In Montenegro, research on tobacco consumption has been done in the sixth, seventh and eighth grade elementary school, as well as in all four grades secondary school. Therefore, there is overlapping in the presentation of age groups. The Global research on tobacco consumption in Montenegro was completed in April 2008, on the student population of sixth, seventh, eighth (i.e. ninth) grade elementary school as well as the first grade secondary school. Data about smoking prevalence by young people provided by GYTS 2008 haven't yet been given from Atlanta.

## 4. Taxation

**4.1** Please state the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)  
*(Please refer to Article 6.3.)*

		<b>Product</b>	<b>Type of tax</b>	<b>Rate or amount</b>	<b>Base of the tax<sup>6</sup></b>

		cigarettes and cigars	customs			
		finely cut tobacco	customs

		other smoking tobacco	specific excise			
<b>Other tobacco products</b> <input type="button" value="Add product"/>

<sup>6</sup> The 'base of the tax' should clearly indicate on what the tax rate or amount is based. If the tax is expressed as a percentage, the base of the tax is the actual value of the good that is taxed. For example, a sales tax that is applied at the final stage of distribution will be calculated on top of those taxes that have previously been levied. If the tax is expressed as an amount, then the base of the tax is the volume of goods that is taxed. For example, if a tax is US\$5 per 100 cigarettes, the amount of tax is US\$5 and the base of the tax is 100 cigarettes.

## 8. Priorities for implementation of the WHO Framework Convention on Tobacco Control

## 8. Priorities for implementation of the WHO Framework Convention on Tobacco Control

8.1	What are the priorities implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction? <i>(Please refer to Article 21.1(b).)</i>
	<ul style="list-style-type: none"><li>- Full combat against illegal sale of tobacco products;</li><li>- Conduct of adequate tax policy.</li><li>- Application of measures for population prevention from the influence of passive smoking</li></ul>
8.2	What, if any, are the constraints or barriers you have encountered in implementing the Convention? <i>(Please refer to Article 21.1(b).)</i>
	<p>What is taken into consideration is the problem of the application of measures for restricting the use of tobacco products due to the lack of resources. Firstly, the problem is in monitoring of Law enforcement. Namely, monitoring of the application is done by inspection bodies, the number of which is very small on the territory of Montenegro, and they are not able to fully realize measures for prohibition of tobacco products use in accordance with Law. Besides, public spaces, in which the use of tobacco products is restricted by Law, are not technically equipped for the application of measures for restricting the use of tobacco products.</p> <p>We are still not in a position to apply measures for control the structure of tobacco products, because of the lack of technical equipment.</p>
