

WHO FCTC Secretariat's Knowledge Hub on **TOBACCO SURVEILLANCE**

WEBINAR SERIES 2018

SUPPORTING LOW AND MIDDLE INCOME COUNTRIES IN THE ESTABLISHMENT
OF TOBACCO SURVEILLANCE SYSTEMS IN LINE WITH THE ARTICLE 20

Oct 26, UTC 12:00

MONITORING OF TOBACCO USE AND EXPOSURE AND THE CONSEQUENCES OF TOBACCO CONSUMPTION

Dr. Corinne Graffunder, Centers for Disease Control and Prevention
Ms. Jane Henley, Centers for Disease Control and Prevention

SPEAKERS

Corinne M. Graffunder, DrPH, MPH

Centers for Disease Control and Prevention

Dr. Corinne Graffunder is Director of the U.S. Centers for Disease Control and Prevention (CDC) Office on Smoking and Health within the National Center for Chronic Disease Prevention and Health Promotion.

Dr. Graffunder joined the CDC in 1987 and has 30+ years of experience working with Global, National, State and local prevention efforts. She is responsible for providing broad leadership and direction for all scientific, policy, communication and programmatic issues related to tobacco prevention and control.

Dr. Graffunder's expertise is in policy development, program management, strategic planning, and public and partner communication. She has subject matter expertise in prevention strategies, population health and health system transformation, focusing on a wide range of fields including tobacco use prevention and control, the prevention of violence and the prevention of non-communicable diseases, particularly cardiovascular disease and cancer. Her expertise is the application of evidence and research to practice and programs.

Prior to joining the Office on Smoking and Health, she held the position of Deputy Associate Director for Policy in CDC's Office of the Director. In this position she worked with the U.S. Surgeon General, leading the development of the first ever National Prevention Strategy: America's Plan for Better Health and Wellness. She also worked to strengthen collaboration between public health, health care, and other sectors playing a key role in advancing CDC's population health priorities.

She received her doctorate from the University of North Carolina, Department of Health Policy and Management.

Jane Henley, MSPH

Centers for Disease Control and Prevention

Jane Henley is an epidemiologist in the Cancer Surveillance Branch in the Division of Cancer Prevention and Control at the Centers for Disease Control and Prevention (CDC). Ms. Henley joined the CDC in 2010 and uses data from CDC's National Program of Cancer Registries and other surveillance systems to monitor cancer outcomes.

Before coming to CDC, she worked as an epidemiologist at the American Cancer Society in the analytic epidemiology program and conducted analyses using data from the Cancer Prevention Study cohorts.

Her research interests include surveillance of cancers linked to modifiable risk factors, including tobacco use, alcohol use, physical activity, and obesity. She has contributed to more than 100 journal articles and book chapters, including publications about cancer surveillance; lung cancer and other tobacco-related cancers; health consequences of cigarette, cigar, pipe, and smokeless tobacco use; and health benefits of smoking cessation.

She has lectured on lung cancer and smoking at the Morehouse School of Medicine and the use of population-based cancer registry data in cancer prevention and control among LMIC at Emory University.

Ms. Henley earned an undergraduate degree in statistics from Mount Holyoke College and a master of science in public health in biostatistics from the Rollins School of Public Health, Emory University.
