2.1.6.2	Please indicate the year and source of the data used to answer question 2.1.6:
	Demjén T., Kiss J., Lórik E., Bóti E., Papp N., Kelemen A. (2008): Global Youth Tobacco Survey (GYTS), National Report, National Institute for Health Development (OEFI), Hungary (attached to the report)
2.1.6.3	Please provide the definition of “current smoking/tobacco use” used to answer question 2.1.6 in the space below.
	Current smoking: cigarette smoked/tobacco used in the last 30 days
2.1.6.4	Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.
	According to the analysis of the variables of the GYTS 2003 and 2008, it is visible that in all of the figures (except the use of other tobacco products other than cigarettes) we can observe a clear decrease. Variables in the research: ever smoked cigarettes; ever smokers, first smoked cigarettes before age 10; current cigarette smoker; current user of other tobacco products; smoked tobacco in the past 30 days; smoked tobacco in pipe or waterpipe in the last 30 days, never smokers likely to initiate smoking next year. The prevalence of those who have ever smoked cigarettes (even one or two puffs only) has significantly decreased among boys (from 67.1% to 56.5%), just as there is a significant decrease overall of never smokers' likeliness to initiate smoking in the next year (from 23.9% to 18.6%). The use of other tobacco products (apart from cigarettes) shows a steep increase (from 5.5% to 13.8% in total, 8.2% to 16.8% among boys and from 3% to 10.4% among girls). In 2003 there was no question in the research regarding pipe/water-pipe but when in 2008 this question was included, the prevalence was 11.5%.

2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)

	Product	Type of tax	Rate or amount	Base of tax ⁵
Smoking tobacco products <div style="border: 1px solid gray; padding: 2px; display: inline-block;">Add product</div>	cigarettes	ad valorem	28.40%	Retail selling price, all taxes included
	cigarettes	specific	10550 HUF	per 1000 cigarettes

	Fine Cut Smoking Tobacco (intended for the rolling of cigarettes)	ad valorem	52.00%	Retail selling price, all taxes included
	Other smoking tobaccos	ad valorem	32.50%	Retail selling price, all taxes included
	Fine Cut Smoking	minimum	8790 HUF	per kg tobacco

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

Degree of the rise exceeded inflation. But there was a sudden and hard decline in cigarette pricing (average retail price fall was more than 15%) between November 2010 and April 2011, because of a pricing war on the Hungarian market.</p> <p>The average retail selling prices of the tobacco products raised between 2009 and 2011.</p>

5.4	What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?

	<p><i>(Please refer to Article 21.1(b).)</i></p>
	<p>As stricter smoking bans took effect on 1 January 2012, the demand for electronic nicotine delivery devices (e-cigarettes) has increased. Since this phenomenon represents new public health risks, the Hungarian authorities have growing concerns.
