	15+ years
2.1.1.3	Please indicate the year and source of the data used to answer question 2.1.1:
	<p>New Zealand Health Survey (NZHS) 2012/13. (The NZ Tobacco Use Survey 2006-2009, which provided data for the 2012 report, has been discontinued). The NZHS, which previously asked core questions 5 yearly is now conducted annually questions annually. The first results from the 2012/13 NZHS have been published (see the link below) and the other findings are expected to be available by July 2014, (eg, former smokers and ex-smokers).</p> <p>On line data tables are available at http://www.health.govt.nz/publication/new-zealand-health-survey-annual-update-key-findings-2012-13 (under Downloads - Adult data tables: Health status, health behaviours and risk factors)</p>
2.1.1.4	Please provide the definitions of “current smoker”, “daily smoker”, “occasional smoker”, “former smoker” and “never smoker” used in this report.
	<p>A current smoker is defined as someone who has smoked more than 100 cigarettes in their lifetime and currently smokes at least once a month (World Health Organization 1998)</p> <p>A daily smoker is someone who has smoked more than 100 cigarettes in their lifetime and currently smokes one or more cigarettes daily.</p> <p>A former or “Ex” smoker is someone who has smoked greater than 100 cigarettes in their lifetime and at the time of the survey had not smoked for at least a month.</p> <p>A never smokers is someone who has not smoked more than 100 cigarettes in their lifetime and does not currently smoke.</p>
2.1.1.5	Please provide a brief explanation of the trend in smoking prevalence in the adult population in the past two years or since submission of your last report.
	<p>There has been a steady downward trend in smoking prevalence. NZHS data show an unadjusted daily adult smoking prevalence of 18.3% in 2006/07, 16.4% in 2011/12 and 15.5% in 2012/13. NZHS data tables for 2006/07 are available at http://www.health.govt.nz/publication/portrait-health-key-results-2006-07-new-zealand-health-survey and those for 2011/12 at http://www.health.govt.nz/publication/health-new-zealand-adults-2011-12 .</p> <p>This downward trend is probably attributable primarily to price increases for tobacco products, but with significant contributions from media campaigns and general news media articles on tobacco issues (for example around plain packaging or local authority measures to extend smoke-free areas), improved support for and access to smoking cessation services, and legislative changes such as a ban on tobacco displays and the introduction of infringement notices for some offences..</p>

		Smokeless tobacco products Add product				
	Other tobacco products Add product					
	2.8.4	Please briefly describe the trends in taxation for tobacco products in the past two years or since submission of your last report in your jurisdiction.				

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

	<p>The excise on tobacco products has continued to rise since 2012. As noted in 2012, to protect the tax rate against inflation tobacco tax is indexed against the Consumer Price Index (CPI) the adjustment being made on 1 January each year. In addition there have been tobacco excise increases of 10% - over and above the CPI adjustment - on 1 January 2013 and 2014. As a result the tobacco excise increased by</p> <ul style="list-style-type: none"> • 10.86% on all tobacco products (10% legislated increase plus 0.86 % CPI adjustment on 1 January 2013) • 11.28% on all tobacco products (10% legislated increase plus 1.28 % CPI adjustment on 1 January 2014)
2.8.5	<p>Do you earmark any percentage of your taxation income for funding any national plan or strategy on tobacco control in your jurisdiction?</p> <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p><i>(In reference to Article 26)</i></p>
