B121. Please indicate the smoking tobacco products included in calculating prevalence for question B12:

Cigarettes, Cigars, Pipe, RYO

B122A. Please indicate the year of the data used to answer question B12:

2015

B122B. Please indicate the source of the data used to answer question B12:

Source: National Institute of Statistics- Istat - Social Survey on Aspects of daily life

B123. Please provide a brief explanation of the trend in current smoking prevalence by age group in the past two years or since submission of your last report, if data are available.

There was a stable or decreasing trend in the age classes 15-24, 25-34 and 35-44 while there was an increasing trend in the other age classes. There are some differences if we analyze data by gender. Prevalence among males decreases in the age classes 25-34 and 55-59 while increases in the age classes 15-24, 45-54 and 60-64 in the other age classes is stable. Among women prevalence decreases in the age classes 35-44 and 45-54, is stable in age classes 15-24 and 25-34 while increases in age classes 55-59, 60-64, 65-74 and 75 +.

E. PRIORITIES AND COMMENTS

E1. What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction?
The priorities of the Ministry of Health are: implementation of article 6, article 11, and article 12
E2. Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control?
Yes
E3. Please provide details in the space below.
There are no specific and regular funds dedicated to tobacco control in Italy. Ministry of Health funds Regional prevention plans that include tobacco control activities. Every year there are some resources funding specific projects. There is the need to link a little part of tobacco taxes to tobacco control activities

E4. What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?

The main difficulties are related to the coordination with other sectors of Italian Administration (Ministry of Finance, Ministry of Economical Development and Ministry of Agriculture) and other stakeholders.

Novel Tobacco Products (products for inhalation without combustion)

E7. If you have any relevant information related to questions E5 and E6, please provide details in the space below.

Novel tobacco products fall under definition 14 of the TPD 40/2014/EU: 'novel tobacco product' means a tobacco product which:
(a) does not fall into any of the following categories: cigarettes, roll-your-own tobacco, pipe tobacco, waterpipe tobacco, cigars, cigarillos, chewing tobacco, nasal tobacco or tobacco for oral use; and
(b) is placed on the market after 19 May 2014;

this is the case of the IQOS from PM, registered in Italy in July 2014 as "tobacco products for inhalation without combustion". this products is a combination of an electronic device + a cigarettes pack. When you put the cigarette in the device a needle heats the tobacco without burns it. A consumer must buy the device once in the lifetime and any time the cigarettes pack. The Iqos cigarettes are shorter than the normal cigarettes but for the rest are exactly the same filter included. They can be lighted and smoked in the same way of the current cigarettes.

In the Directive 40, novel tobacco products are regulated in article 19 where in the paragraph 4 is written "Novel tobacco products placed on the market shall respect the requirements of this Directive. Which of the provisions of this Directive apply to novel tobacco products depends on whether those products fall under the definition of a smokeless tobacco product or of a tobacco product for smoking" and definition n.5 says: "'smokeless tobacco product' means a tobacco product not involving a combustion process, including chewing tobacco, nasal tobacco and tobacco for oral use;"

This means that the provisions of the directive apply to this novel tobacco products are the ones in article 12:

"1. Each unit packet and any outside packaging of smokeless tobacco products shall carry the following health warning: 'This tobacco product damages your health and is addictive.'

2. The health warning laid down in paragraph 1 shall comply with the requirements specified in Article 9(4). The text of the health warnings shall be parallel to the main text on the surface reserved for these warnings.

In addition, it shall:

(a) appear on the two largest surfaces of the unit packet and any outside packaging;

(b) cover 30 % of the surfaces of the unit packet and any outside packaging. That proportion shall be increased to 32 % for Member States with two official languages and 35 % for Member States with more than two official languages.

3. The Commission shall be empowered to adopt delegated acts in accordance with Article 27 to adapt the wording of the health warning laid down in paragraph 1 to scientific developments."

This means that the cigarette pack of IQOS will have only 30% of the surface with a general warning (the half of the other cigarettes) No pictures; No different warning; No cessation information

So in the next future in tobacco shops we will have all cigarette packs next to each other with Combine health warning and cessation message that cover 65% of the surface and the IQOS packs with only a health warning on two sides covering 30% of the surface.

Moreover in Italy Ministry of Finance (in the law n.188/2014) established an excise half of the ones for the cigarettes, at the moment the device costs 70 euros (quite high) while the cigarette pack cost 5 euros exactly the same of the Marlboro classic (with great profit) but in the next future they will easily cut the cost (maintaining the same profit of the Marlboro classic) and consumer could smoke it (without using the electronic device).
