COMMISSION IMPLEMENTING DECISION

of XXX

on the adoption of a financing decision for 2012 in the framework of the second programme of Community action in the field of health (2008-2013) and on the selection, award and other criteria for financial contributions to the actions of this programme and on the EU payment to the WHO Framework Convention on Tobacco Control

EN

EN

COMMISSION IMPLEMENTING DECISION

of XXX

on the adoption of a financing decision for 2012 in the framework of the second programme of Community action in the field of health (2008-2013) and on the selection, award and other criteria for financial contributions to the actions of this programme and on the EU payment to the WHO Framework Convention on Tobacco Control

THE EUROPEAN COMMISSION,

Having regard to the Treaty on European Union and to the Treaty on the Functioning of the European Union,

Having regard to Decision No 1350/2007/EC of the European Parliament and of the Council of 23 October 2007 establishing a second programme of Community action in the field of health (2008-13)¹ (hereinafter referred to as the 'Health Programme'), and in particular Article 8(1) thereof,

Having regard to Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities² (hereinafter referred to as the 'Financial Regulation'), and in particular Article 75 thereof,

Having regard to Commission Regulation (EC, Euratom) No 2342/2002 of 23 December 2002 laying down detailed rules for the implementation of Council Regulation (EC, Euratom) No 1605/2002 on the Financial Regulation applicable to the general budget of the European Communities³ (hereinafter referred to as the 'Implementing Rules'), and in particular Article 90 thereof,

Having regard to Commission Decision 2004/858/EC of 15 December 2004 setting up an executive agency, the 'Executive Agency for the Public Health Programme', for the management of Community action in the field of public health — pursuant to Council Regulation (EC) No 58/2003⁴, and in particular Article 6 thereof,

Whereas:

- (1) In accordance with Article 75 of the Financial Regulation and Article 90(1) of the Implementing Rules, the commitment of expenditure from the EU budget shall be preceded by a financing decision setting out the essential elements of the action involving expenditure and adopted by the institution or the authorities to which powers have been delegated by the institution.

¹ OJ L 301, 20.11.2007, p. 3.

² OJ L 248, 16.9.2002, p. 1.

³ OJ L 357, 31.12.2002, p. 1.

⁴ OJ L 369, 16.12.2004, p.73.

- (2) In accordance with Article 110 of the Financial Regulation and Article 8(1) of Decision No 1350/2007/EC, an annual work plan for the implementation of the Health Programme and selection, award and other criteria for financial contributions to the actions of the Health Programme have to be adopted.
- (3) According to Articles 4 and 6 of Decision 2004/858/EC, the Executive Agency for Health and Consumers carries out certain activities for the implementation of the Health Programme and should receive the necessary appropriations for that purpose.
- (4) The 2012 work plan being a sufficiently detailed framework in the meaning of Article 90(2) and (3) of the Implementing Rules, the present decision constitutes a financing decision for the expenditure provided in the work plan for grants, procurement and other actions.
- (5) Under Article 168(1) point (c) of the Implementing Rules, grants may be awarded without a call for proposals to bodies with a *de jure* or de facto monopoly and under Article 168(1) point (f) for actions with specific characteristics that require a particular type of body on account of its technical competence, its high degree of specialisation or its administrative power.
- (6) This Decision is also a financing decision for the expenditure in the context of indirect centralised or joint management chargeable to the EU budget.
- (7) This Decision is also a financing decision for EU payment to WHO Framework Convention on Tobacco Control.
- (8) Evidence of existence and proper operation of the elements listed in Article 56 of the Financial Regulation, within the entity to be entrusted by the Commission with the implementation of EU funds in indirect centralised management, has been obtained.
- (9) The present financing decision may also cover the payment of interest due for late payment on the basis of Articles 83 of the Financial Regulation and 106(5) of the Implementing Rules.
- (10) It is appropriate to define the terms 'substantial change' within the meaning of Article 90(4) of the Implementing Rules for the application of this Decision.
- (11) The measures provided for in this Decision are in accordance with the opinion of the Committee referred to in Article 10 of Decision No 1350/2007/EC,

HAS DECIDED AS FOLLOWS:

Article 1

The work plan for 2012 for the implementation of the Health Programme, as set out in Annex I, and the selection, award and other criteria for financial contributions to the actions of this programme, as set out in Annexes II, III, IV, V, VI and VII, and the EU payment to the WHO Framework Convention on Tobacco Control are hereby adopted. These constitute a financing decision in the meaning of Article 75 of the Financial Regulation.

Article 2

The maximum contribution authorised by this Decision for the implementation of the Health Programme is set at EUR 51 130 200 to be financed from the following budget lines of the General Budget of the European Union for 2012:

- budget line no 17 03 06 – EU action in the field of health: EUR 48 300 000,
- budget line no 17 01 04 02 – Expenditure on administrative management: EUR 1 400 000,

and estimated additional contributions from the EFTA/EEA countries and Croatia for their participation in the Health Programme:

- EFTA/EEA countries: EUR 1 292 200,
- Croatia: EUR 138 000.

This brings up the total for budget line 17 03 06 to EUR 49 688 800 and the total for budget line 17 01 04 02 to EUR 1 441 400.

The maximum contribution authorised by this Decision for the payment to the WHO Framework Convention on Tobacco Control is set at EUR 200 000 under budget line 17 03 05 "International agreements and membership of international organisations in the field of public health and tobacco control".

These appropriations may also cover interest due for late payment in accordance with Article 83 of the Financial Regulation.

The implementation of this Decision is subject to the availability of the appropriations foreseen in the draft budget for 2012 after the adoption of the budget for 2012 by the Budgetary Authority.

Article 3

The management system set up by the Executive Agency for Health and Consumers to be entrusted with the implementation of EU funds complies with the conditions for the delegation of tasks under indirect centralised management. The Executive Agency will adopt fraud prevention measures tailored to the risks identified. The budget implementation of tasks related to project grants, operating grants, grants for joint actions, conference grants and direct grant agreements with international organisations and part of procurement can thus be entrusted to this entity.

The budget allocations necessary for the management of the Health Programme shall be delegated to the Executive Agency for Health and Consumers under the conditions and within the limits of the amounts laid down in the work plan in Annex I.

The operating subsidy entered in budget line 17 01 04 30 shall be paid to the Executive Agency for Health and Consumers.

Article 4

The budget implementation of tasks related to direct grants with international organisations can be entrusted to the following international organisations: Council of Europe (CoE), International Agency for Research on Cancer (IARC), International Organisation for Migration (IOM), and Organisation for Economic Co-operation and Development (OECD).

Article 5

Cumulated changes of the allocations to the specific financial instruments not exceeding 20% of the maximum contribution authorised by this Decision are not considered to be substantial provided that they do not significantly affect the nature and objective of the work plan. This may include the increase of the maximum contribution authorised by this Decision up to 20%.

The authorising officer, in accordance with Article 59 of the Financial Regulation, may adopt such changes in accordance with the principles of sound financial management and of proportionality.

The Director-General for Health and Consumers shall ensure the overall implementation of this financing decision.

Article 6

Grants may be awarded without a call for proposals to bodies with *de jure* or de facto monopoly under Article 168(1) point (c) of the Implementing Rules and for actions with specific characteristics that require a particular type of body on account of its technical competence, its high degree of specialisation or its administrative power under Article 168(1) point (f), in accordance with the conditions detailed in the annexed work plan. A specific analysis of the monopoly situation will be carried out, supported by documental evidence, before any award of grants to beneficiaries in a monopoly situation.

John DALLI
Member of the Commission

**Work plan 2012 for the second programme of Community action in the field of health
(2008-13)**

1. GENERAL CONTEXT

1.1. Policy and legal context

Article 168 of the Treaty on the Functioning of the European Union (TFEU) and resulting legal obligations and other commitments is the basis for actions presented in this work plan. The Treaty states that EU action in the area of public health is designed to improve public health, prevent physical and mental illness and diseases, and obviate sources of danger to physical and mental health. This is to be done in cooperation with the Member States. The EU Health Strategy set out in Commission White Paper *Together for Health: A Strategic Approach for the EU 2008-2013* (COM (2007) 630 final⁵) provides an overarching framework for all action under this workplan.

The second programme of Community action in the field of health (2008-13) (hereinafter referred to as the "Health Programme" or "Programme") established by Decision No 1350/2007/EC of the European Parliament and of the Council (hereinafter referred to as the "Programme Decision") supports the implementation of this strategy. The mission of the Health Programme is to complement, support and add value to the policies of the Member States. It seeks to contribute to increased solidarity and prosperity in the EU by protecting and promoting human health and safety and by improving public health. The Programme pursues the following objectives set out in article 2.2 of the Programme Decision:

- (1) improving citizens' health security;
- (2) promoting health, including the reduction of health inequalities;
- (3) generating and disseminating health information and knowledge.

Article 8(1) of the Programme Decision states that the Commission shall adopt:

- (a) an annual work plan for the implementation of the Programme, setting out:
 - (i) priorities and actions to be undertaken, including the allocation of financial resources;
 - (ii) criteria for the percentage of EU financial contribution, including criteria on exceptional utility;
 - (iii) arrangements for implementing the joint strategies and actions referred to in Article 9;
- (b) selection, award and other criteria for financial contributions to the actions of the Programme in accordance with Article 4.

⁵ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2007:0630:FIN:EN:PDF>

According to Article 75 of the Financial Regulation applicable to the general budget of the European Union, the commitment of expenditure should be preceded by a financing decision adopted by the institution or the authorities to which powers have been delegated by the institution. According to Article 90 of the detailed rules for the implementation of the Financial Regulation (Implementing Rules), the decision adopting the annual work programme referred to in Article 110 of the Financial Regulation may be considered to be the financing decision provided that this constitutes a sufficiently detailed framework. This document aims to fulfil those obligations and present the actions for 2012.

In addition to the Member States of the European Union, the Health Programme is open for the participation of third countries. EFTA/EEA countries Iceland, Liechtenstein and Norway participate in the Programme in accordance with the conditions established in the EEA agreement. Other third countries, in particular European neighbourhood policy countries, countries that are applying for, are candidates for, or are acceding to membership of the EU as well as the western Balkan countries included in the stabilisation and association process may participate in the Programme provided that the necessary agreements are in place. Out of these third countries Croatia has concluded these arrangements and participates in the Programme.

1.2. Resources

The Programme Decision sets a total budget of EUR 321 500 000 for the period 1 January 2008 – 31 December 2013. The Budgetary Authority has approved a total budget of EUR 49 700 000 [indicative amount, subject to the final adoption of the budget by the Budgetary Authority]:

- EUR 48 300 000 for budget line 17 03 06 – EU action in the field of health (operational budget),
- EUR 1 400 000 for budget line 17 01 04 02 – Expenditure on administrative management (administrative budget).

Additional contributions from the EFTA/EEA countries and Croatia are estimated at EUR 1 292 200 from EFTA/EEA and EUR 138 000 from Croatia.

This brings up the total for budget line 17 03 06 to EUR 49 688 800 and the total for budget line 17 01 04 02 to EUR 1 441 400.

The amounts given in the following chapters are indicative. In accordance with Article 90(4) of the Implementing Rules, non-substantial variations in the order of +/- 20 % are possible for each financing mechanism.

Budget line 17 01 04 02 – "Expenditure on administrative management" is intended to cover expenditure on studies, meetings of experts, information, publications and technical and administrative assistance for IT systems. These are directly linked to the achievement of the objectives of the Programme or measures taken under this activity.

The Executive Agency for Health and Consumers (EAHC) assists the Commission in the implementation of this work plan according to Commission Decision C(2008) 4943 of 9 September 2008. The budget line for administrative appropriations related to EAHC is 17 01 04 30.

In addition, the Budgetary Authority has approved a total budget of € 200 000 [indicative amount, subject to the final adoption of the budget by the Budgetary Authority] for the EU payment to the WHO Framework Convention on Tobacco Control under budget line 17 03 05 "International agreements and membership of international organisations in the field of public health and tobacco control".

2. FINANCING MECHANISMS

Appropriations available under budget line 17 03 06 – "EU action in the field of health" will be used to award project grants, operating grants, grants for joint actions, conference grants and direct grants to international organisations as well as to cover procurement and other actions. All grants are covered by written agreement.

In accordance with recital 33 of the Programme Decision, collaboration with third countries not participating in the programme should be facilitated. This should not involve a financial contribution under the Programme. Nevertheless, travel and subsistence expenses for experts invited from or travelling to such countries can be considered eligible costs in duly justified, exceptional cases, where this directly contributes to the objectives of the Programme.

2.1. Project grants

The total indicative amount for project grants is estimated at EUR 13 171 820. Project grants are calculated on the basis of eligible costs incurred. The maximum rate for EU co-financing is 60%. However, this may go up to 80% in case a proposal meets the criteria for exceptional utility. Annex II contains the exclusion, eligibility, selection and award criteria for project grants. Annex VII contains the criteria for exceptional utility.

Only proposals that directly correspond to the topic and description as set out in this work plan and where 'project grants' is indicated as the financing mechanism will be considered for funding. Proposals which only address the wider subject area without matching the specific description of a given action will not be considered for funding.

The indicative timetable for publishing the call for proposals for project grants in the Official Journal is the fourth quarter of 2011.

2.2. Operating grants

The total indicative amount for operating grants is estimated at EUR 4 400 000. They are calculated on the basis of eligible costs incurred. The maximum rate for EU co-financing is 60%. However, this may go up to 80% in case a proposal meets the criteria for exceptional utility.

Operating grants may be awarded to the renewal of operating grants awarded to non-governmental bodies and specialised networks under the work plan for 2011. New operating grants may be awarded to non-governmental bodies and specialised networks active in areas corresponding to the three objectives of the Health Programme. Work carried out under operating grants should directly contribute to reaching the priorities of the European Union as set down in Commission Communication COM(2010)2020 of 3 March 2010 *EUROPE 2020*

*A Strategy for smart, sustainable and inclusive growth.*⁶ Issues that are particularly relevant in this context include active and healthy ageing, including health promotion and prevention of diseases; prevention of health inequalities, including ensuring better access to health care for all; and questions relating to health workforce.

As laid down in Article 4(2) of the Programme Decision, the renewal of financial contributions set out in paragraph 1(b) to non-governmental bodies and specialised networks may be exempted from the principle of gradual decrease. As a general rule, this exemption will apply to applicant organisations not receiving any of their funding from the private sector⁷ or other conflicting interest for their functioning (core funding). For all other renewed operating grants, a decrease of 1 percentage point as compared to the EU co-financing percentage agreed in the grant agreement following the call for proposals 2011 will be applied. In any case, the amount of EU co-financing cannot be higher than the amount granted in 2011. Annex III contains the exclusion, eligibility, selection and award criteria for operating grants. Annex VII contains the criteria for exceptional utility.

The indicative timetable for publishing the call for proposals for operating grants in the Official Journal is the fourth quarter of 2011.

2.3. Grants for joint actions

The total indicative amount for joint actions is estimated at EUR 8 950 000. Joint actions allow the competent authorities of the Member States/other countries participating in the Health Programme and the European Commission to take forward work on jointly identified issues. Public bodies or non-governmental bodies based in a Member State/another country participating in the Programme which participates in a joint action may participate in the joint action. However, they have to be expressly mandated to do so by the authorities of the Member State/other participating country concerned.

Grants for joint actions are calculated on the basis of eligible costs incurred. The maximum rate of EU co-financing is 50%. However, this may go up to 70% in cases of exceptional utility. Exceptional utility co-financing percentage of 70 % is proposed for the joint action "Facilitating collaboration on organ donation between national authorities in the EU" because of its contribution to the effective implementation of EU legislation in this field. In other cases, the criteria for exceptional utility in Annex VII apply. Annex IV contains the exclusion, eligibility, selection, and award criteria for joint actions.

