2.2	EXPOSURE TO TOBACCO SMOKE
2.2.1	Do you have any data on exposure to tobacco smoke in your population? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2.2.2	If you answered “Yes” to question 2.2.1, please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).

2.3	TOBACCO-RELATED MORTALITY
2.3.1	Do you have information on tobacco-related mortality in your population? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2.3.2	If you answered “Yes” to question 2.3.1, what is the estimated total number of deaths attributable to tobacco use in your population?
2.3.3	If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction. For tobacco related deaths, close inspection of the death records shows that over the same three year period, there were at least 16, 7 and 5 registered deaths caused by conditions linked to tobacco. This translates into tobacco related death rates of 5.9, 2.4, and 2.0% over the period. Current death records use data categories for each mortality case such as “main cause of death,” “due to, or as a consequence of” and “immediate cause of death.” However, it remains difficult to identify different causes of death due to coding and classification inconsistencies. This will be a major area of focus for future profiles. As reported by the RMI Cancer Comprehensiveness Program (CCP), cancer remains a top five cause of death in the RMI. Current cancer related deaths by type are illustrated in the table below for 2005 and 2006. Over the five year period, there were 34 lung cancer deaths (11 in 2005, 6 in 2006, 4 in 2007, 5 in 2008, and

	8 in 2009).
2.3.4	Please indicate the year and source of the data used to answer questions 2.3.2 and 2.3.3, and please submit a copy of the study you refer to:
	RMI Behavioral Health Epi Profile 2012

2.4.1	Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

2.8	TAXATION OF TOBACCO PRODUCTS <i>(with reference to Articles 6.2(a) and 6.3)</i>
------------	---

2.8.1	What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))?
-------	---

2.8.2	How are the excise taxes levied (what types of taxes are levied)?
	<ul style="list-style-type: none"> • Specific tax only <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No • Ad valorem tax only <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No • Combination of specific and ad valorem taxes <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No • More complex structure (<i>please explain:</i>)

2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)				
		Product	Type of tax	Rate or amount	Base of tax ⁵
	Smoking tobacco products <input type="button" value="Add product"/>	cigarettes	Import excise	US\$ 1	Pack of 20 cigarettes
		cigars	Import excise	151%	Import cost
	Smokeless tobacco products <input type="button" value="Add product"/>				
	Other tobacco products <input type="button" value="Add product"/>	Other tobacco products, such as dried leaf tobacco		US\$ 2.75	0.2 gram unit

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

2.8.4	Please briefly describe the trends in taxation for tobacco products in the past two years or since submission of your last report in your jurisdiction.
	RMI has minimal taxes on tobacco products and they have not been raised in line with cost-of-living increases; there are indications that this minimal level was even decreased for a period. Import excise is currently US\$ 1 per pack of 20 cigarettes or 151% of import cost for cigars. For other tobacco products, such as tinned leaf tobacco, excise is US\$ 2.75 per 34.2 gram unit.
2.8.5	Do you earmark any percentage of your taxation income for funding any national plan or strategy on tobacco control in your jurisdiction? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <i>(In reference to Article 26)</i>
2.8.6	If you answered “Yes” to question 2.8.5, please provide details in the space below.
	Business Retailers and importers are mandated by law to pay a certain amount of tax on products or commodities that are found to be ‘vices’ or are harmful such as alcohol and tobacco products. In the RMI, a certain percentage of SIN tax revenue goes towards supportive funding for the College of the Marshall Islands.
2.8.7	Please indicate the year and source of the data used to answer questions 2.8.1 to 2.8.6:

2.9	PRICE OF TOBACCO PRODUCTS <i>(with reference to Article 6.2(a))</i>

The data were provided by a population of 12 520, who were asked six questions in relation to current and previous use of tobacco, whether smoked or chewed, and of betel nut use. The data showed that 24.71% of respondents (44.1% male and 5.0% female) smoked or had ever smoked cigarettes or other smoked tobacco products; 7.44% (12.2% male and 2.6% female) chewed or had ever chewed tobacco, including Copenhagen and other snuff; and 7.84% (14.4% male and 1.37 female) chewed or had ever chewed betel nut, including betel nut with tobacco.</p> <p>The Behavioural Health Epidemiological Profile 2012 was , as endorsed by the Government in April 2013. , has been published. These data show that the adult smoking rate in 2012 was 26% for males and 2.7% for females. Further information on the location, time of day and type of tobacco used is also available from this source.</p> <p>RMI also conducted the GYTS in 2009 and the WHO STEPs Survey in 2002.</p> <p>The 2009 GYTS indicated that 17% of boys and 10.6% of girls aged 13–15 years were current smokers, while 22.6% of boys and 15.8% of girls used other tobacco products. 9.3% of young people aged 13–15 years were susceptible to initiating smoking.</p> <p>Data from the Youth Risk Behaviour Survey (YRBS) conducted in 2003, 2007, 2009 and 2011 showed higher use, with one third of high school students having smoked on one or more days in the previous month. Trend data showed a peak in 2003 and a plateau at 30% since 2007. Daily use has trended down since 2003 with 16.4% of students indicating daily use. Lifetime use has also trended down from 70% in 2003 to 63% in 2011.</p> <p>RMI implements the Synar policy that tracks retailer violations of the ban on sales to minors.
