The social costs in Iceland could be around ISK 20-21 billion (direct costs around 7 billion; indirect costs about 5-6 billion; intangible costs around 7.8 billion). ⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.