Member States/other countries participating in the Health Programme which intend to participate in one or more joint actions must declare their intention to the Commission prior to the expiry of the deadline for the submission of proposals. With the exception of NGOs operating at EU level, only organisations established in Member States/other countries participating in the Programme which have made this declaration may apply for participation in joint actions.

The indicative timetable for publishing the call for proposals for joint actions in the Official Journal is the fourth quarter of 2011.

⁶ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2010:2020:FIN:EN:PDF>

⁷ The term 'private sector' covers 'for-profit' companies/enterprises/corporations, business organisations or other entities irrespective of their legal nature (registered/not registered), ownership (wholly or partially privately owned/state owned) or size (large/small), if they are not controlled by the public.

2.4. Conference grants

The total indicative amount for conferences is EUR 800 000: EUR 200 000 for Presidency conferences, and EUR 600 000 for other conferences. For administrative reasons, conferences eligible for co-funding, apart from Presidency conferences, must take place in 2013.

2.4.1. Presidency conferences – *De jure monopoly*

According to article 168(1) point c) of the Implementing Rules, grants can be allocated without a call for proposals to organisations in a *de jure* or de facto monopoly situation, duly substantiated in the award decision.

Presidency conferences which are highly political in nature and which involve representation at the highest level both from National Authorities and European representatives are to be organised exclusively by the Member State holding the Presidency of the EU. Given the unique role of the Presidency in the framework of EU activities, the Member State responsible for the organisation of the event is considered as having a *de jure* monopoly.

Two conferences organised by the Presidencies of the European Union, one for the Presidency in the second half of 2012 and the other for the Presidency in the first half of 2013, may receive up to EUR 100 000 each. The maximum rate of EU co-financing is 50% of eligible costs incurred.

The Presidency shall submit to EAHC a request for a grant for the conference concerned, via the Permanent Representation, using a form provided by EAHC. This has to be done at least four months before the event.

The Presidency conferences to be financed under this work plan are: "First Steps Towards a Healthy Ageing Process" planned for September 2012 under the Cypriot Presidency, and a conference to be held in the first half of 2013 under the Irish Presidency which will be the object of a separate financing Decision once the details become known.

2.4.2. Other conferences

Conference grants may be awarded to the organisation of conferences that correspond to the three objectives of the Health Programme. Conferences that may be awarded funding should directly contribute to reaching the priorities of the European Union as set out in Commission Communication COM(2010)2020 of 3 March 2010 *EUROPE 2020 A Strategy for smart, sustainable and inclusive growth*. Issues that are particularly relevant in this context include active and healthy ageing, including health promotion and prevention of diseases; prevention of health inequalities, including ensuring better access to health care for all; and questions relating to health workforce.

Conferences must have a wide European dimension. They have to be organised by a public or non-profit making body established in a country participating in the Health Programme and which has relevant experience of co-operation at EU level. Conferences may receive up to EUR 100 000 (maximum 50% of the total budget). Annex V contains the exclusion, eligibility, selection and award criteria for conferences other than Presidency conferences.

The indicative timetable for publishing the call for proposals for conferences in the Official Journal is the fourth quarter of 2011.

2.5. Direct grant agreements with international organisations

The total indicative amount for direct grants is estimated at EUR 2 633 000. Direct grants will be based on effective collaboration with the Commission.

According to Article 168(1) point (f) of the Implementing Rules, funding for actions with international organisations will be allocated through grant agreements without a call for proposals on topics specifically identified in this work plan. International organisations and their national or regional offices are not eligible for funding as main or associated beneficiaries under any calls for proposals. The maximum rate for EU co-financing is 60% of the eligible costs effectively incurred. In accordance with recital (33) of the Programme Decision, activities involving third countries not participating in the Programme shall not be considered eligible costs. However, travel and subsistence expenses for experts invited from or travelling to such countries can be considered eligible costs in duly justified, exceptional cases, where this directly contributes to the objectives of the Programme.

Funding can only be awarded to the following international organisations under this financing Decision:

- Council of Europe (CoE),
- International Agency for Research on Cancer (IARC),
- International Organisation for Migration (IOM),
- Organisation for Economic Co-operation and Development (OECD).

2.6. Procurement

The total indicative amount for procurement is estimated at EUR 14 463 980.

Calls for tenders are envisaged to be published in the first semester of 2012 in the Official Journal. Framework contracts and new service contracts will be used as indicated in this work plan.

2.7. Other actions

The total indicative amount for other actions is estimated at EUR 5 270 000.

These cover contributions paid by the EU as subscriptions to bodies of which they are members in the meaning of Article 108(2) point (d) of the Financial Regulation, an administrative agreement with the Joint Research Centre (JRC) and special indemnities paid to experts for their participation in meetings and work on scientific opinions under point 3.1.3.1 and advice on health systems under point 3.3.2.1.

2.8. EU payment to WHO Framework Convention on Tobacco Control

The European Union is full party to WHO Framework Convention on Tobacco Control (FCTC). Payment of the 2012 EU contribution to the FCTC will be made under budget line 17 03 05 "International agreements and membership of international organisations in the field of public health and tobacco control", and not from the Health Programme. The amount of this payment is based on the decision on the work plan and budget for the financial period

2012-2013 taken by the Fourth Conference of the Parties of the Convention in November 2010 (FCTC/COP/4/20).

The EU contribution is set at USD 145 225 for 2012. The FCTC Secretariat will manage the funds according to WHO financial rules.

3. PRIORITIES FOR 2012

Actions under this work plan are broadly geared towards supporting the delivery of EU priorities set out in the *Europe 2020 Strategy* and towards responding to legislative obligations and policy commitments. The *Smart growth* and *Inclusive growth* priorities under the *Europe 2020 Strategy* are of particular relevance for action proposed under this work plan. The objectives of the *Europe 2020 Strategy* are shared with those of the *EU Health Strategy*, which maintains that investing in health can boost innovation, create new skills and jobs and reduce inequalities in health.

In 2012 the Health Programme will contribute to the objectives of the following flagships under the *Europe 2020 Strategy*:

The Pilot Innovation Partnership on active and healthy ageing under the *Flagship Initiative Innovation Union*⁸ has inspired action under this work plan which enable European citizens to lead active, healthy and independent lives as long as possible. Actions will promote physical and mental health, including promoting better nutrition and physical activity, and preventing behaviour that is harmful to health. They will seek ways to prevent the onset of major and chronic diseases through action such as cancer screening. The provision of relevant advice and information supports Member States in their efforts to arrive at and maintain sustainable and efficient health care systems. Action is also taken to explore ways to develop innovative products and services that respond to the ageing challenge. All of these actions ultimately seek to contribute to the overall aim of the partnership to add an average of two years of healthy life for everyone in Europe.

*The European platform against poverty and social exclusion*⁹ of the *Europe 2020 Strategy* has inspired actions related to inequalities. These actions seek to improve access of vulnerable populations to healthcare, support their social inclusion and combat the discrimination they face. They contribute to reaching the EU target of reducing poverty and social exclusion by at least 20 million by 2020.

*The Agenda for new skills and jobs*¹⁰ provides the framework for work on health workforce. This action seeks to contribute to reaching the *Europe 2020 Strategy's* employment target for 2020 of 75% of the working-age population in work. It supports in particular the aims under priority 2 of the Agenda, namely equipping people with the right skills for employment.

Furthermore, this work plan responds to additional challenges where actions can provide real EU value-added. A safe and secure society is a prerequisite for economic growth and the well-being of citizens. A number of *cross-border health threats* in the past few years have clearly demonstrated the need and value-added of coherent and effective action at EU level.

⁸ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2010:0546:FIN:EN:PDF>

⁹ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2010:0758:FIN:EN:PDF>

¹⁰ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2010:0682:FIN:EN:PDF>

Actions proposed under this work plan focus on exploring and setting up efficient mechanisms for detecting and preventing the spread of different cross-border health threats, or minimising their impact. This work plan also proposes support for safe and secure systems and mechanisms in support of *EU legislation on the safety and quality of organs and substances of human origin, blood, and blood derivatives*. Actions seek to obtain and maintain the trust and confidence of EU citizens in this area. In the same way, *legislation in the area of cross-border healthcare* will be supported by targeted action.

Keeping people healthy and active for longer has a positive impact on productivity and competitiveness. Complementary actions are therefore foreseen on the main *risk factors for health such as nutrition, alcohol and smoking* as well as in the area of *major, chronic and rare diseases*.

Finally, several actions are proposed to comply with the Programme's third objective "Generate and disseminate health information and knowledge". Partly in cooperation with external partner organisations, a series of actions are foreseen to collect data, to produce scientific evidence and to effectively process information to citizens, stakeholders and policy makers.

3.1. Actions under the first objective 'Improve citizens' health security'

3.1.1. *Protect citizens against health threats – Develop risk management capacity and procedures, improve preparedness and planning for health emergencies (Point 1.1.3. in Annex to Programme Decision)*

Con formato: Numeración y viñetas

3.1.1.1. *Public health preparedness and response training and exercises*

The objective of this action is to improve and reinforce preparedness at EU level to respond to potential risks. Evaluations of the 2009 pandemic conducted at EU and Member States' level clearly demonstrate the need to reinforce preparedness by sharing best practices and further developing common tools at EU level. This action seeks to increase Member States' officials' knowledge of cross-border risks and management of the public health response to these, as well as of the effective use of related IT tools.

This action is composed of three work packages. The first should deliver two sessions of training and exercises for relevant Member States' officials on preparedness and response to serious cross-border health threats. The training and exercises will cover the responsibilities and roles of different stakeholders; preparedness; crisis communication and the implementation and use of IT tools. The second work package should continue the exchange of experts started in 2011 with the aim to share best practice and experience on topics relevant for crisis management between officials/stakeholders from the EU Member States. The third work package consists of developing a new e-learning module for the *Health Emergency & Diseases Information System (Hedis)* application and a description of the different roles and functions to complement those developed in 2010.

[Framework contract and call for tenders] Indicative amount: EUR 340 000

3.1.2. *Protect citizens against health threats – Develop strategies and mechanisms for preventing, exchanging information on and responding to health threats from communicable and non-communicable diseases and health threats from physical, chemical or biological sources, including deliberate release acts (Point 1.1.1. in Annex to Programme Decision)*

Con formato: Numeración y viñetas

3.1.2.1. Response coordination in the face of chemical events

The objective of this action is to ensure an efficient response to serious cross-border events caused by chemical agents through the setting up of an EU level pilot network. Such a network will ensure that experiences of and best practices adopted by one Member State following an incident benefit all Member States. It will enable an efficient and coherent EU level response to potentially devastating cross-border events. This is of particular value for Member States with less capacity and expertise to respond to chemical events. No formal arrangements to date exist at EU level to coordinate response to such events. The ad hoc arrangements used so far have clearly demonstrated the need and value-added of putting in place a structured mechanism to trigger risk assessment and coordination of measures at EU level. This action supports and underpins the *Health Security Initiative*, which is part of *Commission Work Programme 2011*¹¹. It will also be of key importance for the implementation of the new *International Health Regulations*.

This action should closely consider the experiences gained from the network for surveillance and control of communicable diseases created by Decision No 2119/98/EC of the European Parliament and of the Council of 24 September 1998 setting up a network for the epidemiological surveillance and control of communicable diseases in the Community¹². It should be built on: (a) draft document "SOPs for the HSC Network for the risk assessment and risk management of chemical events", (b) input provided by the tender awarded to the Health Protection Agency on "Establishing risk assessment networks of toxic industrial chemicals and radioactive threats and risks", which will become available through interim reports by the end of 2011 and the final report which will be available to inform the 2012 call for proposals, (c) lessons learnt from the three regional table top exercises on chemical events planned for 2011 and (d) deliverables from action "Developing an inventory for evidence-based, scientifically validated public health counter-measures in order to cover chemical and radio-nuclear hazards". This network should start functioning in pilot mode in 2013-2014. The piloting is a basis for considering the need for and scope of further action, including a more permanent mechanism.

[Project grants] Indicative amount: EUR 450 000

3.1.2.2. Response coordination in the face of radiological and radio nuclear events

Con formato: Numeración y viñetas

The objective of this action is to ensure an efficient response to serious cross-border events caused by radiological and radio nuclear agents through the setting up of an EU level pilot network. Such a network will ensure that experiences of and best practices adopted by one Member State following an incident benefit all Member States. It will enable an efficient and coherent EU level response to potentially devastating cross-border events. This is of particular value for Member States with less capacity and expertise to respond to radiological and radio nuclear events. No formal arrangements to date exist at EU level to coordinate response to

¹¹ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2010:0623:FIN:EN:PDF>
¹² OJ L 268, 3.10.1998, p. 1

such events. The ad hoc arrangements used so far have clearly demonstrated the need and value-added of putting in place a structured mechanism to trigger risk assessment and coordination of measures at EU level.

This action supports and underpins the *Health Security Initiative*, which is part of *Commission Work Programme 2011*. It will also be of key importance for the implementation of the new *International Health Regulations*. The analysis of the scope for and development of the special operational procedures (SOPs) for assessment of radiological events as well as an inventory of scientifically validated public health counter-measures in order to cover radio-nuclear hazards are to be finalised in 2011. This network should start functioning in pilot mode in 2013-2014. The piloting is a basis for considering the need for and scope of further action, including a more permanent mechanism.

[Project grants] Indicative amount: EUR 450 000

3.1.2.3. The impact on air transport of health threats due to biological, chemical and radiological agents

Con formato: Numeración y viñetas

The objective of this action is to ensure an efficient response at EU level to serious cross-border health threats on aircraft. No formal arrangements to date exist at EU level to coordinate response to such threats. The ad hoc arrangements used so far have clearly demonstrated the need and value-added of putting in place a structured mechanism to trigger risk assessment and coordination of measures at EU level. This action supports and underpins the *Health Security Initiative*, which is part of *Commission Work Programme 2011*. It will also be of key importance for the implementation of the new *International Health Regulations*.

This action should build on the results and experiences gained in the framework of projects financed by the Health Programme in the area of maritime transport, in particular "Assessing the Usefulness of an EU Ship Sanitation Programme and Coordinated Action for the Control of Communicable Diseases in Cruise Ships and Ferries" - SHIPSAN and "EU Ship Sanitation Training Network" - SHIPSAN TRAINET¹³.

This action should cover at least the main international airports in the EU Member States, with the involvement and collaboration of main airlines and airport authorities. This action should: (a) define the scope and Standard Operating Procedures (SOPs), in particular the role of the different authorities involved and a satisfactory coordination mechanism, (b) identify contact points for a network of public health authorities for the surveillance of and response to health threats due to communicable diseases and other threats which could impact on international conveyance areas at designated airports, (c) assist Member States and their airport authorities to develop core capacities and to implement the new *International Health Regulations*, with a particular focus on the implementation of core capacity requirements for the surveillance of and response to health threats due to communicable diseases and other cross-border threats which could impact on international conveyance areas at designated airports, (d) explore the impact on additional requirements for airport infrastructure, both in terms of personnel and equipment and (d) based on the experience in the maritime transport sector, create a network of public health authorities responsible for civil air transportation, with authority over at least the main international airports in the Member States, with the involvement and collaboration of airlines. Consistency with similar measures adopted at the

¹³ <http://www.shipsan.eu/>.

level of International Civil Aviation Organization (ICAO) or European Civil Aviation Conference (ECAC) has to be ensured in order to avoid duplication.

In the first phase a network should be created covering at least the main hub airports in the EU Member States (minimum 8 Member States and around 10 airports) with the involvement and collaboration of major European airlines (minimum 8 airlines with a total number of around 300 vectors). In the second phase, a set of SOPs and procedures for consultation should be agreed and tested. Finally, a limited number of events should be followed up and evaluated. Core capacity development for surveillance and response and need assessment should be carried out in parallel. This network should start functioning in pilot mode in 2013-2014. The piloting is a basis for considering the need for and scope of further action, including a more permanent mechanism.

