B111. Please indicate the smoking tobacco products included in calculating prevalence for question B11:

All tobacco products

B112[1_SQ001]. Please indicate the age range to which the data used to answer question B11 refer: [Age range][From]

20

B112[1_SQ002]. Please indicate the age range to which the data used to answer question B11 refer: [Age range][To]

75

B113A. Please indicate the year of the data used to answer question B11:

2012

B113B. Please indicate the source of the data used to answer question B11:

Living Standards Measurement Survey, LSMS

B114[SQ001]. Please provide the definitions of "current smoker", "daily smoker", "occasional smoker", "former smoker" and "never smoker" used in this report. [Current smoker]

The survey took into account all those who, during the last month, smoked at least one cigarette.

B114[SQ002]. Please provide the definitions of "current smoker", "daily smoker", "occasional smoker", "former smoker" and "never smoker" used in this report. [Daily smoker]

refers to those who respond "every day" to the question "At the present time do you smoke cigarettes every day, occasionally or not at all?"

B114[SQ003]. Please provide the definitions of "current smoker", "daily smoker", "occasional smoker", "former smoker" and "never smoker" used in this report. [Occasional smoker]

Occasional smoking might mean once a week, in which case they would be defined as current smokers (assuming they have smoked more than 100 cigarettes in their lifetime).

B114[SQ004]. Please provide the definitions of "current smoker", "daily smoker", "occasional smoker", "former smoker" and "never smoker" used in this report. [Former smoker]

Ex-smoker' is someone who has smoked greater than 100 cigarettes in their lifetime but has not smoked in the last 28 days

B114[SQ005]. Please provide the definitions of “current smoker”, “daily smoker”, “occasional smoker”, “former smoker” and “never smoker” used in this report. [Never smoker]

'Never smoker' is someone who has not smoked greater than 100 cigarettes in their lifetime and does not currently smoke

B115. Please provide a brief explanation of the trend in smoking prevalence in the adult population in the past two years or since submission of your last report.

Smoking among adult population (older than 15) shows that the prevalence of smoking (regular or occasional) among adults in Montenegro in 2012h was 31%. This is a significant decrease compared to 2008th when 32,7% of an adult population were smokers, and in 2000th when 43.8% of the adult population of Montenegro said that they are smokers. The prevalence of smoking is higher among men than women and also persons older than 55 years. One of five citizen smoked daily more often male than women. Regular smokers were more common in north of Montenegro.

Also age range to which the data used to answer question B11 refer to 20 to 75 +.

B121. Please indicate the smoking tobacco products included in calculating prevalence for question B12:

All tobacco products

B122A. Please indicate the year of the data used to answer question B12:

2012

B122B. Please indicate the source of the data used to answer question B12:

Living Standards Measurement Survey, LSMS

B123. Please provide a brief explanation of the trend in current smoking prevalence by age group in the past two years or since submission of your last report, if data are available.

Compared with prevalence of smoking by age group in 2000 and 2008, the proportion of smokers has decreased in all age groups. The highest prevalence is in age group between 45 and 54 years.

B13. Prevalence of smokeless tobacco use in the adult population (all) (Please provide prevalence data for total adult population, and identify the age considered in B132, e.g. 15 years old and over, 18-64 years; see B132)

GLOBAL YOUTH TOBACCO SURVEY (GYTS)
B163. Please provide the definition of "current smoking/tobacco use" used to answer question B16 in the space below.
The survey took into account all those who, during the last month, smoked at least one cigarette
B164. Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.
In Montenegro the GYTS was previously conducted in both elementary and secondary schools in 2004 and 2008. Compared to these two previous GYTS the present study showed:
<ul style="list-style-type: none"> • <input checked="" type="checkbox"/> An increase in the number of students who have ever tried cigarette smokers who are current and that among boys, while among girls notable reduction in the number and in relation to 2004 and 2008, and also number of children who have experimented with smoking before age of ten. • <input checked="" type="checkbox"/> A decrease in the number of children who smoke but think that they will start to smoke in future. Also susceptibility among never-smoking girls to initiate smoking next year has decreased significantly. • <input checked="" type="checkbox"/> A decrease in the exposure to second hand smoke both at home and in public places, because the number of children who said they felt that one or both parents smoke is reduced. • <input checked="" type="checkbox"/> An increase in the number of children who wanted to quit smoking and who joined some activities of quitting smoking. • <input checked="" type="checkbox"/> A decrease in the number of children who out of age control can buy cigarettes in stores. • <input checked="" type="checkbox"/> A decrease in the number of children who were exposed to anti-smoking, and an increase in the number of children who were exposed to pro-smoking advertising of tobacco products. • <input checked="" type="checkbox"/> A decrease in the number of children who are in favor of a ban on tobacco use in public places. • <input checked="" type="checkbox"/> New phenomena of electronic cigarette use has appeared since last survey. • <input checked="" type="checkbox"/> An increase in the number of current smokers who want to stop smoking. • <input checked="" type="checkbox"/> A decrease in the number of current smokers who bought cigarettes in shops and at the same time were not prompted for age.

