	• Ad valorem tax only	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No		
	• Combination of specific and ad valorem taxes	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
	• More complex structure (<i>please explain</i> : Imported cigarette tax is based on CIF value and then add levy tax of SR. 500 for 200 cigarettes and then add 15% Goods and Service Tax (GST). For example; the retail price of a pkt of 20 Cig of Benson & Hedges is SR.80.00 out of which the total tax will amount to SR.58.12 (total tax is equivalent to 73% of the retail price)				
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)

		Imported cigarettes	Specific tax	500.00	Seychelles Rupies for 200 cigarettes
		Locally produced cigarettes	Specific tax	500.00	Seychelles rupees for 200 cigarettes
		Locally produced cigarettes	Levy on raw material	0.15	Seychelles rupees for 200 cigarettes

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.