[Project grants] Indicative amount: EUR 600 000

3.1.2.4. The impact on maritime transport of health threats due to biological, chemical and radiological agents

Con formato: Numeración y viñetas

The objective of this action is to create an integrated and sustainable strategy at EU level for safeguarding the health of travellers and crew of passenger and cargo ships and preventing the cross-border spread of diseases. Control of and response to serious cross-border health threats, such as communicable diseases or threats from chemical, biological and radiological agents, through maritime transport is a cross-border issue that needs to be addressed at EU level. Incoming migration through the sea borders also makes improving communicable disease surveillance and monitoring of maritime transport essential.

This action will support the implementation of Decision No 2119/98/EC of the European Parliament and of the Council of 24 September 1998 setting up a network for the epidemiological surveillance and control of communicable diseases in the Community and its implementation measures, such as Commission Decision of 22 December 1999 on the early warning and response system for the prevention and control of communicable diseases under Decision No 2119/98/EC of the European Parliament and of the Council (2000/57/EC)¹⁴, Directive 2010/65/EU of the European Parliament and of the Council of 20 October 2010 on reporting formalities for ships arriving in and/or departing from ports of the Member States and repealing Directive 2002/6/EC¹⁵, and the new *International Health Regulations*. It also supports the enforcement of Council Directive 2009/13/EC of 16 February 2009 implementing the Agreement concluded by the European Community Shipowners' Associations (ECSA) and the European Transport Workers' Federation (ETF) on the Maritime Labour Convention, 2006, and amending Directive 1999/63/EC¹⁶.

This action should build on the results and experiences gained in the framework of projects financed by the Health Programme in the area of maritime transport, in particular "Assessing the Usefulness of a EU Ship Sanitation Programme and Coordinated Action for the Control of Communicable Diseases in Cruise Ships and Ferries" - SHIPSAN and "EU Ship Sanitation Training Network" - SHIPSAN TRAINET.

¹⁴ OJ L 21, 26.1.2000, p. 32

¹⁵ OJ L 283, 29.10.2010, p. 1

¹⁶ OJ L 124, 20.5.2009, p. 30

This action should focus on: (a) operational functioning of the communication platform developed by the SHIPSAN project which will allow responding to coordination needs for real events identified on board cruise ships, (b) extension to cargo ships of a suitable and sustainable mechanism for guidance, updating of technical guidelines, training packages, exercise programmes and assessment guidance under the ship sanitation control certificates developed by the SHIPSAN project. This will include a permanent link to the existing mechanisms for communicable disease control in ships under Decision 2119/98/EC and its implementing measures, (c) training for staff on board cargo ships, public health staff in ports, and officials responsible for maintaining the link between ships, port authorities and public health authorities responsible for notifying other Member States, the Commission and the European Centre for Disease Control, (d) a mechanism enabling risk assessment and support to risk management activities and (e) examining the feasibility of using the SHIPSAN project to implement the Maritime Declaration of Health in an electronic format as set out in Directive 2010/65.

[Joint action] Indicative amount: EUR 1 800 000

3.1.2.5. Improvement of HIV prevention in Europe

Con formato: Numeración y viñetas

The objective of this action is to promote the integration of quality assurance (QA) and quality improvement (QI) practices into HIV prevention programmes with the aim of improving the effectiveness of HIV prevention programmes. More effective prevention programmes will help reduce the number of new HIV infections in Europe. They will also contribute to the fight against discrimination and social exclusion, which people affected with HIV often experience.

This action supports the implementation of Commission Communication COM(2009)569 final of 26 October 2009 *Combating HIV/AIDS in the European Union and neighbouring countries, 2009-2013*¹⁷. This Communication provides the framework for supporting national strategy development and steers HIV policy coordination between the Member States. It specifically focuses on more effective prevention to tackle HIV transmission. This action, together with other projects related to HIV prevention, translates into action the prevention targets defined in the HIV action plan for 2009-2013¹⁸. This joint action will directly contribute to reaching the *EU 2020 Strategy's* goal of reducing poverty and social exclusion across Europe, with the aim "to overcome discrimination and increase the integration of people with disabilities, ethnic minorities and immigrants and other vulnerable groups". People most at risk of HIV often belong to these groups.

The proposed joint action would cover the development and mainstreaming of methodologies and tools for QA/QI in HIV prevention. This would include: (a) development and validation of a charter of standards and principles for QA and QI by key stakeholders, (b) dissemination of these standards, (c) monitoring their mainstreaming into prevention strategies and actions with a particular focus on the key priority groups identified in the EU strategy, (d) building a sustainable network of organisations following up the implementation of QA/QI in HIV prevention programmes which could provide advice on QA/QI in HIV prevention and (e) identifying and supporting evidence based demonstration pilots.

¹⁷ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:52009DC0569:EN:NOT>

¹⁸ http://ec.europa.eu/health/sti_prevention/docs/eu_communication_2009_action_en.pdf

Outcomes would include a validated charter on quality assurance and improvement in HIV prevention programmes for implementation across Europe and beyond; a guide on the successful implementation of HIV prevention programmes; an analysis of effective dissemination channels for public health information; a network of quality assurance and HIV prevention experts; and a framework for monitoring and assessing the impact of HIV prevention programmes.

This action will contribute to the development and implementation of more effective HIV prevention programmes, which can also be adapted to other regions.

[Joint action] Indicative amount: EUR 1 500 000

3.1.3. *Improve citizens' safety – Scientific advice (Point 1.2.1 in Annex to Programme Decision)*

3.1.3.1. Scientific and technical assistance for the functioning of the Commission's Scientific Committees and communication on risks, including special indemnities

The objective of this action is to provide the Commission with independent and high quality advice on health risks. This contributes to ensuring a robust scientific basis for EU policies and measures in line with better regulation. Such advice is provided by the Scientific Committees in accordance with Commission Decision 2008/721/EC of 5 August 2008 setting up an advisory structure of Scientific Committees and experts in the field of consumer safety, public health and the environment and repealing Decision 2004/210/EC¹⁹. This action contributes to increasing the role of science in EU policy debate and it helps to inform citizens of risks. It also enables stakeholders and the general public to better understand EU policies and related proposals. This action consists of two components: special indemnities to experts for their work on scientific opinions, and scientific and technical assistance and risk communication. Special indemnities are paid to experts for their work on scientific opinions as provided for in Commission Decision 2008/721/EC.

[Other actions] Indicative amount: EUR 270 000

Scientific and technical assistance for the functioning of the Scientific Committees and risk communication includes: (a) search, analysis and synthesis of scientific literature, (b) preparation of layman versions of scientific opinions, (c) preparation of summaries, (d) data search, (e) establishment of the bibliography of topics addressed by the Committees and (f) revision of texts. This support is necessary, as members of the Committees do not benefit from any support from their organisations. It also covers the organisation of scientific hearings, working meetings and thematic workshops.

[Calls for tenders] Indicative amount: EUR 230 000

Eliminado: <#>Protect citizens against health threats – Develop risk management capacity and procedures, improve preparedness and planning for health emergencies (Point 1.1.3. in Annex to Programme Decision)¶
<#>Public health preparedness and response training and exercises¶
The objective of this action is to improve and reinforce preparedness at EU level to respond to potential risks. Evaluations of the 2009 pandemic conducted at EU and Member States' level clearly demonstrate the need to reinforce preparedness by sharing best practices and further developing common tools at EU level. This action seeks to increase Member States' officials' knowledge of cross-border risks and management of the public health response to these, as well as of the effective use of related IT tools.¶
This action is composed of three work packages. The first should deliver two sessions of training and exercises for relevant Member States' officials on preparedness and response to serious cross-border health threats. The training and exercises will cover the responsibilities and roles of different stakeholders; preparedness; crisis communication and the implementation and use of IT tools. The second work package should continue the exchange of experts started in 2011 with the aim to share best practice and experience on topics relevant for crisis management between officials/stakeholders from the EU Member States. The third work package consists of developing a new e-learning module for the *Health Emergency & Diseases Information System* (Hedis) application and a description of the different roles and functions to complement those developed in 2010. ¶
[Framework contract and call for tenders] . Indicative amount: EUR 340 000¶

Con formato: Numeración y viñetas

¹⁹ OJ L 241,10.9.2008, p. 21

3.1.4. *Improve citizens' safety – Safety and quality of organs and substances of human origin, blood, and blood derivatives (Point 1.2.2 in Annex to Programme Decision)*

3.1.4.1. Monitoring the implementation of EU legislation on blood, blood components and tissues and cells

The objective of this action is to assess Member States' implementation of EU legislation with regard to blood and blood components and tissues, and produce related reports on the state of play. The relevant pieces of legislation are: (a) Directive 2002/98/EC of the European Parliament and of the Council of 27 January 2003 setting standards of quality and safety for the collection, testing, processing, storage and distribution of human blood and blood components and amending Directive 2001/83/EC²⁰ and related implementing measures²¹ and (b) Directive 2004/23/EC of the European Parliament and of the Council of 31 March 2004 on setting standards of quality and safety for the donation, procurement, testing, processing, preservation, storage and distribution of human tissues and cells²² and related implementing Directives²³:

The collection and supply of blood and blood components is a high-value activity for the Member States' public health systems, offering and supporting many treatment options. These activities also contribute to developments in the pharmaceutical sector. The risk of transmitting diseases is inherent to the use of blood and blood components and can lead to potential safety and quality risks. Directive 2002/98/EC and related implementing measures seek to respond to these concerns. The sector of tissues and cells is growing fast, providing an increasing number of treatments. It will contribute to economic growth as well as to the development of the pharmaceutical sector. This will only be possible if the safety and quality of collected substances of human origin can be guaranteed. Directive 2004/23/EC and related implementing Directives seek to respond to these concerns.

This action will deliver two reports containing an assessment of key points for all Member States. The resulting reports will contribute to (a) reports on Member States' experiences in implementing Directive 2004/23/EC, as required by Article 26(2) and Directive 2002/98/EC as required by Article 26(2), (b) identifying Member States with successful implementation and supporting Member States which have encountered problems, (c) helping enforce the

²⁰ OJ L 33, 8.2.2003, p. 30

²¹ Commission Directive 2005/62/EC of 30 September 2005 implementing Directive 2002/98/EC of the European Parliament and of the Council as regards Community standards and specifications relating to a quality system for blood establishments, OJ L 256, 1.10.2005, p. 41 and OJ L 287M, 18.10.2006, p. 359; Commission Directive 2005/61/EC of 30 September 2005 implementing Directive 2002/98/EC of the European Parliament and of the Council as regards traceability requirements and notification of serious adverse reactions and events, OJ L 256, 1.10.2005, p. 32 and OJ L 287M, 18.10.2006, p. 350; Commission Directive 2004/33/EC of 22 March 2004 implementing Directive 2002/98/EC of the European Parliament and of the Council as regards certain technical requirements for blood and blood components, OJ L 91, 30.3.2004, p. 25

²² OJ L 102, 7.4.2004, p. 48

²³ Commission Directive 2006/17/EC of 8 February 2006 implementing Directive 2004/23/EC of the European Parliament and of the Council as regards certain technical requirements for the donation, procurement and testing of human tissues and cells, OJ L 38, 9.2.2006, p. 40 and OJ L 330M, 28.11.2006, p. 162; Commission Directive 2006/86/EC of 24 October 2006 implementing Directive 2004/23/EC of the European Parliament and of the Council as regards traceability requirements, notification of serious adverse reactions and events and certain technical requirements for the coding, processing, preservation, storage and distribution of human tissues and cells, OJ L 294, 25.10.2006, p. 32 and OJ L 314M, 1.12.2007, p. 272

implementation of this legislation and (d) identifying systemic problems which may require changes in legislation. The estimated time of delivery for the reports is by end 2013.

[Call for tenders] Indicative amount: EUR 550 000

3.1.4.2. Facilitating collaboration on organ donation between national authorities in the EU

The objective of this action is to support Member States in organising optimal allocation and use/transplantation of donated organs through multilateral and bilateral arrangements and through transplantation in other Member States. This action supports the implementation of Commission Communication COM(2008)819/3 of 8 December 2008 *Action Plan on Organ Donation and Transplantation (2009-2015): Strengthened Cooperation between Member States*²⁴

This action seeks to set up an EU level IT platform for the multilateral exchange of organs. Most Member States have national allocation bodies to match available organs with potential recipients and ensure the optimal allocation and use of every organ. Some Member States have joined efforts within a multi-country exchange organisation, such as *Eurotransplant* and *Scandiatransplant*. However, not all organs can be matched, allocated and used within these countries or multi-country zones. This is particularly true for highly immunized patients, children and rare organs. An EU level platform that connects the existing organ allocation bodies in Europe will enable this. This action covers the development of protocols and agreed formats for easy and fast data exchange. Preparatory work has already been undertaken within the "Coordinating a European initiative among national organizations for organ transplantation" (COORENOR) project funded by the Health Programme. This will be developed further, a concrete platform will be set up and the number of Member States involved will be increased. Careful legal, financial and operational preparation leading to concrete agreements between Member States will contribute to the sustainability of the platform.

This action will also help national authorities to establish bilateral agreements to exchange organs between Member States. Not all Member States have transplant programmes for every type of organ. Establishing organ-specific bilateral agreements between Member States gives EU citizens' access to care in a transplant centre in another Member State that is specialised in the organ of their need. These organs can also be procured in one Member State and sent to another. Existing agreements have increased the mobility of patients and utilisation of organs in Europe. This action will explore existing practices, identify opportunities for bilateral agreements, help Member States develop bilateral agreements and establish an operational set-up. Work undertaken within the COORENOR project will contribute to this.

This action will also address issues which hinder EU citizens' to fully benefit from accessing transplantation programmes in other Member States. This action will deliver an overview of patient mobility patterns in the Member States with regard to organ transplantation and related problems together with proposals to address these. This action will also deliver an overview of consent systems and methods for the mutual understanding of these systems between the Member States in view of facilitating donation in other Member States when potential organ donors die outside their national borders. The estimated time of delivery for results is end 2015.

²⁴ http://ec.europa.eu/health/ph_threats/human_substance/oc_organ/docs/organs_action_en.pdf

[Joint action] Indicative amount: EUR 1 150 000

3.1.4.3. Dissemination of best practices in organ donation/transplantation

The objective of this action is to help effectively disseminate best practices identified in the field of donation and transplantation of organs, tissues, cells and blood through the Council of Europe (CoE). This action derives from several projects funded by the Health Programme and the work done by various working groups to identify and develop best practices in the EU. These cover in particular: (a) public awareness campaigns, (b) donor identification, recruitment and management, (c) living donation of organs, (d) quality practices in blood and tissue establishments, in particular on collection, testing, processing, storage and distribution, (e) monitoring the safety of human substances, (f) collaboration with intensive care units and (g) follow-up of post donation and post-transplant/transfusion.

Owing to its outreach and structure, CoE can significantly contribute to the dissemination of best practice and reach out to additional audiences. These include health professionals and establishments, represented in many of the expert groups managed by CoE, and representatives of competent authorities in its expert groups. These competent authorities are responsible for organising donation, transplantation and transfusion activities in the Member States.

To leverage this outreach and make sure additional groups are able to benefit from the knowledge developed with the help of EU funding, CoE will develop and implement a dissemination plan for different target groups and geographic coverage. Concrete actions may include conferences, platform building awareness campaigns, distribution of references through emailing/websites, publication of leaflets/guidance materials and training.

