2.8.4	Please briefly describe the trends in taxation for tobacco products in the past two years or since submission of your last report in your jurisdiction.																																																									

<sup>5</sup> The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

	<p>0.60 USD per 100 sticks produced locally and 1.20 USD per imported cigarettes</p> <p>0.30 USD per 1 kg pipe tobacco produced locally and 0.90 USD per 1 pk for imported pipe tobacco</p> <p>Tax law has been revised and introduced in 2009</p>