B2-B9. HEALTH, SOCIAL AND ECONOMIC INDICATORS

B2. Exposure to tobacco smoke

B21. Do you have any data on exposure to tobacco smoke in your population?

Yes

B22. Please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).

Research about smoking in the house, in closed public places, in other public places, inside of school building or around the school is conducted. Of the students that participated in the survey, 55.0% live in homes where others smoke in the last 7 days of the week and 67.5% were exposed to tobacco smoke outside home inside any enclosed public places in the last 7 days. At the same time, 63.2% were exposed around others who smoke in indoor public places. Regarding environmental tobacco smoke, 69.7% think smoking should be banned from outdoor public places. Almost two thirds of respondents (62.4%) saw someone smoking inside the school building or school setting. Girls specified more exposure to passive smoking in all smoking places.

B3. Tobacco-related mortality
B31. Do you have information on tobacco-related mortality in your population?
No
B32. What is the estimated total number of deaths attributable to tobacco use in your population?
B33. If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction.
The leading causes of morbidity and mortality of the population in Montenegro are heart diseases and malignant disease, but there are still no studies confirming the impact of smoking on trends in mortality and morbidity.

C1. GENERAL OBLIGATIONS

C1. With reference to Article 5

C111. Have you developed and implemented comprehensive multisectoral national tobacco control strategies, plans and programmes in accordance with the Convention?

Yes

C112. Have you partially developed and implemented tobacco control strategies by including tobacco control in national health, public health or health promotion strategies, plans and programmes?

N/A

C113. Is any aspect of tobacco control that is referred to in the Convention included in any national strategy, plan or programme?

N/A

C114[C114a]. Have you established or reinforced and financed: [a focal point for tobacco control?]

Yes

C114[C114b]. Have you established or reinforced and financed: [a tobacco control unit?]

Yes

C114[C114c]. Have you established or reinforced and financed: [a national coordinating mechanism for tobacco control?]

Yes

C115. Please provide details (e.g. the nature of the national coordinating mechanism, the institution to which the focal point for tobacco control or the tobacco control unit belongs).

Tobacco Agency is administrative body which is responsible for issuing licenses to all participants in the chain of production and distribution of tobacco and tobacco products, but also for monitoring of conditions of tobacco products, as well as for cooperation with authorities and institutions responsible for the suppression of illicit trade in tobacco products.

National Coordinator for Tobacco Control was appointed by the Ministry of Health to monitor effects of tobacco use on the population health .

C116. Please provide a brief description of the progress made in implementing Article 5.1 and 5.2 (General obligations) in the past two years or since submission of your last report.

Activities of monitoring of tobacco roads were represented and implemented during the entire previous period, as well as activities on promotion life without tobacco.

C117. If you have any other relevant information pertaining to but not covered in this section, please provide details in the space below.

Tobacco Agency has strengthened its capacity.

C12. Protection of public health policies with respect to tobacco control from commercial and other vested interests of the tobacco industry Have you adopted and implemented, where appropriate, legislative, executive, administrative or other measures or have you implemented, where appropriate, programmes on any of the following:

C121. protecting public health policies with respect to tobacco control from commercial and other vested interests of the tobacco industry?

Yes

C122. ensuring that the public has access, in accordance with Article 12(c), to a wide range of information on tobacco industry activities relevant to the objectives of the Convention, such as in a public repository?

Yes

C123. Please provide details in the space below.

We provided that tobacco industry can not finance any activity related to the protection of public health (activities of promotion, prevention, treatment and rehabilitation). Additionally, it is forbidden any covert promotion of tobacco industry sponsorship and public events by the manufacturer or retailer of tobacco products. The Law prohibits the sale of any products which imitate tobacco products or containing names (logos) of tobacco products or tobacco companies.

C124. Please provide a brief description of the progress made in implementing Article 5.3 in the past two years or since submission of your last report.

In Montenegro, there is no significant promotion of tobacco products by the tobacco industry, and we managed through a variety of activities to completely prevent any visibility of tobacco products. Montenegro does not have a developed tobacco industry, which facilitates these processes.

C125. Have you utilized the "Guidelines for implementation of Article 5.3 of the WHO FCTC" when developing or implementing policies in this area?

According to the policy of the Ministry of Health, within the existing budget for the health of the population of Montenegro since 2009 it has been implemented the program in smoking cessation counseling for young people - centers for the prevention of all health centers. These Centres meet the health needs of young people. The smoking cessation program is implemented by specially trained doctors selected for children assisted by a team that is responsible for program implementation. Number of groups in 2013th was 167, the number of students was 1940.