These activities will contribute to a better implementation of the safety and quality requirements as laid down in Directive 2010/53/EU of the European Parliament and of the Council of 7 July 2010 on standards of quality and safety of human organs intended for transplantation²⁵, Directive 2002/98/EC of the European Parliament and of the Council of 27 January 2002 on setting standards of quality and safety for the collection, testing, processing, storage and distribution of human blood and blood components; and its implementing legislation, and Directive 2004/23/EC of the European Parliament and of the Council of 31 March 2004 on setting standards of quality and safety for the collection, testing, processing, storage and distribution of human tissues and cells; and its implementing legislation. They will also contribute to improving the efficiency of systems and accessibility to substances of human origin, in particular for organs, in line with the Commission Action Plan on Organ donation and transplantation.

[Direct grant to CoE] Indicative amount: EUR 100 000

²⁵ OJ L 207, 6.8.2010, p. 14

3.2. Actions under the second objective 'Promote health'

3.2.1. Increasing healthy life years and promoting healthy ageing (Point 2.1.1. in Annex to Programme Decision)

3.2.1.1. Support to the European Innovation Partnership on active and healthy ageing

The objective of this action is to contribute to reaching the aims of the active and healthy ageing priority under the *Europe 2020 Strategy*. This action supports the implementation of the *European Innovation Partnership in the field of active and healthy ageing* set out in Commission Communication COM(2010) 546 final of 6 October 2010 on *Europe 2020 Flagship Initiative Innovation Union*.

This action focuses on a number of concrete activities in line with the *Strategic Implementation Plan of the Partnership*. It seeks to support the deployment of innovative solutions of care provision in terms of innovative policies and business models for collaborative and integrated care systems, based on a continuum of care approach. It will also focus on chronic disease management, addressing in particular patients with multiple chronic conditions. It will cover three different types of actions: (a) seed money for pilot projects on change of care delivery, (b) support for a partnership approach towards change in care delivery and (c) supporting older people's health.

a) Supporting change of care delivery

Support in the form of seed money will be provided in order to prepare and execute change in social and health care systems leading to provision of integrated care based on innovative business models and technologies. This action seeks to assist in change towards the implementation of integrated care systems which are based on patient-centred, coordinated, integrated and continuous care models. Based on existing evidence the care models will, in particular, address the management of chronic diseases. Integrated models will deliver on the reduction of long-term disability and frailty of patients with multiple chronic conditions and reduction of the unnecessary and avoidable hospitalisation. Apart from supporting the systems change, this action will also ensure the transfer of knowledge gained in the process of the change implementation to other relevant entities, i.e. entities responsible for care organisation and delivery across the EU.

b) Partnering for change

This action seeks to support stakeholder cooperation towards the change in social and care systems. Activities to be addressed through a partnership approach may include: (a) outlining new business models reflecting innovative solutions, in particular addressing the issue of management of multiple chronic conditions, (b) development of new care pathways along the continuum of care, (c) development of guidelines based on new solutions / business models, (d) development of training modules for care providers which reflect these new solutions / business models, (e) development of guidelines for informal care provision and (f) support of related public procurement modernisation, including functional specification for tenders, quality criteria, interoperability requirements, joint pre-commercial procurement, and promotion of life-cycle rentability approach to investment valuation. This action will focus on activities with proven commitment to implement its outputs in practice.

c) Supporting older people's health

This action seeks to maximise the impact of resources addressed to the health of older people, through (a) better collaboration and co-ordination, e.g. support and dissemination of models of good/best practice in supporting the health of ageing populations; strengthening data systems, (b) promotion of capacity building, e.g. development of health literacy programmes; gerontology training, (c) support to interventions that help prevent the onset of frailty and d) support to the the identification of measures to ensure that ageing considerations are taken into account in devising new health policies.

[Project grants] Indicative amount: EUR 3 571 820

3.2.2. *Identifying the causes of, addressing and reducing health inequalities within and between Member States in order to contribute to prosperity and cohesion; supporting cooperation on issues of cross-border care and patient and health professional mobility (Point 2.1.2. in Annex to Programme Decision)*

3.2.2.1. Fostering health provision for migrants, the Roma and other vulnerable groups

The objective of this action is to foster the access and appropriateness of health care services, health promotion and prevention to meet the needs of migrants, the Roma and other vulnerable ethnic minority groups, including irregular/illegal migrants.

This action has two components. The first focuses on the promotion of appropriate health care provision to migrants in the Southern borders of the EU thereby increasing public health safety in the EU in the longer run. This action is based on the results of the "Increasing Public Health Safety Alongside the New Eastern European Border Line" project funded by the first Public Health Programme in 2006. This action supports the implementation of Decision No 2119/98/EC of 24 September 1998 of the European Parliament and of the Council setting up a network for the epidemiological surveillance and control of communicable diseases in the Community; Commission Decision No 57/2000/EC of 22 December 1999 on the early warning and response system for the prevention and control of communicable diseases under Decision No 2119/98/EC of the European Parliament and of the Council; and Council Directive 2003/9/EC of 27 January 2003 laying down minimum standards for the reception of asylum seekers²⁶ and the new *International Health Regulations*. It also contributes to the Commission Communication COM (2011) 292 of 24 May 2011 *A dialogue for migration, mobility and security with the southern Mediterranean countries.*

Con formato: Izquierda, Espacio Antes: 0 pto, Después: 0 pto, No ajustar espacio entre texto latino y asiático, No ajustar espacio entre texto asiático y números

The second component focuses on the Roma and other vulnerable ethnic minority groups, including irregular/illegal migrants. This action will contribute to reaching the aims of the *Europe 2020 Strategy* on the need to reduce health inequalities. It makes a direct contribution to the implementation of Commission Communication COM(2010)758 final of 16 December 2010 *The European Platform against Poverty and Social Exclusion: A European framework for social and territorial cohesion*²⁷, Commission Communication COM (2009)567 final of 20 October 2009 *Solidarity in Health: Reducing Health Inequalities in the EU*²⁸, Commission Communication COM (2010)133 final of 7 April 2010 *The social and economic integration of the Roma in Europe*²⁹ and Commission Communication COM(2011) 173 final of 5 April 2011 *An EU Framework for National Roma Integration Strategies up to 2020*³⁰.

It will (a) establish a mechanism for networking and exchanging good practice between the Member States, accession countries and relevant international organizations on fostering the access and appropriateness of health care services, health promotion and prevention to meet the needs of migrants, the Roma and other vulnerable ethnic and minority groups, including irregular/illegal migrants, (b) document the legal and policy framework, including review of national health plans and support for the development and monitoring of national action plans for migrants/ethnic minorities to include a specific focus on the Roma, c) develop benchmarking criteria and consensus guidelines on good practice on access to care for the Roma and other vulnerable ethnic minority and migrant groups and d) review training and capacity building programmes in relation to ethnic/migrant health and development of a consensus framework for capacity building for professionals, including basic components of a training programme, operational aspects of delivery and evaluation. It will result in strengthened policies and initiatives at national and sub national levels to address the healthcare needs of the Roma, migrants and minority groups, and a contribution to the inclusion of the Roma, migrants and other vulnerable groups.

[Direct grant to IOM] Indicative amount EUR 1 533 000

3.2.2.2. Identifying best practices in tobacco control to reduce health inequalities

The objectives of this action are to analyse the consumption of tobacco in various groups in society and the role of tobacco use as a contributor to the current and future gap in health outcomes. It will also analyse the impact of the interventions taken by the EU, Member States and third countries in order to reduce tobacco-related inequalities. These measures target in particular lower educational, occupational and income groups, different gender and age groups and specific socially disadvantaged groups such as disabled persons, homeless people, young people with special needs and migrants. This action supports the revision of Directive 2001/37/EC of the European Parliament and of the Council of 5 June 2001 on the approximation of the laws, regulations and administrative provisions of the Member States concerning the manufacture, presentation and sale of tobacco products³¹ listed in Annex II to *Commission Work Programme 2011*. It also responds to the European Parliament resolution on reducing health inequalities in the EU (INI/2010/2089)³².

This action will provide a comprehensive picture of the challenges posed by tobacco-related inequalities throughout the EU, providing an evidence base and contribute to the sharing of best practices. Given that certain marginal groups are difficult to reach, it is useful for the Member States to learn from each other's experience and avoid using resources on measures that have proved ineffective. This action will deliver a study presenting a comprehensive analysis of current and future tobacco-related inequalities and an overview of the most cost-effective measures to address these. It will contain recommendations on integrating health equity considerations into tobacco-control policies and legislation at Member States' and EU level. Expected results will provide national and EU policy-makers with a thorough understanding of good practices in reducing tobacco-related inequalities. The estimated timeline for the delivery of the study is end 2013.

[Framework contract/call for tenders] Indicative amount: EUR 200 000

³¹ OJ L 194, 18.7.2001, p. 26

³² <http://www.europarl.europa.eu/oeil/FindByProcnum.do?lang=en&procnum=INI/2010/2089>

3.2.2.3. Study on patient empowerment in the context of the cross-border healthcare Directive

The objective of this action is to support the Member States in implementing Directive 2011/24/EU of the European Parliament and of the Council of 9 March 2011 on the application of patients' rights in cross-border healthcare³³. The transposition date of the Directive is 25 October 2013. Under Article 6 of the Directive Member States are required to designate one or more National Contact Points (NCPs) to provide patients with "appropriate information on all essential aspects of cross-border healthcare [that] is necessary in order to enable [them] to exercise their rights on cross-border healthcare in practice."

This action seeks to design and roll-out a prospective study aiming to assess how NCPs can best formulate and present information to patients. The assessment criteria to be used will address patient satisfaction, information retention and information understanding, notably consistency in patient choices. Research hypotheses will be formulated and relevant literature will be screened. A preliminary study design distinguishing primary/secondary outcomes to be measured in randomized patient groups will be drafted. The results of this study are to be translated into recommendations for Member States.

This action will contribute to patient empowerment by increasing clarity on patients' rights with regard to cross-border treatment; patient safety by providing information on healthcare providers, notably on the quality and safety standards of the healthcare they provide; and by enhancing Member States' co-operation on cross-border healthcare through the network of national contact points that will exchange information.

[Framework contract] Indicative amount: EUR 500 000

3.2.2.4. Forecasting health workforce needs for effective planning in the EU

The objectives of this action are to provide a platform for Member States to work together on forecasting health workforce needs and on workforce planning methodologies and to find possible solutions to address the shortage of health workforce in Europe. This action was announced in Commission Communication COM (2010)0682 final of 23 November 2010 *An Agenda for new skills and jobs: A European contribution towards full employment*³⁴. It will directly contribute to reaching the aims of priority 2 *Equipping people with the right skills for employment* set out in the Communication. Member States also requested the setting up of such a platform in Council Conclusions *on investing in Europe's health workforce of tomorrow: Scope for innovation and collaboration* adopted on 7 December 2010³⁵.

Comprehensive and integrated forecasting mechanisms and strategies would help Member States to assess the number and kind of health workforce their health systems require. Adequate forecasting and planning contributes to ensuring the sustainability of health systems and meeting current and future challenges. These include an ageing workforce and ageing patients; increased services to manage chronic conditions, mental health, long term care and social care; new patterns of health workforce and the growing migration of health workers across countries. Action at EU level can also add value in mapping the skills and competences

³³ OJ L 88, 4.4.2011, p. 45

³⁴ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2010:0682:FIN:EN:PDF>

³⁵ 3053rd Employment, Social policy, health and consumer affairs Council meeting

needed for the future and helping to equip health workers with the necessary education, as well as determining crucial factors for a satisfactory working environment.

This action aims to: (a) Provide information and exchange best practices about planning methodologies in use. It will provide analyses about the factors determining their success, including the local context, culture and workforce structure. A database of best practices and guidelines for improved modelling will be developed (2013-2014) and an EU level permanent platform will be created (2015), (b) Estimate future needs in terms of skills and competences of the health workforce and their distribution. A report about different methodologies used in the EU will be produced, together with user's guidelines on how to estimate future needs (2013), (c) Advise on how workforce-planning capacities can be built up in Member States (2014). This action will identify experts on workforce planning in Member States that can assist competent authorities in other Member States to build up workforce planning capacities. (d) Develop EU guidance on how donor and receiving countries can cooperate in order to find a mutually beneficial solution in terms of training capacities and circular mobility (2014-2015) and (e) Provide information on mobility trends of health professionals in Member States (2013-2015). Such collaboration has been initiated within different FP7 research projects, like PROMETHEUS³⁶ or RN4cast³⁷ but it needs to be further supported. The EU platform will also have this function. This action will also include a work package on how to sustain collaboration after the end of this action.

[Joint action] Indicative amount: EUR 3 000 000

3.2.3. *Addressing health determinants to promote and improve physical and mental health and taking action on key factors such as nutrition and physical activity, and on addiction-related determinants such as tobacco and alcohol (Point 2.2.1. in Annex to Programme Decision)*

3.2.3.1. Mental health and well-being

The objective of this action is to establish a process of structured work on mental health involving Member States, stakeholders in the health and other relevant sectors, and international organisations, in particular the WHO and the OECD. This action will directly contribute to the *Europe 2020 Strategy's* target on raising the employment rate, mental disorders being a leading cause of early retirement. This action builds on the 2009-2011 thematic conferences under the *European Pact for Mental Health and Well-being* launched under the Slovenian Presidency in 2008. It responds to the European Parliament resolution of 19 February 2009 on Mental Health (2008/2209(INI))³⁸ which welcomes the *European Pact on Mental Health and Well-Being* and recognises mental health and well-being as a priority for action. Council Conclusions on "The European Pact for Mental Health and Well-being: results and future action" adopted on June 2011³⁹ invite Member States and the Commission to set up a joint action on mental health and well-being under the Health Programme.

³⁶ <http://www.euro.who.int/en/home/projects/observatory/activities/research-studies-and-projects/prometheus>

³⁷ <http://www.m4cast.eu/en/index.php>

³⁸ <http://www.europarl.europa.eu/sides/getDoc.do?pubRef=-//EP//TEXT+TA+P6-TA-2009-0063+0+DOC+XML+V0//EN>

³⁹ 3095th Employment, social policy, health and consumers affairs

This joint action should develop a reference framework for commonly supported actions on promoting mental health and well-being and preventing mental health problems through health and social policies and life settings. Aspects to be addressed include: (a) tackling mental disorders, with a particular focus on depression, through health and social systems, including the de-institutionalisation of health services, their integration into local communities and their networking with social services, (b) the availability and training of health workforce, (c) promoting healthy environments in workplaces and (d) promoting the mental health and well-being of children and young people through the integration of mental health into school settings and local community environments, parents' awareness raising activities and training of school professionals.

This action should have three components. The first, "Mental Health Action Framework" will develop commonly endorsed reference frameworks for action on mental health through health systems and social policy as well as in key life environments such as schools and workplaces. Peer reviews will be used as an instrument to learn from each other. Coordinated awareness-raising activities will be considered. The second component, "Mental health Compass", further develops the "EU Compass for Action on Mental Health and Well-being" into a mechanism to collect, review and disseminate good practices from health and other key sectors. The third component, "Mental Health Information", will focus on collecting data on the mental health status in Member States. The impact of social determinants will be considered and vulnerable groups will be identified. A study on the importance of mental health and well-being for public health in the EU and its relevance for the *Europe 2020 Strategy* will be commissioned.

This action will support Member States in (a) improving their mental health services and strengthening promotion and prevention, (b) fostering partnerships between the health sector and other sectors in view of promoting mental health and well-being, (c) preventing mental disorders and providing support to people with mental disorders, (d) managing the transition from institutional care services to community based care models, (e) promoting the social inclusion of people with mental health problems and tackling their discrimination and stigmatisation and (f) developing mental health indicators. The outcomes of this action should be summarised in a report in 2015 proposing reference frameworks for action on mental health and options for further EU level action.

