

## Additional Questions on the Use of Implementation Guidelines by the Parties

### Introduction

The additional questions contained in this module were developed in response to the mandate given to the Convention Secretariat by the Conference of the Parties in decision FCTC/COP5(11) "to update the reporting instrument, as appropriate, in consultation with the Parties, to facilitate the voluntary submission of information by the Parties on the use of the guidelines adopted by the Conference of the Parties".

The questions in this module have accordingly been developed to reflect the content of the guidelines and to supplement the questions already included in the core questionnaire of the WHO FCTC reporting instrument. Questions related to the content of the guidelines, but already included in the core reporting instrument, are not repeated here.

Discussions at the fifth session of the Conference of the Parties underlined the importance of collecting and sharing information on the use of the guidelines by the Parties and of developing an instrument which could capture the full complexity of the information that Parties had to share. The Conference also decided that the provision of such information through this module would be voluntary. Parties are encouraged, if they wish so, to submit this optional module along with their regular (mandatory) biennial implementation reports.

Parties should complete and submit the online form provided. The questions have three response options: "yes", "no", or "other". Please tick the response "other" if, for example, the matter is not applicable in your jurisdiction; relevant information is not available; or implementation of that particular measure is in progress but has not yet been completed. When the "other" option is chosen, please use the data entry field that is clearly indicated to provide details concerning your answer, as appropriate/possible. Details may of course also be provided when the "yes" and "no" options are selected.

Submitted questionnaires will be analysed and the findings presented in the respective global progress report on implementation of the Convention. They will also be reflected in the implementation database of the WHO FCTC, thus facilitating exchange of information and best practices concerning the use of the guidelines adopted by the Conference of the Parties.

Should you have any questions concerning the use of this form please contact: [copreporting@who.int](mailto:copreporting@who.int).
