2.4	TOBACCO-RELATED COSTS
------------	------------------------------

2.4.1	Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
-------	---

2.4.2	If you answered “Yes” to question 2.4.1, please provide details (e.g. direct (health care-related) and indirect costs and, if possible, the method used to estimate these costs).
-------	---

	<p>English Summary in the report</p> <p>What is the magnitude of the societal costs associated with tobacco smoking in Norway? This report addresses this question by transferring cost estimates from Denmark and Sweden to a Norwegian context. The Norwegian cost estimates vary from NOK 8 billion to NOK 80 billion per year. The lower part of the interval includes healthcare costs and production losses associated with morbidity and premature mortality. The upper part of the interval includes an economic valuation of the welfare loss (lost life years and health related life quality) due to tobacco smoking.</p> <p>The economic value of the welfare loss is one of the parameters that affect the cost estimates the most. But the magnitude of welfare loss associated with smoking also depends on assumptions related to the existence of market failures. Are consumers acting as fully informed individuals in a perfect market or are they not? Cost estimates that include the valuation of welfare loss would generally assume some level of market failure (consumers not taking into account the full consequences of their behaviour in a long-term perspective).</p> <p>The cost estimates do indicate that interventions with the potential to reduce the number of daily and occasional smokers can result in substantial benefits to society. But in order to guide decision makers towards identifying which interventions are cost-effective or not, interventions need to be systematically compared in terms of their potential costs and consequences. This report argues that welfare effects are important to include in such analyses.</p> <p>This report also briefly addresses the question of the societal costs related to passive smoking. Based on an assumption that passive smoking contributes to about 5 percent of smoking related deaths and a welfare loss, the societal</p>
--	--

	<p>costs related to passive smoking are estimated to be about NOK 4 billion per year. Without an economic valuation of welfare loss the estimate is between NOK 400 million and NOK 1 billion per year. Health care costs related to passive smoking affecting children are assumed to be about NOK 21,5 million per year. In addition, there will be relatives' production loss and welfare effects. Such costs could easily reach a magnitude of hundreds of millions NOK per year.</p>

2.8	TAXATION OF TOBACCO PRODUCTS <i>(with reference to Articles 6.2(a) and 6.3)</i>				
2.8.1	<p>What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))? 73 %</p> <p>20-pack of cigarettes. Specific tobacco tax (NOK 46.20) + VAT (25%) comprises 73 % of the final retail price.</p>				
2.8.2	How are the excise taxes levied (what types of taxes are levied)?				
	• Specific tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Ad valorem tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Combination of specific and ad valorem taxes	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
	• More complex structure (<i>please explain:</i>)				
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)				
		Product	Type of tax	Rate or amount	Base of tax ⁵
	Smoking tobacco products <input type="button" value="Add product"/>	Cigarettes	Specific (tobacco)	2.31	1 cigarette
		Cigarettes	Ad valorem (VAT)	25.00	25% of (manufacturers price + specific tobacco tax)
		Pipe and fine cut tobacco	Specific (tobacco)	2.31	1 gram
		Pipe and fine cut tobacco	Ad valorem (VAT)	25.00	25% of (manufacturers price + specific tobacco tax)
		Cigars/cigarillos	Specific (tobacco)	2.31	1 gram
Cigars/cigarillos		Ad valorem (VAT)	25.00	25% of (manufacturers price + specific tobacco tax)	

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

	Smokeless tobacco products	Snus	Specific (tobacco)	0.93	1 gram
	Add product	Snus	Ad valorem (VAT)	25.00	25% of (manufacturers price + specific tobacco tax)