[Joint action] Indicative amount: EUR 1 500 000

3.2.3.2. Local community including school based initiatives to prevent overweight and obesity among children and adolescents

The objective of this action is to contribute to the reduction of overweight and obesity related diseases among young people, thereby improving employability, productivity and reducing long term absenteeism in line with the *EU 2020 Strategy's* youth, employment and inclusion objectives. This action supports the implementation of the EU strategy on overweight and obesity set out in COM(2007) 279 final of 30 May 2007 *A Strategy for Europe on Nutrition, Overweight and Obesity related health issues*⁴⁰ and directly responds to discussions in the *High Level Group on Nutrition and Physical Activity* and at the *EU Platform for Action on Diet, Physical Activity and Health*.

⁴⁰ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2007:0279:FIN:EN:PDF>

Measures under this action seek to develop innovative interventions and campaigns aimed at promoting a balanced diet and physical activity for children and adolescents in relevant settings. They seek to facilitate the exchange of know-how in the design of interventions targeting children and adolescents, with a particular focus on socially deprived groups. They also seek to scale up proven successful initiatives targeting local communities and schools and to develop innovative media campaigns targeting children and adolescents. The EPODE⁴¹ or Shape up⁴² partnership approaches involving all civil society and other local actors under the lead of local and/or school authorities could serve as examples. Comprehensive campaigns including a communication and educational dimension focusing on balanced nutrition and physical activity for adolescents anchored on solid public private partnerships targeting several Member States or regions should be considered. This action intends to support projects which would network existing initiatives, identify and disseminate good practice and support the development and scaling up of local/regional partnership initiatives, including campaigns targeting the promotion of balanced diets and active lifestyles towards children, particularly in regions where these cooperative approaches are not yet fully in place. The resulting good practice should be presented so that it can be easily applied in different settings across Member States and feed WHO Euro good practices material.

These measures are expected to increase local community based interventions in the EU. They are expected to generate a positive change in the behaviour of children and adolescents, in particular in socially deprived groups. Ultimately this action seeks to contribute to the decrease in overweight/obesity rates or other validated proxy indicators in the targeted population of children and adolescents by 2020.

[Project grants] Indicative amount: EUR 1 200 000

3.2.3.3. Evaluation of the Strategy for Europe on Nutrition, Overweight and Obesity related health issues

The objective of this action is to evaluate the implementation of the six-year *Strategy for Europe on Nutrition, Overweight and Obesity related health issues* set out in COM(2007) 279 final of 30 May 2007 *A Strategy for Europe on Nutrition, Overweight and Obesity related health issues*. The strategy aims to set out an integrated EU approach to this key public health concern which places a considerable burden on health systems and the economy as a whole due to work absenteeism, loss of productivity and early retirement. EU action in this area contributes to helping Member States to achieve a high level of health of EU citizens thereby reducing the costs of ill health. This will contribute to reaching the *Europe 2020 Strategy's* goals on better jobs, innovation and active and healthy ageing.

This action covers (a) analysing evidence based information on the implementation of the strategy by Member States and the Commission, (b) assessing the contribution from EU stakeholders, in particular within the *EU Platform for Action on Diet, Physical Activity and Health*, (c) assessing the contribution of EU policies, (d) assessing the strategy's support to Member States, and (e) supporting the impact assessment process leading to the follow up to the strategy. This action should provide a significant input into policy decisions on follow-up action. The estimated timeline for the delivery of this action is one year.

[Framework contract] Indicative amount: EUR 300 000

⁴¹ <http://www.epode.org/>

⁴² http://ec.europa.eu/eahc/phea_ami/pdbview40/printing/print_prjdet.cfm?prjno=2005316

3.2.3.4. Action to prevent and reduce harm from alcohol

The objectives of this action are to protect children and young people from harmful alcohol consumption and to raise awareness of lower-risk consumption patterns. This action will directly contribute to reaching the aims of the *Europe 2020 Strategy's* goals by enhancing productivity and employment through better workforce health, preventing diseases later in life and combating social exclusion through preventing dropping-out from education and loss of ability to work. It supports the implementation of the EU alcohol strategy set out in Commission Communication COM (2006)625 final of 24 October 2006 *An EU strategy to support Member States in reducing alcohol related harm*⁴³. It also responds to Council conclusions of 1 December 2009 on alcohol and health (2009/C 302/07)⁴⁴ which invite the Commission to consider further steps to protect children, adolescents and young people from alcohol-related harm.

This action has two components. The first focuses on assessing the extent and effectiveness of the use of alcoholic product labels to communicate health-related information. Alcoholic beverage labels are increasingly used in the EU, mainly on a voluntary basis by alcohol producers. However, there is not adequate information on the extent of these practices or on their effectiveness in terms of visibility and information value. Previous summaries of voluntary labelling schemes have relied on information gathered through surveys. Research towards a comprehensive picture involves fieldwork to gather representative samples of alcoholic beverage packages from retail outlets across the Member States to assess the effectiveness of health-related information. With regard to curbing underage drinking, legal age limits for selling and serving alcoholic beverages are amongst the most effective instruments. Previous work on best practices in increasing compliance with age limits has mainly focussed on initiatives of NGOs or operators in the alcoholic beverage sector. However, in order to have a comprehensive picture, experiences from initiatives involving local or national authorities should also be taken into account, especially as research findings suggest that results may be best achieved through multi-stakeholder cooperation. Examples of good practices will be collected and the exchange and dissemination of good practices will be facilitated. This action will enable Member States, NGOs and industry to focus their ongoing or planned activities on best practice approaches on labelling and enforcement of age limits for selling and serving alcoholic beverages. The estimated timeline for the delivery of this action is one year.

[Call for tenders] Indicative amount: EUR 200 000

The second component focuses on up to three pilot projects aimed at mainstream youth organisations at EU level. The aim is to develop good practice and working methods to support healthy choices and enhance life skills to prevent alcohol-related harm integrated into regular youth activities, or through peer support. This action should result in a better overview of good practices and methods to prevent alcohol-related harm in the work of mainstream youth organisations.

[Project grants] Indicative amount: EUR 500 000

⁴³ http://eur-lex.europa.eu/LexUriServ/site/en/com/2006/com2006_0625en01.pdf
⁴⁴ OJ C 302, 12.12.2009, p. 15

3.2.3.5. Monitoring of the *European Platform for action on diet, physical activity and health* as well as the *European Alcohol and Health Forum*

The objective of this action is obtaining an independent analysis of and information about the progress of the *Platform for action on diet, physical activity and health* and the *European Alcohol and Health Forum* led by key stakeholders and main economic operators willing to support Member States in improving the health of European citizens. It is in support of the *Strategy for Europe on Nutrition, Overweight and Obesity related health issues* as set out in COM(2007) 279 final and the *EU Strategy to support Member States in reducing alcohol related harm* as set out in COM(2006) 625 final.

This action will contribute to: (a) gaining a better understanding of the Platform and Forum members' commitments and their relevance for the aims of the Platform and the Forum, (b) fine-tuning these commitments, (c) understanding what needs to be done and how to better integrate all commitments, (d) engendering wider stakeholder trust and (e) eventually duplicating good practices. This action will facilitate plenary discussions on the Platform and Forum's commitments in each key area. These are consumer information, including labelling; education; promotion of physical activity; marketing and advertising; composition of foods, availability of healthy food options, and portion sizes; and advocacy, policy work and information exchange in view of improving the impact of individual initiatives; as well as on key areas of the Alcohol Forum's action as developed in its charter. This action also covers annual reports on the Platform and Forum's achievements including individual commitments and the Platform and Forum's commitments. The estimated timeline for deliverables is two years.

[Framework contract] Indicative amount: EUR 200 000

3.2.3.6. Communication campaign aimed at encouraging smoking cessation

The objectives of this action are raising awareness about tobacco damage and encouraging people to quit smoking. It targets young adults, groups within society where smoking prevalence is higher than average, and disadvantaged groups. The gender aspect will also be considered. This action underpins EU efforts in the area of tobacco control and supports the implementation of Directive 2001/37/EC of the European Parliament and of the Council of 5 June 2001 on the approximation of the laws, regulations and administrative provisions of the Member States concerning the manufacture, presentation and sale of tobacco products, Directive 2003/33/EC of the European Parliament and of the Council of 26 May 2003 on the approximation of the laws, regulations and administrative provisions of the Member States relating to the advertising and sponsorship of tobacco products⁴⁵, Directive 2010/13/EU of the European Parliament and of the Council of 10 March 2010 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the provision of audiovisual media services⁴⁶ and Council Recommendation 2003/54/EC of 2 December 2002 on the prevention of smoking and on initiatives to improve tobacco control⁴⁷. It also contributes to a healthier, more efficient workforce and an active and healthy ageing in line with the aims of the *Europe 2020 Strategy*.

⁴⁵ OJ L 152, 20.6.2003, p. 16

⁴⁶ OJ L 95, 15.4.2010, p. 1

⁴⁷ OJ L 22, 25.1.2003, p. 31

This action will complement and underpin smoking cessation efforts undertaken by Member States. It will convey a coherent message in all Member States, generating economies of scale and ultimately contributing to reducing health inequalities across the EU. Specific actions will be developed and implemented in cooperation with Member States' health authorities in order to secure synergies and ensure effective coordination.

The campaign is a sustained structural effort with a total duration of three years. The first year of the campaign (2011) saw the development and up-take of the concept. The second year (2012) focuses on the rewarding of ex-smokers, and the third year (2013) showcases ex-smokers' testimonials so as to further promote smoking cessation and demonstrate the first results of the campaign. Most suitable media will be used to target specific groups, such as women in lower socio-economic groups. The components of this action under this work plan are: (a) awareness-raising events with a European dimension such as road shows, stands, and workshops at the work place, (b) publicity material, such as publications and videos, to help reach the aims of the campaign and (c) maintaining and feeding a website and an icoach tool in all official languages of the European Union. It also covers testing, scientific advice, data collection, evidence and evaluation.

[Call for tenders] Indicative amount: EUR 8 913 980

3.2.3.7. Scientific and technical support to the EU Health Forum

The objective of this action is to provide scientific and technical support to the "European Health Forum". Active involvement of health stakeholders in policy development, with a specific reference to the "Health Forum", is set out in Commission Communication COM(2007) 630 final of 23 October 2007 *Together for Health: A Strategic Approach for the EU 2008-2013*. This action also contributes to the aims of the *European Innovation Partnership in the field of active and healthy ageing*.

This action covers organising and supporting activities of the "EU Health Policy Forum" and of the "Open Forum" in 2013. This includes scientific and technical work related to the following strategic priority areas: (a) economic change: health as an economic driver and cost, (b) demographic change: its impact on health systems and health needs, (c) environmental change: its impact on organisation of health services and impact on health, (d) social change and public health and (e) technological change: innovation and development.

This action enables an active engagement of health stakeholders and their meaningful input into EU policies, in particular to the *European Innovation Partnership Initiative on active and healthy ageing*. The work of the "Health Forum" also helps to ensure that EU actions on health are relevant to and understood by the public health scene at large.

[Framework contract] Indicative amount: EUR 100 000

3.2.4. *Prevention of major and rare diseases (Point 2.2.2. in Annex to the Programme Decision)*

3.2.4.1. Providing information on cancer and pursuing efforts towards better cancer prevention and control

The objectives of this action are to obtain the latest available information on the cancer burden in the EU and to advance work on cancer prevention and control on the basis of the latest scientific developments and knowledge. This action directly contributes to reaching the

aims of the *European Innovation Partnership in the field of active and healthy ageing*. Given the limited resources and expertise available at national level, action at EU level creates significant economies of scale.

This action responds to the need to ensure the provision of accurate and comparable data on cancer incidence, prevalence, cure, survival and mortality in the EU as set out in Commission Communication COM(2009) 291 final of 24 June 2009 *on Action Against Cancer: European Partnership*⁴⁸. This data is a basis for the development of an effective cancer policy.

It also responds to the need to update cancer screening guidelines as set out in Council Recommendation of 2 December 2003 on cancer screening (2003/878/EC)⁴⁹. The aim is to provide a new edition of the *European Guidelines for quality assurance in breast cancer screening and diagnosis* in accordance with the latest scientific developments. The estimated timeline for delivery is three years.

It also seeks to develop the Voluntary European Accreditation Scheme for Breast Cancer Service. This is in response to Council Conclusions of 10 June 2008 *on reducing the burden of cancer*⁵⁰ and EP requests such as the European Parliament Written Declaration of 14 December 2009 *on the fight against breast cancer in the European Union* (0071/2009). The estimated timeline for delivery is 3 years.

[Administrative agreement with JRC] Indicative amount: EUR 3 500 000

This action will also provide training on digital mammography for health professionals involved in the implementation of the screening programmes based on the results of the "European Cooperation on Development and Implementation of Cancer Screening and Prevention Guidelines" project⁵¹. This covers the preparation and provision of two training courses. This action contributes to Council Recommendation of 2 December 2003 on cancer screening (2003/878/EC). The estimated timeline for delivery is one year.

[Direct grant to IARC] Indicative amount: EUR 500 000

This action will also seek to benchmark comprehensive cancer care that provides interdisciplinary treatment for patients, and provide examples of best practice in the area of comprehensive cancer care. This is in response to Commission Communication COM(2009) 291 final of 24 June 2009 *on Action Against Cancer : European Partnership* which aims to reduce cancer inequalities by 70% by 2020.

[Project grants] Indicative amount: EUR 500 000

3.2.4.2. Preventing chronic diseases

The objective of this action is to assist the Member States to develop and implement more cost-effective policies on chronic disease prevention.

This action seeks to support projects that examine the cost-effectiveness of integrated approaches to chronic disease prevention with a particular focus on diabetes, cardiovascular

⁴⁸ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2009:0291:FIN:EN:PDF>

⁴⁹ OJ L 327, 16.12.2003, p. 34

⁵⁰ http://www.eu2008.si/en/News_and_Documents/Council_Conclusions/June/0609_EPSCO-cancer.pdf

⁵¹ http://ec.europa.eu/eahc/phea_ami/pdbview40/printing/print_prjdet.cfm?prjno=2006322

diseases or respiratory diseases. This should include the cost-effectiveness of different interventions to prevent, screen and treat chronic diseases. Projects should also consider an emphasis on reducing health inequalities and the effect on populations with the highest rates of premature death. Work should be focused on economic evaluation, in particular cost-effectiveness analysis, and estimates for scaling up to national and international levels.

By contributing to reductions in premature mortality and morbidity, including in vulnerable groups, this action will contribute to achieving the aims of the *European Innovation Partnership in the field of active and healthy ageing*, the *Europe 2020 Strategy's* objectives on inclusive growth and poverty reduction, and the objectives of Commission Communication COM (2009)567 of 20 October 2009 *Solidarity in health: reducing health inequalities in the EU*. It also responds to Council conclusions: “Innovative approaches for chronic diseases in public health and healthcare systems” adopted on 7 December 2010⁵². This action should be informed by and contribute to the implementation of the outcome document from the UN high level special session on Non Communicable Diseases.

[Project grants] Indicative amount: EUR 1 400 000

3.2.4.3. Support to European rare diseases information networks

The objective of this action is to support the setting up of new rare disease registers or rare disease information networks. This action contributes to the implementation of Commission Communication COM (2008) 679 final of 11 November 2008 *on Rare diseases: Europe's challenges*⁵³, Council Recommendation of 8 June 2009 on an action in the field of rare diseases (2009/C 151/02)⁵⁴.

