B115. Please provide a brief explanation of the trend in smoking prevalence in the adult population in the past two years or since submission of your last report.
The prevalence of smoking increased compared to the results of the 2008 STEPS, The reason can be attributed to either the expansion of the tobacco market in Kuwait or due to the lack of enforcement of the regulations and the gap in the law number 15/1995 regarding the specification of the fine on violation of the law and the governing body for the implementation.
Daily current smokers was 17.5 in 2008 and became 18%.
Males smoking daily was 32.5% became 35.4% and female current smokers was 3% in 2008 and became 3.3.
More shish smoking esp among females

B164. Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report. According to the results of the 2016 survey when comparing results with the 2009 survey we find a small decrease in the prevalence of smoking among the 13-15 years old. This can be explained by the increase in awareness of the dangers of tobacco smoking, but can also be attributed to sampling and methodology. young people tend to deny their smoking.
