

WHO FRAMEWORK CONVENTION  
ON TOBACCO CONTROL

## **REPORTING INSTRUMENT OF THE WHO FRAMEWORK CONVENTION ON TOBACCO CONTROL**

In order to use the interactive features of the reporting instrument, please follow the instructions below. **It is essential to complete the reporting instrument by providing information/data in the required format to ensure consistency and for ease of data processing and analysis.**

### **If you use a version of Microsoft Word of before 2010:**

1. Save the Microsoft Word-based document (WHO FCTC reporting instrument) to a folder on the computer that will be used to complete the questionnaire.
2. Ensure your Microsoft Word security settings allow you to run macros in this document:
  - (i) Under the "Tools" menu, select "Macro".
  - (ii) In the "Macro" menu, select "Security".
  - (iii) In the "Security" pop up menu, please ensure that you have selected "Medium".
3. Close and re-open the WHO FCTC reporting instrument (Microsoft Word-based document which you saved to your computer under step 1).
4. As the document is opening, a box will appear asking if you want to enable macros. The answer is yes. Click "Enable macros".
5. Once you have clicked "Enable macros", the buttons indicating that you can add new rows or new categories to the tables provided will be functional.

### **If you use a newer version of Microsoft Word:**

1. When receiving the security warning "Some active content has been disabled", click "Enable content".
2. When receiving another security warning "Macros have been disabled", click "Enable content".

**I confirm that I read the note and followed the instructions therein**

<b>2.4</b>	<b>TOBACCO-RELATED COSTS</b>
2.4.1	Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2.4.2	If you answered “Yes” to question 2.4.1, please provide details (e.g. direct (health care-related) and indirect costs and, if possible, the method used to estimate these costs).  English Summary in the report  What is the magnitude of the societal costs associated with tobacco smoking in Norway? This report addresses this question by transferring cost estimates from Denmark and Sweden to a Norwegian context. The Norwegian cost estimates vary from NOK 8 billion to NOK 80 billion per year. The lower part of the interval includes healthcare costs and production losses associated with morbidity and premature mortality. The upper part of the interval includes an economic valuation of the welfare loss (lost life years and health related life quality) due to tobacco smoking.  The economic value of the welfare loss is one of the parameters that affect the cost estimates the most. But the magnitude of welfare loss associated with smoking also depends on assumptions related to the existence of market failures. Are consumers acting as fully informed individuals in a perfect market or are they not? Cost estimates that include the valuation of welfare loss would generally assume some level of market failure (consumers not taking into account the full consequences of their behaviour in a long-term perspective).  The cost estimates do indicate that interventions with the potential to reduce the number of daily and occasional smokers can result in substantial benefits to society. But in order to guide decision makers towards identifying which

	<p>interventions are cost-effective or not, interventions need to be systematically compared in terms of their potential costs and consequences. This report argues that welfare effects are important to include in such analyses.</p> <p>This report also briefly addresses the question of the societal costs related to passive smoking. Based on an assumption that passive smoking contributes to about 5 percent of smoking related deaths and a welfare loss, the societal costs related to passive smoking are estimated to be about NOK 4 billion per year. Without an economic valuation of welfare loss the estimate is between NOK 400 million and NOK 1 billion per year. Health care costs related to passive smoking affecting children are assumed to be about NOK 21,5 million per year. In addition, there will be relatives' production loss and welfare effects. Such costs could easily reach a magnitude of hundreds of millions NOK per year.</p>

<b>2.8</b>	<b>TAXATION OF TOBACCO PRODUCTS</b> <i>(with reference to Articles 6.2(a) and 6.3)</i>				
2.8.1	What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))? 69 %				
2.8.2	How are the excise taxes levied (what types of taxes are levied)?				
	• Specific tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Ad valorem tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Combination of specific and ad valorem taxes	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
	• More complex structure ( <i>please explain:</i> )				
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)				
		Product	Type of tax	Rate or amount	Base of tax <sup>5</sup>
	Smoking tobacco products <input type="button" value="Add product"/>	Cigarettes	Specific (tobacco)	239	100 cigarettes
		Cigarettes	Ad valorem (VAT)	25%	25% of manufacturer's price + specific tobacco tax)
		Pipe and roll-your-own	Specific (tobacco)	239	100 gram
		Pipe and roll-your-own	Ad valorem (VAT)	25%	25% of manufacturer's price + specific tobacco tax)
		Cigars and cigarillos	Specific (tobacco)	239	100 gram
Cigars and cigarillos		Ad valorem (VAT)	25%	25% of manufacturer's price +	

<sup>5</sup> The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

					specific tobacco tax)