Rare disease registries or information networks constitute key instruments to increasing knowledge on rare diseases and to developing clinical research. They are the only way to pool data in order to achieve a sufficient sample size for epidemiological research and/or clinical research. Owing to the small size of samples at national level, these registers or information networks can only be created at EU level. Collaborative efforts to establish data collection and maintain them will be considered, provided that these resources are open and accessible. Registration of patients constitutes a basis for any further action to improve their quality of life. It is necessary for the designation of orphan drugs, for establishing appropriate research priorities as well as for the future designation and accreditation of European Reference Networks (ERN) for rare diseases. This action will also contribute to the reflection process on criteria for the designation of ERN in the framework established by Directive 2011/24/EU of the European Parliament and of the Council of 9 March 2011 on the application of patients' rights in cross-border healthcare. Priority areas for this action are rare tumours, rare anaemias, cerebral palsies, neuromuscular diseases, cystic fibrosis, rare neurological disorders and rare syndromes associated with autism. Other rare diseases may also be considered. This action seeks to co-finance at least five networks.

[Project grants] Indicative amount: EUR 4 500 000

⁵² 3053rd Employment, social policy, health and consumer affairs Council meeting
⁵³ <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=COM:2008:0679:FIN:EN:PDF>
⁵⁴ OJ C 151, 3.7.2009, p. 7

3.3. Actions under the third objective "Generate and disseminate health information and knowledge"

3.3.1. European Health Information System (Point 3.2.1 in Annex to Programme Decision)

3.3.1.1. Evaluation of the use and impact of indicators developed by the Joint Action for European Community Health Indicators and Monitoring

The objective of this action is to evaluate the use and impact of the indicators developed by the "Joint Action for European Community Health Indicators and Monitoring" financed by the Health Programme under the work plan for 2009. The European Community Health Indicators (ECHI) are the main component of the European health monitoring system, which enables the Commission and Member States to identify and exchange best practices as set out in Article 168 of the TFEU, and to assess the performance and sustainability of their health systems as set out in the *Europe 2020 Strategy*. This action seeks to assess the extent to which these indicators are used in decision-making in the Member States and at EU level. It will analyse how Member States use ECHI indicators in monitoring and evaluating their health policies and in assessing the performance of their health systems, with a particular focus on sustainability.

[Framework contract] Indicative amount: EUR 100 000

3.3.1.2. Collection and dissemination of health information via cooperation with the Organisation for Economic Cooperation and Development

The objective of this action is to collect, through cooperation with the Organisation for Economic Cooperation and Development (OECD), information essential for policy-making in the areas of health care and health systems. This covers in particular: (a) information for the *European Innovation Partnership in the field of active and healthy ageing* that will pilot innovative approaches to health and social care delivery for an ageing population, (b) responding to the demand of Member States for support and advice regarding the sustainability of national health systems by investigating the cost-effectiveness of prevention measures and the effectiveness, efficiency and impact of health interventions, and (c) developing and promoting key indicators in health care and health care systems.

Eliminado: This action supports reaching the aims of the *European Innovation Partnership in the field of active and healthy ageing*.

This action has two work packages. The first work package focuses on the assessment of the cost-effectiveness of chronic disease prevention activities and the overall economic implications of chronic diseases comparing alternative policy/intervention scenarios for future chronic disease prevention policies. It should include interventions relating to the principle risk factors for major chronic diseases (smoking, nutrition, physical activity and harmful alcohol consumption) as well as chronic disease prevention/management programmes for cancer, cardiovascular diseases, diabetes, mental disorders and chronic respiratory diseases. It will develop a typology of the breadth and depth of health promotion and prevention interventions with a particular focus on alcohol, smoking, nutrition and physical activity. It will include an evaluation of the performance of the above interventions in light of the OECD Health Data on non medical determinants of health – food, alcohol, tobacco consumption and body weight – under the aspect of how this could influence chronic diseases and their economic impact. It will infer the quality of primary care systems in meeting the needs of people with chronic health conditions by considering their performance in light of selected population based quality measures. It will also review the role and potential impact of disease management programmes and pay for performance and other incentive schemes.

The second work package will take further work on patient safety indicators undertaken by the Commission and the OECD within the "Health Care Quality Indicators" project. This action responds to Council Recommendation of 9 June 2009 on patient safety, including the prevention and control of healthcare associated infections (2009/C 151/01)⁵⁵, which recommends the development of a set of reliable and comparable indicators in order to facilitate mutual learning, taking into account the work of relevant international organisations. This action also contributes to the implementation of Directive 2011/24/EU of the European Parliament and of the Council of 9 March 2011 on the application of patients' rights in cross-border healthcare. This work could include (a) enlarging the number of potential indicators, (b) collecting data in Member States that do not yet contribute to data collection and (c) developing indicators that can be used at hospital/facility level.

[Direct grant to the OECD] Indicative amount: EUR 500 000

3.3.1.3. Commission membership fee to the European Observatory on Health Care Systems and Policies

This action implements Commission Decision (C(2009)10213 final) of 21 December 2009 on its incorporation as a Participating Organisation of the European Observatory on Health Care Systems and Policies until the termination of the current Health Programme in 2013. The Decision sets the Commission's membership fee at EUR 500 000 per year.

The objective of the Commission's participation in the Observatory is to generate and disseminate quality information and actionable evidence on EU health systems. The Observatory is a repository of technical expertise, independent analysis and respected advice. The Observatory is a partnership project of the World Health Organization Regional Office for Europe, the governments of Belgium, Finland, Norway, Slovenia, Spain, and Sweden, the Veneto Region of Italy; the European Commission (throughout the duration of the Health Programme, 2009-2013), the European Investment Bank (EIB), the International Bank for Reconstruction and Development (World Bank); the French Union of Healthcare Funds (UNCAM); London School of Economics (LSE) and the London School for Hygiene and Tropical Medicine (LSHTM).

The Commission will be a privileged partner and topics of its interest will be included in the work programme of the Observatory, not only related to health care systems but also to health determinants and health promotion and diseases prevention, in particular the prevention of chronic diseases. Specific studies for short-term delivery could be commanded in specific areas, especially in support of the implementation of the Directive on the application of patients' rights in cross-border healthcare.

[Other actions] Indicative amount: EUR 500 000

⁵⁵ OJ C 151, 3.7.2009, p. 1

3.3.2. *Dissemination, analysis and application of health information; provision of information to citizens, stakeholders and policy makers (Point 3.2.2. in Annex to the Programme Decision)*

3.3.2.1. Indemnities to experts for advice on health systems

The objective of this action is to provide an expert facility to provide advice, on the request of Member States and the Commission on the efficiency of health systems. Council conclusions on 6 June 2011 *Towards modern, responsive and sustainable health systems* call for the Commission to set up a mechanism to this end. This will be accomplished through the establishment of a multi-disciplinary facility consisting of highly qualified experts in relevant fields including public health, health system management, epidemiology, social security, health economics and public finance. Experts should come from academia, industry and civil society. The Commission will manage the facility. This will include, where necessary, the preparation of background material to be attached to questions and liaising with the experts. The opinions endorsed by the experts shall be tailored to the specific needs and the specific situation of a Member State submitting a request. This facility may also provide health expertise to the Commission in relation to the Annual Growth Survey and the national reform plans. This action covers the indemnities paid to experts for their work. [Other actions]

Indicative amount: EUR 1 000 000

3.3.2.2. Communication and promotion of EU health policies and Health Programmes' results

The objective of this action is to provide accurate and timely information to EU citizens on EU activities on public health as foreseen in Article 168 of TFEU and thereby bring Europe closer to citizens. This action also seeks to promote EU actions in the area of health linked to new priorities, including the *Europe 2020 Strategy*.

This action has three components. The first of these is the promotion of Directive 2011/24/EU of the European Parliament and of the Council of 9 March 2011 on the application of patients' rights in cross-border healthcare. The Directive provides for a new and innovative approach to addressing reimbursement of cross-border healthcare, facilitates the recognition of prescriptions from other Member States, helps patients requiring specialised treatment, and facilitates the exchange of information on the quality and safety standards of healthcare. The success of its implementation depends on how well informed stakeholders and the general public are of its provisions. Clear and targeted measures under this action seek to ensure this. Measures include leaflets, disseminating information on the web, and participation in conferences with stakeholders.

The second component is organising the 4th EU Journalist Prize. This action seeks to further expand and maintain an informal network of journalists in Member States focusing on health. This will contribute to a better EU health news coverage in Member States and thereby increasing awareness of EU action on health, healthcare and patients' rights.

The third component covers the preparation and dissemination of information and communication material to explain EU health activities and initiatives. In addition to activities relating to on-going health initiatives, including support for the promotion and dissemination of the Health Programmes' results, activities focus in particular on explaining the *Tobacco Products' Initiative* and the *Health Security Initiative* to stakeholders and citizens. Activities include preparation and dissemination of audiovisual material and publications in electronic

format and on paper, organisation of and participation in workshops and expert meetings, and provision of information stands and other communication/PR material.

[Framework contract] Indicative amount: EUR 550 000

3.3.2.3. Information technology applications in support of public health policies

The objective of the measures covered by this action is to support EU public health policies as set out in Article 168 of TFEU through relevant IT applications. These IT tools also support the Europe 2020 Strategy, namely refocusing innovation on the challenges facing our society in the area of health, promotion of e-health, reduction of health inequalities, promoting of active and healthy ageing, addressing new risks for health, and ensuring better access to health care systems.

Eliminado: is action also supports achieving the goals of the

This action covers the following applications: (a) Health EU Portal – Public Health Website and its sub-sites Europe for patients, crisis communication, Journalist Prize and Youth Health, (b) *Injury Data Base (IDB)* and *Health in Europe: Information and Data Interface (HEIDI)* data tool, (c) HEIDI Wiki, (d) *Health Emergency & Diseases Information System (HEDIS)*, *Medical Intelligence System (MedIsys)*, and *Early Warning and Reporting project (EAR)*, (e) *Health Emergency Operations Facility (HEOF)* – Crisis intranet, (f) rapid alert system information exchange on health threats due to deliberate release of chemical, biological and radio-nuclear agents - RAS-BICHAT and rapid alert system for information exchange on incidents including chemical agents - RAS-CHEM, (g) Platforms: data collection on actions on Diet, Physical activity and Health; Database for the European Alcohol and Health Forum (*Alcohol Clearing House – ACH*); Mental Health Compass: Forum related Document Management system; NGO Database; (h) applications related to blood, cells and tissues and tobacco: annual data collection of Serious Adverse Reactions or Events related to blood transfusion and Cells/tissues transplantation (SARE); Register of all the tissue banks in the EU accessible to competent authorities in the Member States; System for annual reporting on voluntary unpaid donation, obligatory annual reporting for the Member States; Register of tobacco product testing establishments in the EU and register of tobacco warnings, text and pictures, accessible to competent authorities in the Member States, and Register for EU coding system for human tissues and cells (i) Cross-border health care, prescription register, medicine register and (j) Cross-policy services for public health applications and systems.

[Framework contracts] Indicative amount: EUR 1 480 000

3.3.3. Analysis and reporting (Point 3.2.3. in Annex to Programme Decision)

3.3.3.1. Provision of comparable evidence based data and information in support of policy measures

The aim of this action is to provide analysis, comparable information and independent, high-quality scientific data for evidence-based development, implementation and evaluation of action for health at EU level and within Member States, including for the *European Innovation Partnership in the field of active and healthy ageing*. It contributes to increasing the sustainability of projects funded by the Health Programme by maintaining and building on the information and data produced so far. Provision of health evidence and reporting at EU level enables comparison of policies that can support policy development and evaluation as well as help identify, disseminate and apply best practices. This enables the EU and Member States to detect health related obstacles to growth and thereby better support national health systems.

This action has three components. The first component consists of gathering, analysing and disseminating comparable evidence-based data and information in order to support and evaluate health policies, and provision of information to European policy-makers, experts, and citizens.

[Framework contracts] Indicative amount: EUR 200 000

The second component adds data in support of active and healthy ageing and other priority areas to the European health information and knowledge system in order to provide up-to-date information for European policy-makers, health experts and citizens.

[Call for tenders] Indicative amount: EUR 100 000

The third component is a Eurobarometer on tobacco in order to provide data on smoking behaviour, exposure to second-hand tobacco and certain key attitudes of smokers and non-smokers, and in order to update tobacco control indicators for monitoring the implementation of tobacco control policies. The results will be used to inform discussions in the European Parliament and the Council on the Commission's proposal for a revision of Directive 2001/37/EC of the European Parliament and of the Council of 5 June 2001 on the approximation of the laws, regulations and administrative provisions of the Member States concerning the manufacture, presentation and sale of tobacco products⁵⁶ as well as inter-institutional discussions on the possible initiative on workers protection from tobacco smoke in the workplace and the development of other tobacco control initiatives.

[Framework contract] Indicative amount: EUR 500 000

⁵⁶ The revision of the Tobacco Products Directive (2001/37/EC) is listed in Annex II (possible initiatives for 2012) to Commission Work Programme 2011 (COM (2010) 623 final).

ANNEX II

Criteria for financial contributions to projects under the second programme of Community action in the field of health (2008-13)

Decision No 1350/2007/EC of the European Parliament and of the Council, Article 4(1)(a)

1. GENERAL PRINCIPLES

1. The Financial Regulation and its Implementing Rules are the reference documents for the implementation of the Health Programme.

2. Grants must comply with the following principles:

- Co-financing rule: external co-financing from a source other than EU funds is required, either by way of the beneficiary's own resources or the financial resources of third parties. Contributions in kind from third parties may be considered as co-financing if considered necessary or appropriate (Article 113 of the Financial Regulation and Article 172 of the Implementing Rules),
- No-profit rule: the grant may not have the purpose or effect of producing a profit for the beneficiary (Article 109(2) of the Financial Regulation and Article 165 of the Implementing Rules),
- No-retroactivity rule: expenditure eligible for financing must be incurred after the agreement is signed. In exceptional cases, it may be acceptable to consider expenditure that was incurred from the date of submission of the grant application, but not earlier (Article 112 of the Financial Regulation),
- No-cumulation rule: only one grant may be awarded for a specific action carried out by a given beneficiary per financial year (Article 111 of the Financial Regulation)⁵⁷.

3. Proposals for actions will be evaluated on the basis of three categories of criteria:

- exclusion and eligibility criteria, to assess the applicant's eligibility (Article 114 of the Financial Regulation),
- selection criteria, to assess the applicant's financial and operational capacity to complete a proposed action (Article 115 of the Financial Regulation),
- award criteria, to assess the quality of the proposal taking into account its cost.

These categories of criteria will be considered consecutively during the evaluation procedure. A proposal which fails to meet the requirements under one category will not be considered at the next evaluation stage and will be rejected.

4. Priority will be given to project proposals which:

⁵⁷ This means that a specific action, submitted by one applicant for a grant, can be approved for co-financing by the Commission only once a year, regardless of the length of this action.

- have an innovative character and are not of a recurrent nature,
- provide added value at EU level in the field of health: projects are to yield relevant economies of scale, involve an appropriate number of eligible countries in relation to the scope of the project and to be applicable elsewhere,
- contribute to and support the development of EU policies in the field of health,
- have an efficient management structure, a clear evaluation process and a precise description of expected results,
- include a plan for using and disseminating results at EU level to appropriate target audiences.

2. EXCLUSION AND ELIGIBILITY CRITERIA

1. Applicants will be excluded from participation in an award procedure under the Health Programme if they are in any of the situations of exclusion listed in Articles 93 and 94 of the Financial Regulation.

Evidence: Candidates shall provide a declaration on their honour, duly signed and dated, stating that they are not in any of the situations mentioned above.

2. Proposals which involve only one eligible country or a region of a country will be rejected.

3. Proposals received after the deadline for receipt, incomplete proposals or proposals which do not meet formal requirements laid down in the call for proposals will not be considered for funding. This does not apply in the case of obvious clerical errors within the meaning of Article 178(2) of the Implementing Rules.

