacco control law there is a provision of complete ban of smoking in public transport such as airplanes, buses, mini-buses, metro etc. in the trains and ferries there have to be specially designated areas for smoking and there is no provision at all for private taxis. Weak administrative mechanisms do not allow full enforcement of this provision and there are cases of violation in the public transportation from the drivers of buses and mini buses.

C227c. Banning tobacco smoking in indoor public places

In indoor public places such as theaters, cinemas and other cultural facilities there have to be specially designated smoking areas but weak administrative mechanisms do not allow full enforcement of this law except of some voluntary cases. In hospitality sector facilities such as restaurants, bars, cafes the according the national tobacco control law there has to be 50% of division of space into smoking and non-smoking areas but because of the weak administrative mechanisms it is not fully enforced except of some voluntary cases where even full smoking ban is implemented by the owners of the facilities.

## E. PRIORITIES AND COMMENTS

E1. What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction?

Increase of tobacco taxes;<sup>2</sup>  
improve tobacco cessation services;  
smoking ban policies in indoor public spaces;  
Timely approval of legislative amendments;  
Establishment of effective mechanisms for law enforcement;  
Strengthening intersectional collaboration;  
Enchaining knowledge sharing platforms;  
Strengthening international support and mobilizing collaboration with civil society;  
Taking over the Protocol to Eliminate Illicit Trade in Tobacco Products;  
Institutional capacity building;  
Awareness raising among policy-makers, mass media and general public.

E2. Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control?

Yes

E3. Please provide details in the space below.

improving of smoking cessation services - sufficient infrastructure including human resources do not exist to provide comprehensive smoking cessation services.  
Nationwide tobacco control media campaign - lack of resources do not allow to undertake a wide-scale comprehensive tobacco control media campaign  
lack of human resources dedicated to tobacco control - study tours, trainings and workshops are needed for broad range of experts from different sectors who are involved or will be potentially involved in tobacco control activities.  
systematic surveillance on tobacco consumption trends and its determinants as well as health and economic impact - more research needs to be promoted

E4. What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?

Despite the aforementioned efforts, analysis of current tobacco control legislation and its implementation shows that on the one hand there is a solid background for significant improvements in tobacco-related situation in the country, however it is of utmost importance to strengthen the legislation in-line with the WHO FCTC and EU Directives on tobacco and enhance the political will for enabling effective enforcement of the existing laws. Main barrier remains tobacco industry influence and lack of sensitization of government officials outside of health sector on the benefits of comprehensive tobacco control measures for both, health and development.
