

WHO FRAMEWORK CONVENTION
ON TOBACCO CONTROL

REPORTING INSTRUMENT OF THE WHO FRAMEWORK CONVENTION ON TOBACCO CONTROL

In order to use the interactive features of the reporting instrument, please follow the instructions below. **It is essential to complete the reporting instrument by providing information/data in the required format to ensure consistency and for ease of data processing and analysis.**

If you use a version of Microsoft Word of before 2010:

1. Save the Microsoft Word-based document (WHO FCTC reporting instrument) to a folder on the computer that will be used to complete the questionnaire.
2. Ensure your Microsoft Word security settings allow you to run macros in this document:
 - (i) Under the "Tools" menu, select "Macro".
 - (ii) In the "Macro" menu, select "Security".
 - (iii) In the "Security" pop up menu, please ensure that you have selected "Medium".
3. Close and re-open the WHO FCTC reporting instrument (Microsoft Word-based document which you saved to your computer under step 1).
4. As the document is opening, a box will appear asking if you want to enable macros. The answer is yes. Click "Enable macros".
5. Once you have clicked "Enable macros", the buttons indicating that you can add new rows or new categories to the tables provided will be functional.

If you use a newer version of Microsoft Word:

1. When receiving the security warning "Some active content has been disabled", click "Enable content".
2. When receiving another security warning "Macros have been disabled", click "Enable content".

I confirm that I read the note and followed the instructions therein

2.1.1.4	Please provide the definitions of “current smoker”, “daily smoker”, “occasional smoker”, “former smoker” and “never smoker” used in this report.
	A Current smoker – is defined as anyone who now smokes cigarettes; a daily smoker smokes everyday and occasional users smoke less than daily; former smokers are defined as those that no longer smoke and never smokers are defined as never having smoked cigarettes.
2.1.1.5	Please provide a brief explanation of the trend in smoking prevalence in the adult population in the past two years or since submission of your last report.
	The data reflected in this report is from the nationally representative bio-behavioural study of tobacco product use in South Africa. The study collected self-reported data on tobacco use among 15 283 South Africans of all ages. In comparison to other studies, for example data from the All media and Products Surveys (AMPS), it is evident that there has been a reduction in smoking prevalence and per capita tobacco consumption

2.1.2	Smoking prevalence in the adult population (by age groups)

2.3	TOBACCO-RELATED MORTALITY
2.3.1	<p>Do you have information on tobacco-related mortality in your population?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p>
2.3.2	If you answered “Yes” to question 2.3.1, what is the estimated total number of deaths attributable to tobacco use in your population? According to the

	<p>global burden of diseases, injuries and risk factors study 2010: Smoking is the fifth risk factor for the most disease burden in South Africa, accounting for between 3.0 and 3.4% of Disability Adjusted Life Years Lost (DALYs). The diseases attributable to smoking are largely cancer, chronic respiratory conditions, cardio and circulatory diseases.</p> <p>According to the Sitas article on ‘<i>Differences among the coloured, white, black, and other South African populations in smoking-attributed mortality at ages 35–74 years: a case-control study of 481 640 deaths.</i>’ the aggregate of all known causes of death, the smoking-attributed fractions were 27% (5608/20 767) in the coloured male, 14% (3913/28 951) in the white male, 8% (20 398/264 011) in the African male, 17% (2728/15 593) in the coloured female, 12% (2084/17 899) in the white female, and 2% (4038/205 623) in the African female population. 2.7	TOBACCO-GROWING
2.7.1	Is there any tobacco-growing in your jurisdiction? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2.7.2	If you answered “Yes” to question 2.7.1, please provide information on the number of workers involved in tobacco-growing. If available, please provide this figure broken down by gender.
2.7.3	Please provide, if available, the share of the value of tobacco leaf production in the national gross domestic product.
2.7.4	Please indicate the year and source of the data used to answer questions in section 2.7:

2.8	TAXATION OF TOBACCO PRODUCTS <i>(with reference to Articles 6.2(a) and 6.3)</i>										
2.8.1	What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))?										
2.8.2	How are the excise taxes levied (what types of taxes are levied)?										
	<ul style="list-style-type: none"> • Specific tax only <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No • Ad valorem tax only <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No • Combination of specific and ad valorem taxes <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No • More complex structure (<i>please explain:</i>) 										
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)										
	<table border="1"> <thead> <tr> <th></th> <th>Product</th> <th>Type of tax</th> <th>Rate or amount</th> <th>Base of tax⁵</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>		Product	Type of tax	Rate or amount	Base of tax ⁵					
	Product	Type of tax	Rate or amount	Base of tax ⁵							

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

2.8.4	Please briefly describe the trends in taxation for tobacco products in the past two years or since submission of your last report in your jurisdiction.				
	Excise taxes increase every year at the reading of the budget in February. In the past two years they have increased at the same rate as the inflation rate.				
2.8.5	Do you earmark any percentage of your taxation income for funding any national plan or strategy on tobacco control in your jurisdiction? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <i>(In reference to Article 26)</i>				
2.8.6	If you answered “Yes” to question 2.8.5, please provide details in the space below.

2.9	PRICE OF TOBACCO PRODUCTS <i>(with reference to Article 6.2(a))</i>					
2.9.1	Please provide the retail prices of the three most widely sold brands of domestic and imported tobacco products at the most widely used point of sale in your capital city.					
		Most widely sold brand			Number of units or amount per package	Retail price
		Smoking tobacco products	Smokeless tobacco products	Other tobacco products		
	Domestic	Peter Stuyvesant			20	R30 average
		Rothmans			20	R21.90

	Imported	Marlboro			20	R31 average
		Camel			20	R35 average
2.9.2	Please indicate the year and source of the data used to answer question 2.9.1.					
	January 2014 data used in calculation of the CPI; data supplied by Statistics South Africa					
2.9.3	Please provide the currency used to complete the “Rate or amount” section of question 2.8.3 and the “Retail price” section of question 2.9.1. If known, please provide the exchange rate of this currency to US dollars as well as the date of this exchange rate.					
	Rands; R/USD exchange rate = about R10.75 as at 10th March 2014					
2.9.4	Please briefly describe the trend in the prices of tobacco products in the past two years or since submission of your last report in your jurisdiction.					
	Premium brands have become somewhat more expensive, but not by significantly more than the inflation rate. There has been a proliferation of brands at the bottom end, and prices there seem stable. In the past year BAT dropped price of Rothmans from about R29 to R21.90 to fight the bottom feeders. In late 2013 BAT also dropped the price of Peter Stuyvesant to fight the bottom feeders. There is a bit of a					

	price war taking place. The price of cigarettes, on aggregate, has not increased much at all, and has probably decreased in real terms.

	Tobacco advertising is partially banned in accordance with the Tobacco Act in South Africa and regulations to restrict displays at point of sale were improved and are to be gazetted in April 2014. In June 2012 the Supreme Court of Appeal upheld the constitutionality of the country’s ban on tobacco advertising in rejecting a challenge from British American Tobacco SA to declare part of the ban unconstitutional. The Constitutional Court refused BATSA leave to appeal the Supreme Court judgement on the grounds that the appeal would not be successful.