Each application must contain the documents required in the call for proposals, including:

- administrative data on the main partner and associated partners,
- technical description of the project,
- global budget of the project and requested level of EU co-financing.

Evidence: Application content.

4. Actions that have already commenced by the date on which the grant application is registered will be excluded from participation in the Health Programme.

Evidence: The scheduled starting date and duration of the action must be specified in the grant application.

3. SELECTION CRITERIA

Only proposals which meet the exclusion and eligibility criteria will be eligible for evaluation. The following selection criteria have to be met.

1. Financial capacity:

Applicants must have stable and sufficient sources of funding to maintain their activity throughout the period during which the activity is being carried out and to participate in its co-financing.

Evidence: Applicants must supply the profit and loss accounts and the balance sheets for the past two complete financial years.

The verification of financial capacity will not apply to public bodies, or to international public organisations created by inter-governmental agreements or to specialist agencies created by the latter.

2. Operational capacity:

Applicants must have the professional resources, competences and qualifications required to complete the proposed action.

Evidence: Applicants must supply the organisation's most recent annual activity report including operational, financial and technical details and the curricula vitae of all relevant professional staff in all organisations involved in the proposed action.

3. Additional documents to be supplied at the request of the Commission.

If so requested, applicants must supply an external audit report produced by an approved auditor, certifying the accounts for the last financial year available and giving an assessment of the applicant's financial viability.

4. AWARD CRITERIA

Only projects which meet the exclusion and eligibility and selection criteria will be eligible for further evaluation on the basis of the following award criteria.

1. Policy and contextual relevance (40 points, threshold: 20 points):

(a) Project's contribution to meeting the objectives and priorities defined in the work plan for 2012 (8 points);

(b) Strategic relevance with regard to the EU Health Strategy⁵⁸ and with regard to expected contribution to existing knowledge and implications for health (8 points);

(c) Added value at EU level in the field of public health (8 points):

- impact on target groups, long term effect and potential multiplier effect, such as replicable, transferable and sustainable activities,

- contribution to complementarity, synergy and compatibility with relevant EU policies and programmes;

⁵⁸ COM(2007) 630 final; http://ec.europa.eu/health/ph_overview/strategy/health_strategy_en.htm

(d) Pertinence of geographical coverage (8 points):

Applicants must ensure that the geographical coverage of the project is commensurate with its objectives, and explain the role of eligible countries as partners and the relevance of project resources or the target populations they represent;

(e) Social, cultural and political context (8 points):

Applicants must explain how the project relates to the situation of the countries or specific areas involved, ensuring the compatibility of envisaged actions with the culture and views of the target groups.

2. *Technical quality* (30 points, threshold: 15 points)

(a) Evidence base (6 points):

Applicants must include a problem analysis and clearly describe the factors, impact, effectiveness and applicability of proposed measures;

(b) Content specification (6 points):

Applicants must clearly describe aims and objectives, target groups, including relevant geographical factors, methods, anticipated effects and outcomes;

(c) Innovative nature, technical complementarity and avoidance of duplication of other existing actions at EU level (6 points):

Applicants must clearly identify the progress the project intends to make within a given field in relation with the state of the art and ensure that there will be neither inappropriate duplication nor overlap, whether partial or total, between projects and activities already carried out at EU and international level;

(d) Evaluation strategy (6 points):

Applicants must clearly explain the methods proposed and indicators chosen and their adequacy;

(e) Dissemination strategy (6 points):

Applicants must clearly illustrate the adequacy of the envisaged strategy and methodology to ensure transferability of results and sustainability of dissemination;

3. *Management quality and budget* (30 points, threshold: 15 points):

(a) Planning and organisation (5 points):

Applicants must clearly describe the activities to be undertaken, timetable and milestones, deliverables, nature and distribution of tasks, and provide a risk analysis;

(b) Organisational capacity (5 points):

Applicants must clearly describe the management structure, competence of staff, responsibilities, internal communication, decision making, and monitoring and supervision;

(c) Quality of partnership (5 points):

Applicants must clearly describe the partnerships envisaged in terms of extensiveness, roles and responsibilities, relationships between the partners, and the synergy and complementarity of partners and network structure;

(d) Communication strategy (5 points):

Applicants must clearly describe the communication strategy in terms of planning, target groups, adequacy of channels used, and visibility of EU co-financing;

(e) Overall and detailed budget, including financial management (10 points, threshold: 5 points):

Applicants must ensure that the budget is relevant, appropriate, balanced and consistent in itself, between partners and in relation to the specific objectives of the project. The budget should be distributed between partners at a minimum reasonable level, avoiding excessive fragmentation.

Applicants must clearly describe financial circuits, responsibilities, reporting procedures and controls.

Any proposal which does not reach all thresholds will be rejected.

Following the evaluation, a list is drawn up of proposals recommended for funding, ranked according to the total number of points awarded. Depending on budget availability, the highest ranked proposals will be awarded co-financing.

ANNEX III

Criteria for financial contributions to the functioning of a non-governmental body or a specialised network (operating grants) under the second programme of Community action in the field of health (2008-13)

Decision No 1350/2007/EC of the European Parliament and of the Council, Article 4(1)(b)

1. GENERAL PRINCIPLES

1. The Financial Regulation and its Implementing Rules are the reference documents for the implementation of the Health Programme.

2. Grants must comply with the following principles:

- Co-financing rule: external co-financing from a source other than EU funds is required, either by way of the beneficiary's own resources or the financial resources of third parties. Contributions in kind from third parties may be considered as co-financing if considered necessary or appropriate (Article 113 of the Financial Regulation and Article 172 of the Implementing Rules),
- No-profit rule: the grant may not have the purpose or effect of producing a profit for the beneficiary (Article 109(2) of the Financial Regulation and Article 165 of the Implementing Rules),
- No-retroactivity rule: expenditure eligible for financing must be incurred after the agreement is signed. In exceptional cases, it may be acceptable to consider expenditure that was incurred from the date of submission of the grant application, but not earlier (Article 112 of the Financial Regulation),
- No-cumulation rule: only one grant may be awarded for a specific action carried out by a given beneficiary per financial year (Article 111 of the Financial Regulation)⁵⁹.

3. Proposals for actions will be evaluated on the basis of three categories of criteria:

- exclusion and eligibility criteria, to assess the applicant's eligibility (Article 114 of the Financial Regulation),
- selection criteria, to assess the applicant's financial and operational capacity to complete a proposed action (Article 115 of the Financial Regulation),
- award criteria, to assess the quality of the proposal taking into account its cost.

2. EXCLUSION AND ELIGIBILITY CRITERIA

1. Financial contributions by the EU may be awarded to the functioning of a non-governmental body or the costs associated with the coordination of a specialised network by a

⁵⁹ This means that a specific action, submitted by one applicant for a grant, can be approved for co-financing by the Commission only once a year, regardless of the length of this action.

non-profit body. A specialised network is a European network representing non-profit bodies active in the Member States or in countries participating in the Health Programme and promoting principles and policies consistent with the objectives of the Programme, which have a relevant track record of joint achievements (e.g. successfully completed projects and/or joint publications) and established rules of collaboration (e.g. SOPs or a memorandum of understanding). An organisation or a specialised network may receive funding if it:

- is non-profit-making and independent of industry, commercial and business or other conflicting interests,
- has members in at least half of the Member States,
- has a balanced geographical coverage,
- pursues as its primary goal one or more objectives of the Health Programme,
- does not pursue general objectives directly or indirectly contrary to the policies of the EU or is not associated with an inadequate image,
- has provided to the Commission satisfactory accounts of its membership, internal rules and sources of funding,
- has provided to the Commission its annual work programme for the financial year and the most recent annual activity report and, if available, the most recent evaluation report,
- is not in any of the situations of exclusion listed in Articles 93 and 94 of the Financial Regulation.

2. Proposals received after the deadline for receipt, incomplete proposals or proposals which do not meet formal requirements laid down in the call for proposals will not be considered for funding. This does not apply in the case of obvious clerical errors within the meaning of Article 178(2) of the Implementing Rules.

3. The criterion 'independent from industry, commercial and business or other conflicting interest' will be assessed according to Annex VI.

3. SELECTION CRITERIA

Selection criteria make it possible to assess the applicant organisation's financial and operational capacity to complete the proposed work programme.

Only organisations with the resources necessary to ensure their functioning can be awarded a grant. As evidence of this they must:

- attach a copy of the organisation's annual accounts for the last financial year for which the accounts have been closed preceding the submission of an application. If the grant application is from a new European organisation, the applicant must produce the annual accounts (including balance sheet and profit and loss statement) of the member organisations of the new body for the last financial year for which the accounts have been closed preceding the submission of the application,

- present a detailed forward budget for the organisation, balanced in terms of income and expenditure,
- attach an external audit report produced by an approved auditor in case of operating grant applications in excess of EUR 100 000, certifying the accounts for the last financial year available and giving an assessment of the applicant organisation's financial viability.

Only organisations with the necessary operational resources, skills and professional experience may be awarded a grant. To this end, the following information must be enclosed in support of the application:

- the organisation's most recent annual activity report, or, in the case of a newly constituted organisation, the curricula vitae of the members of the management board and other staff and the annual activity reports of the new body's member organisations,
- any references relating to participation in or applications for actions financed by the EU, conclusion of grant agreements and conclusion of contracts from EU budget.

4. AWARD CRITERIA

The award criteria make it possible to select work programmes that can guarantee compliance with EU objectives and priorities and can guarantee proper dissemination and communication, including visibility of EU financing.

To this end, the annual work programme presented with a view to obtaining EU funding must meet the following criteria:

1. Policy and contextual relevance of the non-governmental body or specialised network's annual work programme (25 points, threshold 13 points):

- (a) Consistency of the annual work programme with the Health Programme and its annual work plan in terms of meeting their objectives and priorities (10 points);
- (b) The organisation's activities⁶⁰ must be described in relation to the priorities detailed in the work plan 2012 of the Health Programme (10 points);
- (c) Pertinence of the geographical coverage of the non-governmental body or specialised network. The annual work programme of the applicant should include activities in a representative number of participating countries (5 points).

2. Technical quality of the annual work programme proposed (40 points, threshold 20 points):

- (a) Purpose of the annual work programme: the work programme of the applicant must clearly describe all objectives of the organisation or the specialised network and their suitability for achieving expected results. Applicants must demonstrate that the work programme submitted gives a true and fair view of all activities planned for the organisation/specialised network in 2012, including those activities which do not fit in the work plan 2012 of the Health Programme (10 points);

⁶⁰ Lobbying activities exclusively targeted at EU Institutions are excluded from funding.

(b) Operational framework: applicants' work programme must clearly describe the activities planned, tasks, responsibilities and timetables of the part of their work programme which is consistent with the work plan 2012 of the Health Programme and describe its relationship with other parts of their activity (10 points);

(c) Evaluation strategy: applicants' work programme must clearly describe the internal and external evaluation of their activities and the indicators to be used (10 points);

(d) Dissemination strategy: the beneficiary must clearly illustrate the adequacy of actions and methods for communication and dissemination (10 points).

3. *Management Quality* (35 points, threshold 18 points):

(a) Planning of annual work: applicants must clearly describe activities to be undertaken, timetable and milestones, deliverables, nature and distribution of tasks, and provide a risk analysis (10 points);

(b) Organisational capacity: applicants must clearly describe the management process, human resources and competencies of staff, responsibilities, internal communication, decision-making, and monitoring and supervision. The applicant must also clearly specify the working relationships with relevant partners and stakeholders (10 points);

(c) Overall and detailed budget: applicants must ensure that the budget is relevant, appropriate, balanced and consistent in itself and for the activities planned (10 points);

(d) Financial management: Applicants must clearly describe financial circuits, responsibilities, reporting procedures and, where possible, controls (5 points).

Any proposal which does not reach all thresholds will be rejected.

Following the evaluation, a list is drawn up of proposals recommended for funding, ranked according to the total number of points awarded. Depending on budget availability, the highest ranked proposals will be awarded co-financing.

**Criteria for financial contributions to joint actions under the second programme of
Community action in the field of health (2008-13)**

Decision No 1350/2007/EC of the European Parliament and of the Council, Article 4(3)

1. GENERAL PRINCIPLES

1. The Financial Regulation and its Implementing Rules are the reference documents for the implementation of the Health Programme.

2. Grants must comply with the following principles:

- Co-financing rule: external co-financing from a source other than EU funds is required, either by way of the beneficiary's own resources or the financial resources of third parties. Contributions in kind from third parties may be considered as co-financing if considered necessary or appropriate (Article 113 of the Financial Regulation and Article 172 of the Implementing Rules),
- No-profit rule: the grant may not have the purpose or effect of producing a profit for the beneficiary (Article 109(2) of the Financial Regulation and Article 165 of the Implementing Rules),
- No-retroactivity rule: expenditure eligible for financing must be incurred after the agreement is signed. In exceptional cases, it may be acceptable to consider expenditure that was incurred from the date of submission of the grant application, but not earlier (Article 112 of the Financial Regulation),
- No-cumulation rule: only one grant may be awarded for a specific action carried out by a given beneficiary per financial year (Article 111 of the Financial Regulation)⁶¹.

3. Proposals for actions will be evaluated on the basis of three categories of criteria:

- exclusion and eligibility criteria, to assess the applicant's eligibility (Article 114 of the Financial Regulation),
- selection criteria, to assess the applicant's financial and operational capacity to complete a proposed action (Article 115 of the Financial Regulation),
- award criteria, to assess the quality of the proposal taking into account its cost.

These categories of criteria will be considered consecutively during the evaluation procedure. A proposal which fails to meet the requirements under one category will not be considered at the next evaluation stage and will be rejected.

⁶¹ This means that a specific action, submitted by one applicant for a grant, can be approved for co-financing by the Commission only once a year, regardless of the length of this action.

2. EXCLUSION AND ELIGIBILITY CRITERIA

1. Joint actions may be implemented with public bodies or non-governmental bodies:

- which are non-profit making and independent of industry, commercial and business or other conflicting interest,
- which pursue as their primary goal one or more objectives of the Health Programme,
- which do not pursue general objectives directly or indirectly contrary to the policies of the EU or are not associated with an inadequate image,
- which have provided to the Commission satisfactory accounts of their membership, internal rules and sources of funding,
- which are not in any of the situations of exclusion listed in Articles 93 and 94 of the Financial Regulation.

2. Proposals received after the deadline for receipt, incomplete proposals or proposals which do not meet formal requirements laid down in the call for proposals will not be considered for funding. This does not apply in the case of obvious clerical errors within the meaning of Article 178(2) of the Implementing Rules.

3. The criterion 'independent from industry, commercial and business or other conflicting interest' will be assessed in accordance with Annex VI.

3. SELECTION CRITERIA

Selection criteria make it possible to assess the applicant's financial standing and operational capability to complete the proposed action.

Applicants must have the professional resources, competences and qualifications required to complete the proposed action.

Applicants must have adequate financial resources to maintain their activity throughout the period during which the activity is being carried out and to participate in its co-financing.

Each applicant must provide:

- a clear, exhaustive and well detailed estimated budget of the expenses in relation to the corresponding activities carried out by each body taking part in the joint action,
- a copy of the annual accounts for the last financial year for which the accounts have been closed preceding the submission of an application (for non-profit bodies other than public bodies).

4. AWARD CRITERIA

Only joint actions which meet the exclusion and eligibility and selection criteria will be eligible for further evaluation on the basis of the following award criteria.

