(c) If prevalence data is appropriate and available for ethnic groups, please provide.  [Help](#)

**Question 3i(c) is mandatory if data is available**

Use more than one table if necessary (e.g., you can use one table per ethnic group). Please be sure to report the prevalence of smoking, not the number of smokers.

The definitions for daily smokers and occasional smokers are to be provided by the Parties. As the definition of daily and occasional smokers varies internationally, please ensure that you provide a definition relevant to your country.

Have you identified any specific gaps between the resources available and the needs assessed, for the financial and technical assistance provided or received?  [Help](#)

Please advise if you identified any specific gaps between resources available and the needs assessed. If you answered 'Yes' to the identification of specific gaps you will need to provide details. If you answered 'No' to the identification of specific gaps you will need to check the 'No' box.

Yes (please give details below)

No

Additional details: An assessment would first need to be undertaken to assess needs and required resources. Information not currently available regarding resources vs. needs.

## 8. Priorities for implementation of the WHO Framework Convention on Tobacco Control [Help](#)

What are the priority areas for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction? (Ref. **Article 21.1(b)**)

1. The establishment of an effective, national coordinating agency that would:

a) Develop a national strategic plan for tobacco control in collaboration with all stakeholders;

b) Facilitate the development, transfer and acquisition of technology, knowledge, skills, capacity and expertise regarding tobacco control;

c) Assess needs and access technical, scientific, legal and other expertise to establish and strengthen national tobacco control strategies, plans and programmes aimed at implementation of the FCTC (via development of effective legislation and technical programmes - especially preventive); provision of assistance in developing alternative sources of employment for tobacco workers, working to encourage tobacco growers to change to alternative crops; other programmes as identified.

2. Legislation with emphasis on packaging, labelling, advertising and sponsorship.

3. Identification of methods for tobacco control, including comprehensive treatment of nicotine addiction and cessation support.

4. Promotion, as appropriate, of research to increase the affordability of comprehensive treatment of nicotine addiction.

(Adapted from Article 22)

What, if any, are the constraints or barriers you have encountered in implementing the Convention? (ref. **Article 21.1(b)**)

The necessary legislation needs to be passed that would allow the development of a coordinating mechanism that would take the process forward.

## 9. Additional comments [Help](#)

Please provide any relevant information not covered elsewhere that you feel is important.

### Data Sources and Definitions:

**Q. 2. a) Demographics - Age and Sex (%), data was obtained from the Central Statistical Office, Ministry of Planning and Development, Trinidad and Tobago, document - 'Population - 2000: Total Population by Sex and Age Group for Trinidad & Tobago - 2000.'**

**Q. 2 b) Ethnicity: Data for Census year 2000 - data was obtained from the Annual Statistical Digest 2001, No. 46, Central Statistical Office, Ministry of Planning and Development, Republic of Trinidad & Tobago (Table 15).**

**Q. 3 Tobacco Use, i Prevalence, a) Smoking Tobacco - data was obtained from the 'Report on the Trinidad and Tobago National Health Survey, 1994 - 1995, Ministry of Health/Central Statistical Office (Trinidad and Tobago).**

**Q. 3 Data from the above-named Report, on 'Current Smokers,' defined as persons who were currently smoking), was inserted in the category 'Daily Smoker' in Table 3. Data from the Report on 'Never/Occasional Smokers' was inserted in the category 'Occasional Smoker.' in Table 3.**

**Q. 3 Tobacco Use, i Prevalence, d) Prevalence data for youth groups - data was obtained from the 'Global Youth Tobacco Survey 2000, Trinidad and Tobago.' The majority of the participants were students aged 13 to 15 years. The prevalence was based on current smokers, defined as having smoked a cigarette on 1 or more of the 30 days preceding the survey.**

## 10. Questionnaire feedback

- (a) Please provide feedback for improvement of the Group 1 questionnaire.  [Help](#)

Allowing changes to be made to tables, e.g. Age Groups in Tobacco Use / Prevalence Tables, after the Demographics section has been set up.

Allowing space for comments after the Tobacco Use Prevalence Tables, e.g. for item 'Definitions to be provided by the Parties' - no space given for definitions.

Where information is not available, or is available in a different grouping, the ability to modify for instance, the age groups, in the tables (as in the section following Tobacco Use - Prevalence (the next category of tobacco product) would be helpful.

Towards the end of the questionnaire, there are some sections of the page where there are boxes to indicate 'Yes' or 'No' responses. On some sections of the pages, only one box was displayed and there was no indication whether this was for the 'Yes' or 'No' response (see pages 23 to 25 of this report).

(b) Please provide input for the future development of the Group 2 questionnaire.