In addition, counseling in the area of reproductive health for pregnant women is also implemented, to educate pregnant women about the harmful effects of tobacco smoke on their health and their babies. This program is implemented by selected gynecologists.

Moreover, students of the seventh, eighth and ninth grade, as students in High school within the framework of the subject "healthy lifestyles" get adequate information on the prevention of the uptake of smoking.

We also use the opportunity of National and International Tobacco Control Days to organize workshops and communicate through the mass-media to inform and educate people about the harmful effects of smoking.

Also, experts from Centre for Health Promotion of Institute of public health of Montenegro conduct educational workshops according to the principles of modern health care strategies in elementary and secondary schools in whole country.

It has already been stated that from 2009 at the primary health care level, prevention centers can be found in all of health units, and these centers implement the smoking cessation program among the young people. The program is implemented by selected doctors (doctors often chosen for children). The program is available to children and young people, and implementers are additionally trained in the implementation of this program and are able to provide counselling. The program includes psychologists and a nurse who works in the counselling center. This program is in compliance with the policy of the Ministry of Health and funded by the Health Fund.

In prevention of complications of tobacco use it is very important to work in smoking cessation.

Students of medicine and dentistry in the framework of public health study are educated about negative effects of tobacco smoke on human health.

D7. Please identify the Party or Parties from which assistance was received or to which assistance was provided.

--

D8. Please provide information about any assistance provided or received in the space below.

We received the assistance from WHO in materials, as well as educational programmes in form of seminars, workshops and other meetings. The Government of Montenegro and the Ministry of Health provide guidance, training materials necessary for the implementation of tobacco control programmes within the country, to health and educational institutions. However, it is not ensured distribution of any specified element outside the country.

We think that we need more frequent and comprehensive communication aid by international entities and countries with a longer tradition in the field of tobacco control (exchange of experience, training, expert assistance in the development and improvement plans, programs, strategies, promotional materials, development of resources for monitoring implementation activities, etc.) and to work more closely towards the development of human resources and other capacities in the area of tobacco control. In addition, it is important to strengthen research on the prevalence of smoking, in order to create appropriate policies on basis of the available data. It is necessary to ensure inter-agency cooperation and to define the tobacco control as a priority.

In addition, it is necessary to provide competent involvement of other sector beside health sector in activities of tobacco control

D9. If you have not received or provided assistance in any of the aforementioned areas, please identify any financial or technical assistance that may be under consideration, if appropriate.

WHO provided assistance concerning travel and accommodation at international meetings, as well as ideas for promotional materials to mark dates of importance for tobacco control. Also, the Institute of Public Health provide support within its capabilities.

D10. Have you encouraged relevant regional and international intergovernmental organizations and financial and development institutions in which you are represented to provide financial assistance for developing country Parties and for Parties with economies in transition to assist them in meeting their obligations under the Convention?

No

D11. Please provide details in the space below.

E. PRIORITIES AND COMMENTS

E1. What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction?

The priorities are the prevention of the uptake of smoking, prevention of smoking-related morbidity and mortality, adoption of normative acts in the area of restrictions and bans the use of tobacco products and their implementation, and promotion of Convention. Full implementation of FCTC articles will allow protection of future and present generation from destructive influence of tobacco smoke.

E2. Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control?

Yes

E3. Please provide details in the space below.

In Montenegro there is very small number of trained personnel in the field of public health that would follow the relationship of tobacco control and health, as well as a number of staff who monitor the implementation of laws and principles of general application FCTC.

E4. What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?

Lack of human and technical resources. Better promotion of importance of FCTC application by the other sectors, except health, better implementation of laws which regulate use of tobacco products in public places, better monitoring and application of criminal provisions.

E5[1]. Do you have any of the following products available on your national tobacco market? [smokeless tobacco products]

Yes

E5[2]. Do you have any of the following products available on your national tobacco market? [water pipe tobacco]

Yes

E5[3]. Do you have any of the following products available on your national tobacco market? [ENDS/ENNDS]

No

E5[other]. Do you have any of the following products available on your national tobacco market? [Other]

E6[1]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [smokeless tobacco products]

Yes

E6[2]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [water pipe tobacco]

Yes

E6[3]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [ENDS/ENNDS]

No

E6[other]. Have you adopted and implemented any policy or regulation that is specific to the following tobacco products? [Other]

E7. If you have any relevant information related to questions E5 and E6, please provide details in the space below.

Law refers on use of all tobacco products.

E8. Please provide any other relevant information not covered elsewhere that you consider important.

We consider it necessary to work on capacity building for implementation of the FCTC.

E9. Your suggestions for further development and revision of the reporting instrument:

Instrument had been has improved but we think that access should be facilitated.