1. *Policy and contextual relevance* (40 points, threshold: 20 points):

(a) Joint action's contribution to meeting the objectives and priorities defined in the work plan for 2012 (8 points);

(b) Strategic relevance with regard to the EU Health Strategy⁶² and with regard to expected contribution to existing knowledge and implications for health (8 points);

(c) Added value at EU level in the field of public health (8 points):

- impact on target groups, long term effect and potential multiplier effects such as replicable, transferable and sustainable activities,

- contribution to, complementarity, synergy and compatibility with relevant EU policies and other programmes;

(d) Pertinence of geographical coverage (8 points):

Applicants must ensure that the geographical coverage of the joint action is appropriate with regard to its objectives and explain the role of eligible countries as partners and the relevance of the joint action's resources or the target populations they represent. Proposals which involve only one eligible country or a region of a country will be rejected;

(e) Social, cultural and political context (8 points):

Applicants must explain how the joint action relates to the situation of the countries or specific areas involved, ensuring the compatibility of envisaged activities with the culture and views of the target groups.

2. *Technical quality* (30 points, threshold: 15 points):

(a) Evidence base (6 points):

Applicants must include a problem analysis and clearly describe the factors, impact, effectiveness and applicability of proposed measures;

(b) Content specification (6 points)

Applicants must clearly describe the aims and objectives, target groups, including relevant geographical factors, methods, anticipated effects and outcomes;

(c) Innovative nature, technical complementarity and avoidance of duplication of other existing actions at EU level (6 points):

Applicants must clearly identify the progress the joint action intends to make in relation with the state of art and ensure that there will be neither inappropriate duplication nor overlap, whether partial or total, between projects and activities already carried out at EU and international level;

⁶² COM(2007) 630 final; http://ec.europa.eu/health/ph_overview/strategy/health_strategy_en.htm

(d) Evaluation strategy (6 points):

Applicants must clearly explain the methods proposed and indicators chosen and their adequacy;

(e) Dissemination strategy (6 points):

Applicants must clearly illustrate the adequacy of the envisaged strategy and methodology to ensure transferability of results and sustainability of dissemination.

3. *Management quality and budget* (30 points, threshold: 15 points):

(a) Planning and organisation (5 points):

Applicants must clearly describe the activities to be undertaken, timetable and milestones, deliverables, nature and distribution of tasks, and provide a risk analysis;

(b) Organisational capacity (5 points):

Applicants must clearly describe the management structure, competence of staff, responsibilities, internal communication, decision making, and monitoring and supervision;

(c) Quality of partnership (5 points):

Applicants must clearly describe the partnerships envisaged in terms of extensiveness, roles and responsibilities, relationships between partners, and the synergy and complementarity of partners and network structure;

(d) Communication strategy (5 points):

Applicants must clearly describe the communication strategy in terms of planning, target groups, adequacy of channels used and visibility of EU co-financing.

(e) Overall and detailed budget, including financial management (10 points, threshold: 5 points):

Applicants must ensure that the budget is relevant, appropriate, balanced and consistent in itself, between partners and in relation to the specific objectives of the joint action. The budget should be distributed between partners at a minimum reasonable level, avoiding excessive fragmentation.

Applicants must clearly describe financial circuits, responsibilities, reporting procedures and controls.

Any proposal which does not reach all thresholds will be rejected.

**Criteria for financial contributions for conferences under the second programme of
Community action in the field of health (2008-13)**

Decision No 1350/2007/EC of the European Parliament and of the Council, Article 4(1)(a)

1. GENERAL PRINCIPLES

1. The Financial Regulation and its Implementing Rules are the reference documents for the implementation of the Health Programme.

2. Grants must comply with the following principles:

- Co-financing rule: external co-financing from a source other than EU funds is required, either by way of the beneficiary's own resources or the financial resources of third parties. Contributions in kind from third parties may be considered as co-financing if considered necessary or appropriate (Article 113 of the Financial Regulation and Article 172 of the Implementing Rules),
- No-profit rule: the grant may not have the purpose or effect of producing a profit for the beneficiary (Article 109(2) of the Financial Regulation and Article 165 of the Implementing Rules),
- No-retroactivity rule: expenditure eligible for financing must be incurred after the agreement is signed. In exceptional cases, it may be acceptable to consider expenditure that was incurred from the date of submission of the grant application, but not earlier (Article 112 of the Financial Regulation),
- No-cumulation rule: only one grant may be awarded for a specific action carried out by a given beneficiary per financial year (Article 111 of the Financial Regulation)⁶³.

3. Proposals for actions will be evaluated on the basis of three categories of criteria:

- exclusion and eligibility criteria, to assess the applicant's eligibility (Article 114 of the Financial Regulation),
- selection criteria, to assess the applicant's financial and operational capacity to complete a proposed action (Article 115 of the Financial Regulation),
- award criteria, to assess the quality of the proposal taking into account its cost.

These categories of criteria will be considered consecutively during the evaluation procedure. A proposal which fails to meet the requirements under one category will not be considered at the next evaluation stage and will be rejected.

⁶³ This means that a specific action, submitted by one applicant for a grant, can be approved for co-financing by the Commission only once a year, regardless of the length of this action.

2. EXCLUSION AND ELIGIBILITY CRITERIA

1. Applicants will be excluded from participation in an award procedure under the Health Programme if they are in any of the situations of exclusion listed in Articles 93 and 94 of the Financial Regulation.

Evidence: Candidates shall provide a declaration on their honour, duly signed and dated, stating that they are not in any of the situations listed above.

2. Proposals received after the deadline for receipt, incomplete proposals or proposals which do not meet formal requirements laid down in the call for proposals will not be considered for funding. This does not apply in the case of obvious clerical errors within the meaning of Article 178(2) of the Implementing Rules.

3. Each application must contain the documents required according to the call for proposals, including:

- administrative data on the main partner,
- technical description of the conference,
- global budget of the conference and the requested level of EU co-financing.

Evidence: Application content.

4. Actions which have already commenced by the date on which the grant application is registered will be excluded from participation in the Health Programme. The duration of the action must not exceed 12 months.

Evidence: The scheduled commencement date and duration of the action must be specified in the grant application.

3. SELECTION CRITERIA

Only proposals which meet the requirements of the exclusion and eligibility criteria will be eligible for evaluation. The following selection criteria have to be met.

1. Financial capacity:

Applicants must have stable and sufficient sources of funding to maintain their activity throughout the period during which the activity is being carried out and to participate in its co-financing.

Evidence: Applicants must supply the profit and loss account and the balance sheets for the past two complete financial years.

The verification of financial capacity will not apply to public bodies, or to international public organisations created by inter-governmental agreements or to specialist agencies created by the latter.

2. Operational capacity:

Applicants must have the professional resources, competences and qualifications required to complete the proposed action.

Evidence: Applicants must supply the organisation's most recent annual activity report including operational, financial and technical details and the curricula vitae of all relevant professional staff in all organisations involved in the proposed action.

3. *Additional documents to be supplied at the request of the Commission*

If so requested, applicants must supply an external audit report produced by an approved auditor, certifying the accounts for the last financial year available and giving an assessment of the applicant's financial viability.

4. AWARD CRITERIA

1. *Content of the proposal* (60 points, threshold 30 points):

(a) Relevance of the content and expected results of the event in relation to the objectives and priorities described in the work plan for 2012;

(b) Participation (15 points):

Applicants must clearly describe the expected number and profile/function of target participants in the event, making reference to distribution by Member State, organisation and type of expertise;

(c) European dimension (15 points):

Conferences must have a wide European Union dimension, with participants from 10 or more countries participating in the Health Programme;

(d) Follow-up and evaluation methodology (15 points):

Applicants must clearly describe the dissemination strategy. An adequate evaluation must be provided based on an evaluation plan with corresponding design, method, responsibilities and timing making use of indicators.

2. *Management Quality* (40 points, threshold 20 points):

(a) Planning of the event (15 points):

Applicants must clearly describe the methodology, tools, timetable and milestones, deliverables, nature and distribution of tasks, and financial circuits and provide a risk analysis;

(b) Organisational capacity (10 points):

Applicants must clearly describe the management structure, competency of staff, responsibilities, decision-making, monitoring and supervision.

(c) Overall and detailed budget (15 points)

Applicants must ensure that the budget is relevant, appropriate, balanced and consistent in itself and in relation to the objective/s of the conference.

Any proposal which does not reach all thresholds will be rejected.

Following the evaluation, a list is drawn up of proposals recommended for funding, ranked according to the total number of points awarded. Depending on budget availability, the highest ranked proposals will be awarded co-funding.

Criteria for independence from industry, commercial and business or other conflicting interest applicable to operating grants and grants for joint actions under the second programme of Community action in the field of health (2008-13)

Decision 1350/2007/EC of the European Parliament and of the Council, Article 4.1 (b) and Article 4.3

A conflicting interest occurs when an individual or organization has multiple interests, one of which could possibly corrupt the motivation to act in the other.

The criterion 'independent from industry, commercial and business or other conflicting interest' refers to three requirements all of which the applicant organisation has to meet:

1. LEGAL INDEPENDENCE

To be eligible for funding, an NGO has to be independent from other entities representing industry, commercial and business or other conflicting interests.

Two legal entities shall be regarded as independent of each other when neither is under the direct or indirect control of the other or under the same direct or indirect control of a third entity as the other.

Control may in particular take one of the following forms:

- (a) The direct or indirect holding of more than 50 % of the nominal value of the issued share capital in the legal entity concerned, or of a majority of the voting rights of the shareholders or associates of that entity;
- (b) The direct or indirect holding of decision-making powers, in fact or in law, in the legal entity concerned.

However, the following relationships between legal entities shall not in themselves be deemed to constitute controlling relationships:

- (c) The direct or indirect holding of more than 50 % of the nominal value of the issued share capital of the applicant organisation or a majority of voting rights of the shareholders or associates of the legal entities is held by the same public body;
- (d) The legal entities concerned are owned or supervised by the same public body.

2. FINANCIAL INDEPENDENCE

In order to be considered independent, applicant organisations must unilaterally commit not to receive more than 20 % of their core funding from private sector organisations⁶⁴ representing

⁶⁴ The term 'private sector' covers 'for-profit' companies/enterprises/corporations, business organisations or other entities irrespective of their legal nature (registered/not registered), ownership (wholly or partially privately owned/state owned) or size (large/small), if they are not controlled by the public.

a conflicting interest, or from other sources representing a conflicting interest during the financial years covered by the grant.

Core funding shall mean financing required for the basic structure of an organization, including salaries of full-time staff, facilities, equipment, communications, and the direct expenses of day-to-day work. Core funding also includes financing of all permanent or regularly repeated activities. Core funding requirements are often budgeted separately from other costs like specific actions or projects.

3. TRANSPARENCY OF THE APPLICANT'S ACTIVITIES AND FUNDING

All activities should be published in the applicant's annual report⁶⁵.

Applicants working with private sector actors regarded ineligible for example by the nature of their activity which is incompatible with the basic principles of the European Union as stated in Article 2 and 3 of the EU Treaty, can be considered unacceptable.

(a) All information on funding is to be made available to the public via the applicant's website, broken down by type (core and project funding, contribution in kind) and by funding entity.

(b) Applicant's existing position statements regarding their requirement on transparency are to be publicly available.

3. ASSESSMENT OF INDEPENDENCE

Legal independence and transparency is assessed based on the latest available information provided by the applicant together with the application. Financial independence will be assessed based on the financial information for the financial year for which the grant will be attributed at the time of the final report. This information has to be provided according to the form published with the call for proposals and must be certified by an independent auditor. If these accounts show that during any of the financial years covered by the grant, the beneficiaries have received more than 20 % of their core funding from private sector organisations representing a conflicting interest, or from other sources representing a conflicting interest, the entire amount of the grant shall be recovered.

⁶⁵ Collaborators in a position that could lead to a conflict of interest (Article 52 of the Financial Regulation and Article 34 of the Implementing Rules) shall be listed.

ANNEX VII

Criteria for exceptional utility for project grants, operating grants and joint actions under the second programme of Community action in the field of health (2008-13)

Decision No 1350/2007/EC of the European Parliament and of the Council, Article 4(1)(a), Article 4(1)(b) and Article 4(3)

1. GENERAL PRINCIPLES

Exceptional utility may be accorded to proposals that have very high European added value in the following areas:

Contribution to:

- improving the health of European citizens, as measured where possible by appropriate indicators, including the Healthy Life Years indicator,
- reducing health inequalities in and between EU Member States and regions,
- building capacity for development and implementation of effective public health policies particularly in areas of high need,
- involvement of new (non-traditional) actors for health in sustained, cooperative and ethically sound actions, both at regional or local level and across participating countries. This includes the public sector, the private sector and stakeholders among wider civil society whose primary aims are not limited to public health (for example among the youth, ethnic groups and other public interest spheres such as the environment and sport).

Proposals which meet the above criteria can be considered of exceptional utility. Applicants must be able to demonstrate how the proposed action will contribute to the areas mentioned above by complying with criteria specified in the following sections.

2. EXCEPTIONAL UTILITY OF PROJECTS

A maximum EU contribution per beneficiary (i.e. per main and per associated beneficiary) of 80 % of eligible costs may be envisaged where a proposal is of exceptional utility, as specified under the section "General principles" above. No more than 10 % of funded projects should receive EU co-funding of over 60 %. Proposals for projects requesting more than 60 % co-funding will need to comply with the following criteria:

- at least 60 % of the total budget of the action must be used to fund staff. This criterion is intended to promote capacity building for development and implementation of effective public health policies,
- at least 25 % of the budget of the proposed action must be allocated to Member States with a GDP per capita (as published by Eurostat in its latest statistical report) in the lower quartile of all EU Member States. This criterion is intended to contribute to the reduction of health inequalities among EU Member States.

- a score of at least 5 out of 8 marks must be achieved for all the award criteria of the policy relevance block mentioned in Annex II. This criterion aims at promoting the improvement of the health of European citizens, in the sense of enhancing policy relevance.
- at least 10 % of the budget must be allocated to organisations that have not received any funding under the first and the second Health Programme in the past 5 years. This criterion is intended to promote the involvement of new actors for health.

2. EXCEPTIONAL UTILITY OF OPERATING GRANTS

A maximum EU contribution of 80 % of eligible costs may be envisaged where a proposal for a new operating grant is of exceptional utility, as specified under the section "General principles" above. Proposals for new operating grants requesting more than 60 % co-funding will need to comply with the following criteria:

- at least 25 % of the members or candidate members of the non-governmental bodies or organisations forming the specialised network come from Member States with a GDP per capita (as published by Eurostat in its latest statistical report) in the lower quartile of all EU Member States.
- reduction of health inequalities at EU, national or regional level is manifested in the mission as well as the annual work programme of the applicant organization/specialised network.

For operating grants which are renewed, the exceptional utility status will remain the same as under the 2011 call for proposals.

3. EXCEPTIONAL UTILITY OF JOINT ACTIONS

A maximum EU contribution of 70 % of eligible costs may be envisaged where a proposal for a joint action is of exceptional utility, as specified under the section "General principles" above. Proposals for joint actions requesting more than 50 % co-funding will need to comply with the following criteria:

- At least 60% of the total budget of the action must be used to fund staff. This criterion is intended to promote capacity building for development and implementation of effective public health policies.
- At least 25% of the budget of the proposed action must be allocated to Member States with a GDP per capita (as published by EUROSTAT in its latest statistical report) in the lower quartile of all EU Member States. This criterion is intended to contribute to the reduction of health inequalities among EU Member States.
- A score of at least 5 out of 8 marks must be achieved for all the award criteria of the policy relevance block mentioned in Annex IV. This criterion aims to promote the improvement of the health of European citizens, in the sense of enhancing policy relevance.
- At least 10% of the budget must be allocated to organisations that have not received any funding under the first and the second Health Programme in the past 5 years. This criterion is intended to promote the involvement of new actors for health.

- Bodies from at least 10 participating countries or bodies from 3 participating countries, where the action is proposed by a body from a Member State which has acceded to the European Union since 1 May 2004 or by a candidate country, should participate in the joint action.
